 A scientist discovers a new species near  
 coral reefs in Australia. On basic  
 microscopic examination and after  
 conducting a few simple experiments, he  
 finds that this single-celled species is  
 photosynthetic (using sunlight for energy),  
 has a rigid cell wall structure with no  
 peptidoglycan, uses a flagellum for  
 motion, and contains a variety of internal  
 structures that are bound by plasma
