Designed in imitation of a harbor town in southern Europe, the Realm of Summer is just one of the zones within the virtual resort known as the Costa del Número. It has been more than a thousand years since human guests stopped coming to the Realm, leaving the AIs alone in their endless summer. But now all that has come to a sudden end, as an army of mysterious Spiders begin reducing the town to nothing. As night falls, the few remaining AIs prepare for their final, hopeless battle... An entertaining and eye-opening look at the French Revolution, by Stephen Clarke, author of *1000 Years of Annoying the French* and *A Year in the Merde*. *The French Revolution and What Went Wrong* looks back at the French Revolution and how it's surrounded in a myth. In 1789, almost no one in France wanted to oust the king, let alone guillotine him. But things quickly escalated until there was no turning back. *The French Revolution and What Went Wrong* looks at what went wrong and why France would be better off if they had kept their monarchy.

The English Channel may be only twenty miles wide, but it's a thousand years deep. Stephen Clarke takes a penetrating look into those murky depths, guiding us through all the times when Britain and France have been at war - or at least glowering at each other across what the Brits provocatively call the English Channel. Along the way he explodes a few myths that French historians have been trying to pass off as 'la vérité', as he proves that the French did not invent the baguette, or the croissant, or even the guillotine, and would have taken the bubbles out of bubbly if the Brits hadn't created a fashion for fizzy champagne. Starting with the Norman (not French) Conquest and going right up to the supposedly more peaceful present, when a state visit by French President Nicolas Sarkozy becomes a series of hilarious historical insults, it is a light-hearted - but impeccably researched - account of all our great fallings-out. In short, the French are quite right to suspect that the last thousand years have been one long British campaign to infuriate them. And it's not over yet ...

One day Sophie comes home from school to find two questions in her mail: "Who are you?" and "Where does the world come from?"

Before she knows it she is enrolled in a correspondence course with a mysterious philosopher. Thus begins Jostein Gaarder's unique novel, which is not only a mystery, but also a complete and entertaining history of philosophy.

*The Merde Factor* Unbound Publishing

The latest episode in Stephen Clarke's almost-true account of his adventures as an expat in France is just as winning as the first. This "anti-Mayle" will have readers chortling over their croissants and café au lait while Paul West struggles to solve the mysteries inherent in life in France. What is the best way to scare a gendarme? Is it really polite to sleep with your boss's mistress? And why are there no public health warnings on French nude beaches? Paul discovers how to judge a French vacationer by the rustiness of his bicycle; opens his English tearoom; and finally understands why Parisian waiters are so cranky. Just in time for spring in Paris, find out if Paul finds the perfect French mademoiselle or if it all ends in merde!

"No one writes about love like Gayle Forman. Lose yourself in her passionate mash note to rock music, indie bookstores and best of all, the miracles that can happen when you take chances on other people." — E. LOCKHART, #1 New York Times bestselling author of *We Were Liars* and *Again Again* A poignant and uplifting novel about the power of community, from the #1 New York Times bestselling author of *If I Stay*. Aaron Stein used to think books were miracles. But not anymore. Even though he spends his days

working in his family's secondhand bookstore, the only book Aaron can bear to read is one about the demise of the dinosaurs. It's a predicament he understands all too well, now that his brother and mom are gone and his friends have deserted him, leaving Aaron and his shambolic father alone in a moldering bookstore in a crusty mountain town where no one seems to read anymore. So when Aaron sees the opportunity to sell the store, he jumps at it, thinking this is the only way out. But he doesn't account for Chad, a "best life" bro with a wheelchair and way too much optimism, or the town's out-of-work lumberjacks taking on the failing shop as their pet project. And he certainly doesn't anticipate meeting Hannah, a beautiful, brave musician who might possibly be the kind of inevitable he's been waiting for. All of them will help Aaron to come to terms with what he's lost, what he's found, who he is, and who he wants to be, and show him that destruction doesn't inevitably lead to extinction; sometimes it leads to the creation of something entirely new.

Have you ever walked into a half-empty Parisian restaurant, only to be told that it's "complet"? Attempted to say "merci beaucoup" and accidentally complimented someone's physique? Been overlooked at the boulangerie due to your adherence to the bizarre foreign custom of waiting in line? Well, you're not alone. The internationally bestselling author of *A Year in the Merde* and *In the Merde for Love* has been there too, and he is here to help. In *Talk to the Snail*, Stephen Clarke distills the fruits of years spent in the French trenches into a truly handy (and hilarious) book of advice. Read this book, and find out how to get good service from the grumpiest waiter; be exquisitely polite and brutally rude at the same time; and employ the language of *l'amour* and *le sexe*. Everything you need is here in this funny, informative, and seriously useful guide to getting what you really want from the French.

A Thousand Years of Nonlinear History Algonquin Books  
The tranquility of Mars is disrupted by humans who want to conquer space, colonize the planet, and escape a doomed Earth. A&C Black

The author of *A Year in the Merde* and *Talk to the Snail* offers a highly biased and hilarious view of French history in this international bestseller. Things have been just a little awkward between Britain and France ever since the Norman invasion in 1066. Fortunately—after years of humorously chronicling the vast cultural gap between the two countries—author Stephen Clarke is perfectly positioned to investigate the historical origins of their occasionally hostile and perpetually entertaining *pas de deux*. Clarke sets the record straight, documenting how French braggarts and cheats have stolen credit rightfully due their neighbors across the Channel while blaming their own numerous gaffes and failures on those same innocent Brits for the past thousand years. Deeply researched and written with the same sly wit that made *A Year in the Merde* a comic hit, this lighthearted trip through the past millennium debunks the notion that the Battle of Hastings was a French victory (William the Conqueror was really a Norman who hated the French) and pooh-poohs

French outrage over Britain's murder of Joan of Arc (it was the French who executed her for wearing trousers). He also takes the air out of overblown Gallic claims, challenging the provenance of everything from champagne to the guillotine to prove that the French would be nowhere without British ingenuity. Brits and Anglophiles of every national origin will devour Clarke's decidedly biased accounts of British triumph and French ignominy. But 1000 Years of Annoying the French will also draw chuckles from good-humored Francophiles as well as "anyone who's ever encountered a snooty Parisian waiter or found themselves driving on the Boulevard Périphérique during August" (The Daily Mail). A bestseller in Britain, this is an entertaining look at history that fans of Sarah Vowell are sure to enjoy, from the author the San Francisco Chronicle has called "the anti-Mayle . . . acerbic, insulting, un-PC, and mostly hilarious."

A NOTE FROM THE AUTHOR Bonjour cher reader, Ever since European history began, we Brits have been happily engaged in our national pastime - annoying the French. And the past couple of years have shown that this annoying never stops. To give just three examples: After a mid-Atlantic collision between French and British nuclear submarines, France's Minister of Defence seemed to blame the accident on ... shrimps. When French political superstar Dominique Strauss-Kahn was arrested in New York, France's establishment was outraged. It soon emerged that sexual harassment was regarded as a basic human right by the country's male elite. (This theme provided so much excellent material that I decided to include it in the plot of my soon-to-be published novel, *The Merde Factor*.) And when David Cameron walked out of a Eurosummit, a French politician accused him of being 'like a man at a wife-swapping party who refuses to bring his own wife.' Yes, a very French image, and it just one of the many anti-Anglais insults that came flying across the Channel. You will find all this, and much more, in *Annoying the French Encore!* Because, for the French, the merde never ends. Yours historically, Stephen Clarke, Paris, August 2012 'Tremendously entertaining' Sunday Times 'Relentlessly and energetically rude' Mail on Sunday

*1000 Years of Annoying the French* Bloomsbury Publishing USA  
Following in the wake of his groundbreaking work *War in the Age of Intelligent Machines*, Manuel De Landa presents a brilliant, radical synthesis of historical development of the last thousand years. *A Thousand Years of Nonlinear History* sketches the outlines of a renewed materialist philosophy of history in the tradition of Fernand Braudel, Gilles Deleuze, and Félix Guattari, while engaging — in an entirely unprecedented manner — the critical new understanding of material processes derived from the sciences of dynamics. Working against prevailing attitudes that see history merely as the arena of texts, discourses, ideologies, and metaphors, De Landa traces the concrete movements and interplays of matter and energy through human populations in the last millennium. The result is an entirely novel approach to the study of human societies and their always mobile, semi-stable forms, cities, economies, technologies, and languages. De Landa attacks three domains that have given shape to human societies:

economics, biology, and linguistics. In each case, De Landa discloses the self-directed processes of matter and energy interacting with the whim and will of human history itself to form a panoramic vision of the West free of rigid teleology and naive notions of progress and, even more important, free of any deterministic source for its urban, institutional, and technological forms. The source of all concrete forms in the West's history, rather, is shown to derive from internal morphogenetic capabilities that lie within the flow of matter—energy itself. A Swerve Edition.
