The Artful Garden Rizzoli International Publications

Natural swimming pools are the biggest news for gardeners since green roofs. The water is cleaned by aquatic plants instead of chlorine so it is gentle on the eyes and healthy for swimmers. These self-cleaning ecosystems are beautiful to look at and provide a valuable water source for dragonflies, honeybees and other beneficial insects. Wolfram Kircher has researched extensively into the low-nutrient-dependent plants that are needed for the surrounds of natural swimming pools and the high-nutrient dependent plants that are required for the regeneration zone. In the book he demonstrates how to maintain the nutrient level in perfect balance to keep down the algae down and water sparkling. The authors have installed pools for decades and trialled different systems and plants to come up with the best possible designs.

Natural Swimming Pools McGraw Hill Professional

A privileged view of private gardens along the shore of Lake Michigan, Chicago's Gold Coast. Ben Lenhardt, an avid gardener and preservationist, explores the rich tradition of gardening along the shore of Lake Michigan from Evanston to Lake Bluff. This area, which includes Winnetka, Highland Park, and Lake Forest, is one of the most affluent in the United States, and the gardens are verdant retreats, lushly planted and meticulously maintained.

Twenty-five gardens are included, organized according to their design-- classic, naturalistic, country, and experimental. Lenhardt's authoritative and engaging descriptions, based on detailed interviews with the owners, are complemented by vivid images by noted landscape photographer Scott Shigley.
