MARSHALL MARCO

The nexus between institution and stochastic growth in selected Sub-Saharan African countries. Evidence from dynamic panel data analysis S. Chand Publishing

The Intergovernmental Panel on Climate Change (IPCC) is the leading international body for assessing the science related to climate change. It provides policymakers with regular assessments of the scientific basis of human-induced climate change, its impacts and future risks, and options for adaptation and mitigation. This IPCC Special Report on the Ocean and Cryosphere in a Changing Climate is the most comprehensive and up-to-date assessment of the observed and projected changes to the ocean and cryosphere and their associated impacts and risks, with a focus on resilience, risk management response options, and adaptation measures, considering both their potential and limitations. It brings together knowledge on physical and biogeochemical changes, the interplay with ecosystem changes, and the implications for human

communities. It serves policymakers, decision makers, stakeholders, and all interested parties with unbiased, up-to-date, policy-relevant information. This title is also available as Open Access on Cambridge Core.

Green Design, Materials and Manufacturing Processes GRIN Verlag

This well-known textbook provides students with the knowledge of basic accounting principles and practices in a systematic manner. The unique feature that has made this book popular among students is the simplicity of presentation which enables them to understand the subject and solve practical problems with ease. The main strengths of the book are updated text, plentiful illustrative examples and the end-of-chapter exercises with answers. The wide coverage and user-friendly approach help the book to meet the course content requirements for BCom, BBA, MCom, MCA examinations of different universities and examinations conducted by professional institutions. KEY FEATURES □ Updated text in view of new and withdrawn accounting standards and their interpretation. □ Formulation of the roadmap for convergence of Indian Accounting Standards to

IFRS. □ Incorporation of the New Schedule VI in place of Old Schedule VI with appropriate notes, wherever necessary. □ Complete overhauling of solutions to all Illustrations and requisite changes in the answers to Practical Problems required due to the substitution of New Schedule VI in place of Old Schedule VI. □ Latest questions and problems from examinations conducted by different professional bodies and universities.

Climate Change in Cities Oxford University Press, USA

As a consequence of recent increased awareness of the social and political dimensions of climate, many non-specialists discover a need for information about the variety of available climate models. A Climate Modelling Primer, Third Edition explains the basis and mechanisms of all types of current physically-based climate models. A thoroughly revised and updated edition, this book assists the reader in understanding the complexities and applicabilities of today's wide range of climate models. Topics covered include the latest techniques for modelling the coupled biosphere-ocean-atmosphere system, information on current practical aspects of climate modelling and ways to evaluate and exploit the results, discussion of Earth System Models of Intermediate Complexity (EMICs), and interactive exercises based on Energy Balance Model (EBM) and the Daisyworld model. Source codes and results from a range of model types allows readers to make their own climate simulations and to view the results of the latest high resolution models. The accompanying CD contains: A suite of resources for those wishing to learn more about climate modelling. A range of model visualisations. Data from climate models for use in the classroom. Windows and Macintosh programs for an Energy Balance Model. Selected figures from the book for inclusion in presentations and lectures. Suitable for 3rd/4th year undergraduates taking courses in climate modelling, economic forecasting, computer science, environmental science, geography and oceanography. Also of relevance to researchers and professionals working in related disciplines with climate models or who need accessible technical background to climate modelling predictions.

Principles of Environmental Physics CRC Press

The Definitive History of the Spirit-Filled Church Encyclopedic coverage of: Activities of the Spirit over 2,000 years of church history in 60 countries and regions Outpourings at Topeka, Mukti Mission (India), Azusa Street, Duquesne University, and many other 20th-century locations Current movements among today's 500 million-plus Pentecostal and charismatic Christians worldwide The New International Dictionary of Pentecostal and Charismatic Movements sets modern, Spirit-filled Christianity in a context that spans two millennia and the entire Christian world. Like no other resource, this volume reveals in detail the full, sweeping legacy of Spirit-empowered movements that have touched hearts and lives both in modern America and across the centuries and continents: in medieval Europe, Finland in the 1700s, South India in the 1800s, Azusa Street at the turn of the 20th century--and much more, including ongoing moves of the Holy Spirit throughout the world today. One thousand entries provide the most extensive information available on Pentecostal, charismatic, and neocharismatic movements. The diverse topics covered include, as a small sample, glossolalia, black and Hispanic Pentecostalism, prophecy, the role of women, faith healing, music, sociology, missions, church growth, and different historic and contemporary revivals. With its unique international and historical perspective, this completely revised and expanded second edition of the acclaimed Dictionary of Pentecostal and Charismatic Movements offers features that no other reference of its kind approaches. Its extraordinary scope and detailed, up-to-date coverage make this the definitive resource on Pentecostal and charismatic denominations and movements both in North

America and worldwide. Includes: Exhaustive coverage of Pentecostal and charismatic movements in 60 countries and regions--individual histories, cultural and theological aspects, and key figures and institutions. Statistical section with a wealth of current information on the growth of classical Pentecostalism as well as charismatic and neocharismatic movements. 1,000 articles. Over 500 photos and illustrations, maps, and timeline. Cross references, bibliographies, and indexes to people, places, and topics.

Land Use, Land-use Change, and Forestry PHI Learning Pvt. Ltd.

Uncertainty analysis is a key component of national greenhouse gases inventory analyses. The issues that are raised by the authors in this volume, and the role that uncertainty analysis plays in many of their arguments and/or proposals, highlight the importance of such efforts. Coverage includes: bottom-up versus top-down emission inventory approaches, compliance and verification issues, and the role of uncertainty in emissions trading schemes.

Intertwined Threads : An Amalgamation of Colourful Short Stories Oxford University Press

"A thorough yet thoroughly digestible book on the ubiquity of data gathering and the unraveling of personal privacy." —Daniel Pink, author of Drive Thanks to recent advances in technology, prediction models for individual behavior grow more sophisticated by the day. Whether you'll marry, commit a crime or fall victim to one, or contract a disease are becoming easily accessible facts. The naked future is upon us, and the implications are staggering. Patrick Tucker draws on fascinating stories from health care to urban planning to online dating. He shows how scientists can predict your behavior based on your friends' Twitter updates, anticipate the weather a year from now, figure out the time of day you're most likely to slip back into a bad habit, and guess how well you'll do on a test before you take it. Tucker knows that the rise of Big Data is not always a good thing. But he also shows how we've gained tremendous benefits that we have yet to fully realize.

Surface Temperature Reconstructions for the Last 2,000 Years Routledge

Introducing the concept of state-sponsored platformization, this volume shows the complexity behind the central role the party-state plays in shaping social media platforms. The party-state increasingly penetrates commercial social media while aspiring to turn its own media agencies into platforms. Yet state-sponsored platformization does not necessarily produce the Chinese Communist Party's desired outcomes. Citizens continue to appropriate social media for creative public engagement at the same time that more people are managing their online settings to reduce or refuse connection, inducing new forms of crafted resistance to hyper-social media connectivity. The wide-ranging essays presented here explore the mobile radio service Ximalaya.FM, Alibaba's evolution into a multi-platform ecosystem, livestreaming platforms in the United States and China, the role of Twitter in Trump's North Korea diplomacy, user-generated content in the news media, the emergence of new social agents mediating between state and society, social media art projects, Chinese and US scientists' use of social media, and reluctance to engage with WeChat. Ultimately, readers will find that the ten chapters in this volume contribute significant new research and insights to the fast-growing scholarship on social media in China at a time when online communication is increasingly constrained by international struggles over political control and privacy issues.

The Routledge Companion to Narrative Theory Cambridge University Press

An exposition of the relevant law and the techniques commonly used to meet the regulatory requirements concerning the built environment. Each chapter deals with a discrete topic, combining law, policy and administrative aspects with the engineering, technological and management remedies available.

CA Inter Advanced Accounting Routledge

The IUCN Academy of Environmental Law Research Studies' third colloquium brought together more than 130 experts from 27 nations on nearly every continent. This book brings together a number of papers presented there and offers a global perspective on biodiversity conservation and the maintenance of sustainable cultures.

Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation StoryMirror Infotech Pvt Ltd

This Handbook gives a comprehensive, international and cutting-edge overview of Sustainable Development. It integrates the key imperatives of sustainable development, namely institutional, environmental, social and economic, and calls for greater participation, social cohesion, justice and democracy as well as limited throughput of materials and energy. The nature of sustainable development and the book's theorization of the concept underline the need for interdisciplinarity in the discourse as exemplified in each chapter of this volume. The Handbook employs a critical framework that problematises the concept of sustainable development and the struggle between discursivity and control that has characterised the debate. It provides original contributions from international experts coming from a variety of disciplines and regions, including the Global South.

Comprehensive in scope, it covers, amongst other areas:

Sustainable architecture and design Biodiversity Sustainable business Climate change Conservation Sustainable consumption De-growth Disaster management Eco-system services Education Environmental justice Food and sustainable development Governance Gender Health Indicators for sustainable development Indigenous perspectives Urban transport The Handbook offers researchers and students in the field of sustainable development invaluable insights into a contested concept and the alternative worldviews that it has fostered.

The journal of criminal law National Academies Press

This book presents pioneering work on a range of innovative practices, experiments, and ideas that are becoming an integral part of urban climate change governance in the 21st century. Theoretically, the book builds on nearly two decades of scholarships identifying the emergence of new urban actors, spaces and political dynamics in response to climate change priorities. However, it further articulates and applies the concepts associated with urban climate change governance by bridging formerly disparate disciplines and approaches. Empirically, the chapters investigate new multi-level urban governance arrangements from around the world, and leverage the insights they provide for both theory and practice. Cities - both as political and material entities - are increasingly playing a critical role in shaping the trajectory and impacts of climate change action. However, their policy, planning, and governance responses to climate change are fraught with tension and contradictions. While

on one hand local actors play a central role in designing institutions, infrastructures, and behaviors that drive decarbonization and adaptation to changing climatic conditions, their options and incentives are inextricably enmeshed within broader political and economic processes. Resolving these tensions and contradictions is likely to require innovative and multi-level approaches to governing climate change in the city: new interactions, new political actors, new ways of coordinating and mobilizing resources, and new frameworks and technical capacities for decision making. We focus explicitly on those innovations that produce new relationships between levels of government, between government and citizens, and among governments, the private sector, and transnational and civil society actors. A more comprehensive understanding is needed of the innovative approaches being used to navigate the complex networks and relationships that constitute contemporary multi-level urban climate change governance. Debra Roberts, Co-Chair, Working Group II, IPCC 6th Assessment Report (AR6) and Acting Head, Sustainable and Resilient City Initiatives, Durban, South Africa "Climate Change in Cities offers a refreshingly frank view of how complex cities and city processes really are." Christopher Gore, Associate Professor and Chair, Department of Politics and Public Administration, Ryerson University, Canada "This book is a rare and welcome contribution engaging critically with questions about cities as central actors in multilevel climate governance but it does so recognizing that there are lessons from cities in both the Global North and South." Harriet Bulkeley, Professor of Geography, Durham University, United Kingdom "This timely collection provides new insights into how cities can put their rhetoric into action on the ground and explores just how this promise can be realised in cities across the world - from California to Canada, India to Indonesia."

International Climate Change Law UBC Press

This Intergovernmental Panel on Climate Change Special Report (IPCC-SRREN) assesses the potential role of renewable energy in the mitigation of climate change. It covers the six most important renewable energy sources - bioenergy, solar, geothermal, hydropower, ocean and wind energy - as well as their integration into present and future energy systems. It considers the environmental and social consequences associated with the deployment of these technologies, and presents strategies to overcome technical as well as non-technical obstacles to their application and diffusion. SRREN brings a broad spectrum of technology-specific experts together with scientists studying energy systems as a whole. Prepared following strict IPCC procedures, it presents an impartial assessment of the current state of knowledge: it is policy relevant but not policy prescriptive. SRREN is an invaluable assessment of the potential role of renewable energy for the mitigation of climate change for policymakers, the private sector, and academic researchers.

Climate Change 2007 IGI Global

The first single-volume history of Zimbabwe with detailed coverage from pre-colonial times to the present, this book examines Zimbabwe's pre-colonial, colonial and postcolonial social, economic and political history and relates historical factors and trends to recent developments in the country. Zimbabwe is a country with a rich history, dating from the early San hunter-gatherer societies. The arrival of British imperial rule in 1890 impacted the country tremendously, as the European rulers exploited Zimbabwe's resources, giving rise to a movement of African nationalism and demands for independence. This culminated in the armed conflict of the 1960s and 1970s and independence in 1980. The 1990s were marked by economic decline and the rise of opposition politics. In 1999, Mugabe embarked on a violent land reform program that plunged the nation's economy into a downward spiral, with political violence and human rights violations making Zimbabwe an international pariah state. This book will be useful to those studying Zimbabwean history and those unfamiliar with the country's past.

Engaging Social Media in China Taylor & Francis

This book tries to reunite and rebuild faith in public institutions by highlighting the availability of judicial remedies for the poor and the excluded in South Asia. The central idea of this book is the inevitable link between judicial capacity and good governance. It critically discusses the state of 'access to justice' to the poor and addresses the problems of various structures and procedures

approached by the poor to seek justice. The formal system remains locked in the whimsical fantasies of the lawyers and the state structure which aborts the rule of law for the privileged and works in open defiance of the increasing disempowerment of the poor due to an overwhelming judiciary. This book highlights the growing need for restorative justice as against retributive and thus emphasizes a more intensive action research in alternative dispute resolution systems (ADRs). This argument is further developed to assess the competence of many people's led informal institutions of judiciary such as Saalish in Bangladesh, Jirgas in Pakistan or Lok Adalats in India. The book is also radical in its approach towards the use of alternative dispute resolution systems to support marginalized communities, including women in distress, through mediation and arbitration which are gaining a new intellectual space in justice discourse. This book is an indispensable guide to administrators, and social scientists interested in governance and legal research. It would also be useful for those working in the non-state sector of pro-poor reforms.

Routledge International Handbook of Sustainable Development
CA. Ravi Chugh

This authoritative dictionary covers all aspects of economics including theory, policy, and applied micro and macroeconomics on a global scale. An essential book for professional economists as well as for students and teachers of economics, business, and finance.
