The Balkans, in particular the turbulent ex-Yugoslav territory, have been among the most important world regions in Noam Chomsky's political reflections and activism for decades. His articles, public talks, and correspondence have provided a critical voice on political and social issues crucial not only to the region but the entire international community, including "humanitarian intervention," the relevance of international law in today's politics, media manipulations, and economic crisis as a means of political control. This volume provides a comprehensive survey of virtually all of Chomsky's texts and public talks that focus on the region of the former Yugoslavia, from the 1970s to the present. With numerous articles and interviews, this collection presents a wealth of materials appearing in book form for the first time along with reflections on events twenty-five years after the official end of communist Yugoslavia and the beginning of the war in Bosnia. The book opens with a personal and wide-ranging preface by Andrej Grubačić that affirms the ongoing importance of Yugoslav history and identity, providing a context for understanding Yugoslavia as an experiment in self-management, antifascism, and multiethnic coexistence.

### *Employment and Unemployment Statistics* McGraw-Hill Education (UK)

This work is based on a conceptualization of leadership as horizontal, inclusive, and participatory. The alternative leadership model responds to the need for leaders who aspire to create egalitarian, democratic societies based on collaborative decision-making and gender equality. Women's groups in Cameroon,

Ghana, Liberia, Nigeria, Sierra Leone, Tanzania, Uganda and Zimbabwe are using the manual to help participants hone their skills for women's rights advocacy. A participant from Liberia described how she overcame intimidations from fellow cabinet members, and went on to implement major improvements to the ministry under her purview.

#### **Liberty Ship Survivor EP BOOKS**

In this collection of ethnic group histories, written by authors from the Mara Region of Tanzania, local people tell their stories as a way to inspire development that builds on the strengths of the past. It combines histories from the small, but closely related, ethnic groups of Ikizu, Sizaki, Ikoma, Ngoreme, Nata, Ishenyi and Tatoga in South Mara, east of Lake Victoria and west of Serengeti National Park. Many of the authors compiled their stories by meeting with groups of elders. They were concerned to preserve history for the next generation who had not taken the time to learn the stories orally. The stories were written in Swahili and translated into English with annotations and an introduction so that readers not familiar with this region might also share in the experience. It also includes transcriptions of oral interviews with some of the same stories to get a sense of the ongoing conversions about the past. This collection makes local history told in a local idiom accessible to students of African history interested in social memory and the creation of ethnicity.

What if God has had a plan for your life since the very beginning? Not just the beginning of your life, but from the foundations of faith itself? You'll understand the four stages of faith, believe the promises of God for your life . . . and discover what it means to be truly fulfilled.

This edited collection provides unprecedented insight into the emerging field of multilingual education in Sub-Saharan Africa (SSA). Multilingual education is claimed to have many benefits, amongst which are that it can improve both content and language learning, especially for learners who may have low ability in the medium of instruction and are consequently struggling to learn. The book represents a range of Sub-Saharan school contexts and describes how multilingual strategies have been developed and implemented within them to support the learning of content and language. It looks at multilingual learning from several points of view, including 'translanguaging', or the use of multiple languages – and especially African languages – for learning and language-supportive pedagogy, or the implementation of a distinct pedagogy to support learners working through the medium of a second language. The book puts forward strategies for creating materials, classroom environments and teacher education programmes which support the use of all of a student's languages to improve language and content learning. The contexts which the book describes are challenging, including low school resourcing, poverty and low literacy in the home, and school policy which militates against the use of African languages in school. The volume also draws on multilingual education approaches which have been successfully carried out in higher resource countries and lend themselves to

being adapted for use in SSA. It shows how multilingual learning can bring about transformation in education and provides inspiration for how these strategies might spread and be further developed to improve learning in schools in SSA and beyond. *Telling Our Own Stories* BRILL

*Home Cell Group Explosion* (2023 version) is the most researched and practical book ever written on cell group evangelism! Joel Comiskey traversed the globe to find out why certain churches and small groups are successful in reaching the lost. He found the answers and freely shares them within this volume. If you are a pastor or small group leader, you should devour this book! It will encourage you and give you simple, practical steps for dynamic small group life and growth. My friend Joel Comiskey is a combination of a local church practitioner and a painstaking scholar. Joel spent hundreds of hours and thousands of dollars visiting eight of the highest-visibility cell group churches to interview their leaders and record his findings. I love this book because it focuses on the multiplication of cells for the greatest evangelistic results. (C.Peter Wagner, Author, Scholar, and Church Growth Expert) Comiskey does not just describe what is happening in cell churches. He takes the next step and identifies in a step-by-step fashion how we can apply these principles in our churches. It is all here-everything we need to know to start and grow a cell group ministry. I am grateful to Dr. Comiskey, for the time, effort, and research that has gone into producing this long-needed book. (Richard Peace, Ph.D., Professor of Evangelism and Spiritual Formation, Fuller Theological Seminary) Joel and I shared many days in Bogota as this book was written. His grasp of cell church models is superior to any other person I have worked with: this book is a treasure of information for church planters and pastors wishing to transition to the cell model. (Ralph W. Neighbour, Jr., Author, and Pioneer Church Planter)

Joyce Meyer is not satisfied with the status quo. She believes that we each need to become a revolutionary and practice love every day. And if Joyce has her way, the revolution will spread -- person by person, house by house, town by town, until the old culture of selfishness and greed gives way to a new culture of concern for others. The book is a revolutionaries' manual, a hands-on primer for bringing the Golden Rule to life in the twenty-first century. Meyer starts out by giving some stunning statistics. Right now. . . 210,000 children will die this week because of poverty; 640 million children do not have adequate shelter; every day, 3,000 children are abducted into the sex-trafficking industry; every day, 16,000 children die from hunger-related causes. She goes on to say that although crisis is global, the solution is local. We can't solve the world's problems, but that isn't a reason to remain idle. Love Revolution focuses on personal behavior on the local scale. It's not just a call to action; it is a call to being: being the person who goes out of your way to encourage someone who's out of hope; being the one who smiles at a stranger; being the one who is willing to do something for nothing. The paradox: when we do

something for nothing, what we often get is something far greater.

Genesis is a book about beginnings -- the creation of the universe, the formation of mankind, the establishment of the covenant and the founding of the people of Israel. Many Christians regard the Old Testament as merely a collection of interesting stories to be taught in Sunday school, but which have little application for the church today except as providing examples or illustrations from a bygone, almost barbarous, age. The truth is that almost every important church doctrine is found in 'seed' form in the book of Genesis -- creation, fall, redemption, the doctrine of the Trinity, the promise of the Messiah, the establishment of the covenant and the hope of the resurrection are all to be found here. A 'seed' is planted in Genesis and then it sprouts and grows throughout the rest of the Bible until it finds its fruition in the person and work of Jesus Christ. God created the universe; it fell through the sin of humanity; and now God is in the process of redeeming it through the work of Christ. This latter work continues even now until the time of the end when all things will be put in their final place. Dr. Currid provides solid exegesis in an accessible way, matched with practical application that displays the relevance of this Old Testament book for the twenty-first century. This volume covers the period from the creation up to the death of Abraham and the marriage of Isaac and Rebekah. - Publisher.
