This lavishly illustrated book is the first systematic exploration of cartographic cartouches, the decorated frames that surround the title, or other text or imagery, on historic maps. It addresses the history of their development, the sources cartographers used in creating them, and the political, economic, historical, and philosophical messages their symbols convey. Cartouches are the most visually appealing parts of maps, and also spaces where the cartographer uses decoration to express his or her interests—so they are key to interpreting maps. The book discusses thirty-three cartouches in detail, which range from 1569 to 1821, and were chosen for the richness of their imagery. The book will open your eyes to a new way of looking at maps.

Insight Guides Chile & Rapa Nui (Easter Island): Travel Guide eBook Langenscheidt Publishing Group

Analyzing more than 150 historical maps, this book traces the Jesuits' significant contributions to mapping and mapmaking from their arrival in the New World. In 1540, in the wake of the tumult brought on by the Protestant Reformation, Saint Ignatius of Loyola founded the Society of Jesus, also known as the Jesuits. The Society's goal was to revitalize the faith of Catholics and to evangelize to non-Catholics through charity, education, and missionary work. By the end of the century, Jesuit missionaries were sent all over the world, including to South America. In addition to performing missionary and humanitarian work, Jesuits also served as cartographers and explorers under the auspices of the Spanish, Portuguese, and French crowns as they ventured into remote areas to find and evangelize to native populations. In *Encounters in the New World*, Mirela Altic analyzes more than 150 of their maps, most of which have never previously been published. She traces the Jesuit contribution to mapping and mapmaking from their arrival in the New World into the post-suppression period, placing it in the context of their worldwide undertakings in the fields of science and art. Altic's analysis also shows the incorporation of indigenous knowledge into the Jesuit maps, effectively making them an expression of cross-cultural

communication—even as they were tools of colonial expansion. This ambiguity, she reveals, reflects the complex relationship between missions, knowledge, and empire. Far more than just a physical survey of unknown space, Jesuit mapping of the New World was in fact the most important link to enable an exchange of ideas and cultural concepts between the Old World and the New.

"Beginning in October 2019, Chile was convulsed by protests and

political upheaval, as what began as civil disobedience transformed into a vast resistance movement. Throughout, one of the most striking aspects of the protests was the murals, graffiti, and other political graphics that became ubiquitous in Chilean cities. In this fascinating, beautifully illustrated book, Terri Gordon-Zolov and Eric Zolov—who were in Santiago to witness and document the protests from their very beginnings—offer a vivid catalog of Chilean wall art in all its vitality, subtlety, and inventiveness, along with reflections on its artistic antecedents, the context of global protest movements, and the long shadow cast by Chile's authoritarian past"--
