Recent years have seen a sea change in the way history is written and also in the way our conceptions of the past are being rewritten. In traditional historiography, women's articulation is often marginalized and dominated by male voices. Through centuries of patriarchal control, women negotiated many layers and levels of existence working out different forms of resistance which have often gone unnoticed. Bhakti was one such medium. Religion provided

the space in the medieval period and women saints embraced bhakti to define their own truths in voices that question society, family and relationships. For all these women bhaktas, the rejection of the male power that they were tied to in subordinate relationship became the terrain for struggle, self assertion and alternative seeking. Most of these women lived during the period from 12th to 17th Century. While the dominant mode of worship in bhakti was prostration to a deity like a feudal lord, the women bhaktas' idea of God as a lover, a husband and a friend came as a breath of fresh air. The individual outpourings and the voices of these women, who had the courage to sing unfettered in their own voices, refused to melt in the din of the feudal scene

which was largely patriarchal. This book will be useful to scholars interested in Feminist History, Comparative Religion and Asian Studies. The sensitive and rigorous research will be of great help to young scholars interested in embarking on a journey to discover religious history, especially with regards to women's history in the South Asian context.

retelling of stories develop critical thinking and study skills in learners—two vital tools for learning. 4. The series guides learners through the seven stages of a brain-based approach to learning. 5. The 5Ps address the above mentioned seven stages as follows - Ponder: aids the learners in pre-acquisition of concepts by setting the context, while preparing them to read the text with the aid of the glossary and in-text questions. Prepare: immerses the learners into the context and initiates holistic learning. It helps in the acquisition of newer perspectives through task-based activities. Practise: lays out the canvas for the stage of elaboration, in which the learners analyse and evaluate the text while applying their understanding of it.

Perfect: aids memory encoding through drilling of vocabulary and grammar topics. It helps with incubation of concepts. Perform: functions as a confidence check for learners and ensures verification of their performative skills. This stage of summing up allows a functional integration of acquired concepts, leading to a celebration of learning. 6. Subject Integration (SI) tasks weave cross-curricular references through the chapters. 7. Task-Based Learning (TBL) activities present learners with real-life situations within the classroom. 8. Life Skills (LS) are enhanced through challenging texts and value-based concept checking questions (CCQs). 9. Wall of fame: At the beginning of the book is a gallery of famous authors and characters that the child will

The incredible bestselling first novel from Pulitzer Prize-winning author, Jhumpa Lahiri. 'The kind of writer who makes you want to grab the next person and say "Read this!"' Amy Tan 'When her grandmother learned of Ashima's pregnancy, she was particularly thrilled at the prospect of naming the family's first sahib. And so Ashima and Ashoke have agreed to put off the decision of what to name the baby until a letter comes...' For now, the label on his hospital cot reads simply BABY BOY GANGULI. But as time passes and still no letter arrives from India, American bureaucracy takes over and demands that 'baby boy Ganguli' be given a name.

Everyone knows that "the face can wear a mask," that a person may be a good actor and put on a certain expression that may deceive even the best judgment. But hands cannot change as the result of a mere effort to please; the character they express is the real nature of the individual—the true character that has been formed by heredity or that has

grown up with the person by long years of habit. The characteristics alluded to below are those which may be easily observed and which are aids to a rapid judgment of character and which I have never before been able to give to the public in such a concise way. The more elaborate details concerning the ultimate success of the person one is talking to, their more intimate character and their future development will be found in their proper place, in this book.

Designed for a one-semester course in Finite Element Method, this compact and well-organized text presents FEM as a tool to find approximate solutions to differential equations. This provides the student a better perspective on the

technique and its wide range of applications. This approach reflects the current trend as the present-day applications range from structures to biomechanics to electromagnetics, unlike in conventional texts that view FEM primarily as an extension of matrix methods of structural analysis. After an introduction and a review of mathematical preliminaries, the book gives a detailed discussion on FEM as a technique for solving differential equations and variational formulation of FEM. This is followed by a lucid

presentation of one-dimensional and two-dimensional finite elements and finite element formulation for dynamics. The book concludes with some case studies that focus on industrial problems and Appendices that include mini-project topics based on near-real-life problems. Postgraduate/Senior undergraduate students of civil, mechanical and aeronautical engineering will find this text extremely useful; it will also appeal to the practising engineers and the teaching community.
