 Caricatures demand the same skill and sense of proportion that realistic figures do. This is particularly true of carving heads, which can easily become grotesque looking if certain rules are not followed. This book takes you step-by-step through the process of carving 33 projects, each illustrated with color photographs and precise captions. A gallery is included.

Chip Carving is the art of removing small sections of wood from a single piece of timber, usually to form geometric patterns. Finished pieces can be very intricate and complex but amazing results can be achieved surprisingly easily with the right guidance. Unlike many types of woodworking, chip carving requires very few tools, usually just two knives, and is a wonderful way too decorate

all manner of existing objects including boxes, plates and furniture. The author guides the reader through the process of creating 15 distinctive projects. The necessary stages are explained with the use of detailed step-by-step photographs and accompanying text. The author also explains how to go about planning and designing each project in preparation for the actual carving process.
