Brown Bag Lessons, The Magic of Bullet Writing centers on effective bullet writing and guarantees immediate improvement. Skillful writing doesn't have to be difficult. No other book approaches writing the way this book does, and no other book

teaches these techniques. After reading this book, you will fully understand how to write strong bullets and "why" every word matters. In 2003 the author created a seminar to teach a fair and consistent process to evaluate recognition packages. This seminar transformed an entire organization within six months. Since then, the techniques have decisively transformed the writing, recognition, and promotions of every organization applying them. The practices in this book continue to positively impact the Air Force and sister services through professional military education. In addition, the concepts have helped transitioning service members and college students better communicate acquired capabilities and competencies on their résumés. Read on to discover the "magic" and open your eyes to a brand new way to look at writing. The US Air Force promotion

system emphasizes the importance of documenting your very best accomplishments. Under this system, promotion comes from the most recent performance reports, so Airmen must communicate the best accomplishments and not just words that fill the white space. This Magic of Bullet Writing will ensure you know how to articulate not just what you are doing but also convey your strongest competencies and capabilities so the promotion board can fully assess your readiness for promotion. Training materials that correspond to the lessons in this book are available for free download at <http://www.brownbaglessons.com>. Are you ready for the magic?

The privilege of commanding an Air Force squadron, despite its heavy responsibilities and unrelenting challenges, represents for many Air Force officers the high point of their careers. It is service as a squadron commander that accords true command authority for the first time. The authority, used consistently and wisely, provides a foundation for command. As with the officer's commission itself, command authority is granted to those who have earned it, both by performance and a revealed capacity for the demands of total responsibility. But once granted, it much be revalidated every day. So as one assumes squadron command, bringing years of experience and proven record to join with this new authority, one might still need a little practical help to success with the tasks of command. This book offers such help. "Commanding an Air Force Squadron" brings unique and welcome material to a subject other books have addressed. It is rich in practical, useful, down-to-earth advice from officers who have recently experienced squadron command. The author does

not quote regulations, parrot doctrine, or paraphrase the abstractions that lace the pages of so many books about leadership. Nor does he puff throughout the manuscript about how he did it. Rather, he presents a digest of practical wisdom based on real-world experience drawn from the reflection of many former commanders from any different types of units. He addresses all Air Force squadron commanders, rated and nonrated, in all sorts of missions worldwide. Please also see a follow up to this book entitled "Commanding an Air Force Squadron in the Twenty-First Century (2003)" by Jeffrey F. Smith, Lieutenant Colonel, USAF.

The 12th- and 13th-century early Gothic churches from the region around Paris which form the basis of this study were large-scale undertakings. Dr James draws on evidence which suggests that work proceeded in a series of projects, when funding, technical problems (for example, slow-setting mortar), and the work of other trades (such as roofing and centring) allowed. Within each project there were generally a number of separately organised phases, or 'campaigns', and it is from close study of these campaigns that the author proceeds to an identification of the characteristics of the individual master masons, the template-makers.

The Tongue and Quill has been a valued Air Force resource for decades and many Airmen from our Total Force of uniformed and civilian members have contributed their talents to various editions over the years. This revision is built upon the foundation

of governing directives and user's inputs from the unit level all the way up to Headquarters Air Force. A small team of Total Force Airmen from the Air University, the United States Air Force Academy, Headquarters Air Education and Training Command (AETC), the Air Force Reserve Command (AFRC), Air National Guard (ANG), and Headquarters Air Force compiled inputs from the field and rebuilt *The Tongue and Quill* to meet the needs of today's Airmen. The team put many hours into this effort over a span of almost two years to improve the content, relevance, and organization of material throughout this handbook. As the final files go to press it is the desire of *The Tongue and Quill* team to say thank you to every Airman who assisted in making this edition better; you have our sincere appreciation!

Interest in non-canonically case-marked subjects has been unceasing since the groundbreaking work of Andrews and Masica in the late 70's who were the first to document the existence of syntactic subjects in another morphological case than the nominative. Their research was focused on Icelandic and South-Asian languages, respectively, and since then, oblique subjects have been reported for language after language throughout the world. This newfangled recognition of the concept of oblique subjects at the time was followed by discussions of the role and validity of subject tests, discussions of the verbal semantics involved, as well as discussions of the theoretical implications of this case marking strategy of syntactic subjects. This volume contributes to all these debates, making available research articles on different languages and language families, additionally

highlighting issues like language contact, differential subject marking and the origin of oblique subjects.

"Jeffrey Smith updates the earlier release of Col Timothy T. Timmon's *Commanding an Air Force Squadron* (1993). In this book, which includes a foreword by Gen John P. Jumper and an introduction by Colonel Timmons, USAF, retired, Colonel Smith relies on the vast "insights, experiences, and recommendations" of former and current commanders to identify the attributes of a successful commander at multiple levels. He identifies some issues commanders face regardless of the level of command, including counseling personnel, dorm inspections, commanders' calls, money management, and the roles of spouses and families. According to Colonel Smith, the conduct of individuals in times of crises is the truest barometer of a good commander."--Publisher website.

This completely updated and expanded second edition stands as a comprehensive knowledgebase on both the fundamentals and applications of this important materials processing method. The diverse, international team of contributing authors of this reference clarify in extensive detail properties and applications of

sol-gel science and technology as it pertains to the production of substances, active and non-active, including optical, electronic, chemical, sensor, bio- and structural materials. Essential to a wide range of manufacturing industries, the compilation divides into the three complementary sections: Sol-Gel Processing, devoted to general aspects of processing and recently developed materials such as organic-inorganic hybrids, photonic crystals, ferroelectric coatings, and photocatalysts; Characterization of Sol-Gel Materials and Products, presenting contributions that highlight the notion that useful materials are only produced when characterization is tied to processing, such as determination of structure by NMR, in-situ characterization of the sol-gel reaction process, determination of microstructure of oxide gels, characterization of porous structure of gels by the surface measurements, and characterization of organic-inorganic hybrid; and Applications of Sol-Gel Technology, covering applications such as the sol-gel method used in processing of bulk silica glasses, bulk porous gels prepared by sol-gel method, application of sol-gel method to fabrication of glass and ceramic fibers, reflective and antireflective coating films, application of sol-gel method to formation of photocatalytic coating films, and application of sol-gel method to bioactive coating films. The comprehensive scope and integrated treatment of topics make this reference volume ideal for R&D scientists and engineers across a wide range of disciplines and professional interests.

The Air Force Law Review John Benjamins Publishing Company Ke-ra-me-ja is a woman's name that appears on a Linear B tablet from Knossos. It means "potter" (Κεράμεια, from Greek κέραμος, "potter's clay") and combines two major strands of Cynthia

Shelmerdine's scholarly pursuits: Mycenaean ceramics and Linear B texts. It thereby signals her pioneering use of archaeological and textual data in a sophisticated and integrated way. The intellectual content of the essays presented to her in this volume demonstrate not only that her research has had a wide-ranging influence, but also that it is a model of scholarship to be emulated.

Cross-Cultural Skills for Deployed Air Force Personnel: Defining Cross-Cultural Performance YOUTH COMPETITION TIMES

Air Force leadership recognizes that the cross-cultural performance of Air Force members now plays a greater role in mission success than ever before. The Air Force therefore asked RAND to assist in developing a comprehensive program for preparing members of the Air Force in cross-cultural skills. RAND researchers responded by first creating a taxonomy covering all behaviors relevant to cross-cultural performance after a review of the literature and discussions with Air Force personnel. From this taxonomy, the researchers developed a framework of 14 categories of cross-cultural behaviors: 9 categories of enabling behaviors and 5 categories of goal-oriented behaviors. Enabling behaviors help facilitate a variety of day-to-day activities and are likely to be needed in a variety of jobs. These categories are foreign language skills; verbal and nonverbal communication skills; social etiquette skills; stress management in unfamiliar cultural settings; behavior change to fit the cultural context; gathering and interpreting observed information; applying regional knowledge; self-initiated learning; and respecting cultural differences. Goal-oriented behaviors are associated with specific mission-related activities and are likely to be needed only

by individuals working in certain Air Force Specialty Codes (AFSCs). These categories are establishing authority; influencing others; negotiating with others; establishing credibility, trust, and respect; and resolving conflict. The importance of the 14 behavior categories for deployed performance was evaluated by surveying approximately 21,000 previously deployed airmen. Respondents also were asked to indicate how much training they had received. Recommendations for the design of a comprehensive program of cross-cultural training and education were made based on extensive analyses of the results, which included determining whether training needs differed by AFSC, grade (enlisted/officer), and deployment location.

Does the identification number 60 indicate a toxic substance or a flammable solid, in the molten state at an elevated temperature? Does the identification number 1035 indicate ethane or butane? What is the difference between natural gas transmission pipelines and natural gas distribution pipelines? If you came upon an overturned truck on the highway that was leaking, would you be able to identify if it was hazardous and know what steps to take? Questions like these and more are answered in the Emergency

Response Guidebook. Learn how to identify symbols for and vehicles carrying toxic, flammable, explosive, radioactive, or otherwise harmful substances and how to respond once an incident involving those substances has been identified. Always be prepared in situations that are unfamiliar and dangerous and know how to rectify them. Keeping this guide around at all times will ensure that, if you were to come upon a transportation situation involving hazardous substances or dangerous goods, you will be able to help keep others and yourself out of danger. With color-coded pages for quick and easy reference, this is the official manual used by first responders in the United States and Canada for transportation incidents involving dangerous goods or hazardous materials.
