The Air Forces' most experienced training and supervisory personnel have collaborated to make it a complete exposition of what your pilot duties are, how each duty will be performed, and why it must be performed in the manner prescribed. The techniques and procedures described in this book are standard and mandatory. In this respect the manual serves the dual purpose of a training checklist and a working handbook. Use it to make sure that you learn everything described herein. Use it to study and review the essential facts concerning everything taught. Such additional self-study and review will not only advance your training, but will alleviate the burden of your already overburdened instructors. This training manual does not replace the Technical Orders for the airplane, which will always be your primary source of information concerning the C-54 so long as you fly it. This is essentially the textbook of the C-54. Used properly, it will enable you to utilize the pertinent Technical Orders to even greater advantage

Cessna 152 Training Manual Jeffrey Frank Jones

Flown by the American Volunteer Group in China known as the "Flying Tigers," the P-40 Warhawk earned a reputation for its toughness in combat. Facing odds of 6 to 1 in most combat situations, AVG pilots relied on their skill, daring and their aircraft's superior diving speed to achieve victory. By war's end the Tigers had destroyed more than 1200 Japanese

planes, with another 700 listed as probables. Their own losses came to 573 aircraft. Originally printed by the U.S. Army Air Force for pilots transitioning to the P-40, this flight manual contains detailed information about one of history's great planes. Originally classified as "restricted," the manual was declassified long ago and is here reprinted in book form. Some color images appear in black and white, and some pages have been slightly reformatted. Care has been taken however to preserve the integrity of the text.

Flight Training Handbook

This manual, Training Circular TC 3-04.21 (TC 1-272) Aircrew Training Manual, Light Utility Helicopter, UH-72A November 2013, standardizes aircrew training programs (ATPs) and flight evaluation procedures. It provides specific guidelines for executing light utility helicopter UH-72A aircrew training and establishes crewmember qualification, refresher, mission, and continuation, training, and evaluation requirements. This manual applies to all UH-72A crewmembers and their commanders in the active Army, the Army National Guard Bureau (NGB), the United States (U.S) Army National Guard (ARNG), the U.S Army Reserve (USAR) and Department of the Army Civilians (DACs) unless otherwise stated. This manual applies to the Active Army, the Army National Guard (ARNG), the Army National Guard of the United States (ARNGUS), and the United States Army Reserve (USAR) unless otherwise stated. The operator's manual is the governing authority for operation of the aircraft. If differences exist between the maneuver descriptions in the rotorcraft flight manual (RFM) and this manual, then this manual is the governing authority for training and flight evaluation purposes only. The manufacturer RFM and any applicable supplements are the governing authority for operation of the aircraft. Implementation of this manual conforms to AR 95-1 (flight regulations) and TC 3-04.11. If a conflict exists between this manual, and TC 3-04.11, the ATP commander determines the method of accomplishment based upon the requirement and the unit's mission as to which manual takes precedence. This manual, in conjunction with the ARs and TC 3-04.11, will help aviation commanders, at all levels; develop a comprehensive ATP. By using this ATM, commanders ensures, that individual crewmembers and aircrew proficiency is commensurate with the units' mission that aircrews routinely employ standard techniques and procedures. Crewmembers will use this manual as a "how to" source for performing crewmember duties. It provides performance standards and evaluation guidelines so that crewmembers know the level of performance expected. Each task provides a description of how the task should be performed to meet the standards.. ATP commanders of active Army, National Guard, and Army Reserve units operating the UH-72A helicopter will use this ATM

and TC 3-04.11 to develop individual commander's task lists for assigned aviators.
