TYRESE HALLIE

Ahcnsy306 Ahcpcm306 This unit of competency describes the skills and knowledge required to identify client issues or requirements, identify the preferred solution, and provide information and solutions to clients. Ahcpcm204 This unit of competency describes the skills and knowledge required to recognise commonly encountered plants, including desired species and weeds, and to document and confirm plant identification. The unit applies to individuals who recognise plants under general supervision with limited autonomy or accountability. Ahcfau202 This unit of competency describes the skills and knowledge required to observe, recognise and record fauna that are encountered when undertaking agricultural, horticultural and land management activities. The unit applies to individuals working in a broad range of job contexts who undertake defined routine activities under supervision. They exercise limited autonomy within established and well-known parameters, providing solutions to a limited range of predictable problems. CHCCS502C Ahcnsy207 This unit of competency describes the skills and knowledge required to prepare for plant propagation, assist with plant propagation and complete propagation activities. Ahcnsy205 This unit of competency describes the skills and knowledge required to pot up established plants with developed root systems, including preparing and potting up propagated plants and completing potting

up operations. The unit applies to individuals who pot up plants under general supervision with limited autonomy or accountability. Ahcber301 This unit of competency covers the skills and knowledge required to work effectively within own area of responsibility while responding to an emergency disease or plant pest incursion. Ahctrf301 This unit of competency describes the skills and knowledge required to construct soil profiles for the establishment of high-performance sports and recreational turf surfaces. It applies to the construction of turf playing surfaces in new projects and to the complete renovation of existing soil profiles in sporting, commercial and public recreational open spaces such as golf greens and tees, cricket pitches and other turfed sporting surfaces. Ahcpgd305 This unit of competency describes the skills and knowledge required to inspect park or recreational facilities to identify hazards, existing and potential risks and non-conformities with Australian Standards and workplace health and safety requirements. Ahcwrk305 This unit of competency describes the skills and knowledge required to coordinate work site activities for small scale projects. This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources. AHCWRK209 This unit of competency describes the skills and knowledge required to follow workplace procedures and instructions and to participate in environmentally sustainable work practices. Ahcnsy306 This unit of

competency describes the skills and knowledge required to implement a propagation plan for a range of plants using a range of different propagation methods. AHCPCM301 This unit of competency describes the skills and knowledge required to monitor and control the nutritional requirements of and applications to plants across a range of situations and environments. It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures. Ahcbsu407 This unit of competency describes the skills and knowledge required to cost a project, including establishing and documenting costs for materials, resources, services, consultants and contractors. This unit applies to supervisors and managers who establish and oversee projects to the best financial advantage of the enterprise. In this role, individuals take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems. All work must be carried out to comply with organisational requirements, work health and safety legislation and codes, sustainability practices and in consultation with the management team. Ahcchm405 This unit of competency describes the skills and knowledge required to assess and control the risks associated with chemical use and to plan and implement a program for chemical use. The unit applies to individuals who take responsibility for their own work and provide direction to others. All work must

be carried out to comply with workplace procedures, in accordance with applicable state/territory health and safety in the workplace, pesticide and environmental legislation and codes of practice.

Ahcpmg301 This unit of competency describes the skills and knowledge required to plan and coordinate weed control activities using appropriate strategies to provide effective, economic control while minimising environmental damage. The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

Ahcsol203 This unit of competency describes the skills and knowledge required to assist with the sampling and testing of soil or growing media, including collecting soil or media samples, performing basic tests on soil or media samples, and completing sampling and testing activities. The unit applies to individuals who assist with soil or growing media sampling and testing under general supervision with limited autonomy or accountability.

Ahcnsy201 This unit of competency describes the skills and knowledge required to transplant established plants with developed root systems.

Ahcchm304 This unit of competency describes the skills and knowledge required to safely handle, transport and store chemicals.

Ahcpcm306

Ahcpmg301

This unit of competency describes the skills and knowledge required to monitor and control the nutritional requirements of and applications to plants across a range of situations and environments. It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

CHCCS502C

This unit of competency covers the skills and knowledge required to work effectively within own area of responsibility while responding to an emergency disease or plant pest incursion. This unit of competency describes the skills and knowledge required to transplant established plants with developed root systems.

AHCPCM301

This unit of competency describes the skills and knowledge required to safely handle, transport and store chemicals.

Ahcfau202

This unit of competency describes the

skills and knowledge required to recognise commonly encountered plants, including desired species and weeds, and to document and confirm plant identification. The unit applies to individuals who recognise plants under general supervision with limited autonomy or accountability.

Ahcnsy205

This unit of competency describes the skills and knowledge required to coordinate work site activities for small scale projects. This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources.

Ahcbus407

This unit of competency describes the skills and knowledge required to assist with the sampling and testing of soil or growing media, including collecting soil or media samples, performing basic tests on soil or media samples, and completing sampling and testing activities. The unit applies to individuals who assist with soil or growing media sampling and testing under general supervision with limited autonomy or accountability.

Ahcnsy201

This unit of competency describes the skills and knowledge required to implement a propagation plan for a range of plants using a range of different propagation methods.

Ahcpgd305

This unit of competency describes the skills and knowledge required to assess and control the risks associated with chemical use and to plan and implement a program for chemical use. The unit applies to individuals who take responsibility for their own work and provide direction to others. All work must be carried out to comply with workplace procedures, in accordance with applicable state/territory health and safety in the workplace, pesticide and environmental legislation and codes of practice.

Ahcchm304

This unit of competency describes the skills and knowledge required to prepare for plant propagation, assist with plant propagation and complete propagation activities.

Ahcnsy207

This unit of competency describes the skills and knowledge required to inspect park or recreational facilities to identify hazards, existing and potential risks and non-conformities with Australian Standards and workplace health and safety requirements.

Ahctrf301

This unit of competency describes the skills and knowledge required to observe, recognise and record fauna that are encountered when undertaking agricultural, horticultural and land management activities. The unit applies to individuals working in a broad range of job contexts who undertake defined routine activities under supervision. They exercise limited autonomy within established and well-known parameters, providing solutions to a limited range of predictable problems.

Ahcsol203

This unit of competency describes the skills and knowledge required to follow workplace procedures and instructions and to participate in environmentally sustainable work practices.

Ahcwrk305

This unit of competency describes the skills and knowledge required to identify client issues or requirements, identify the preferred solution, and provide information and solutions to clients.

AHCWRK209

This unit of competency describes the skills and knowledge required to plan and coordinate weed control activities using appropriate strategies to provide effective, economic control while minimising environmental damage. The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

Ahcpcm306

This unit of competency describes the skills and knowledge required to construct soil profiles for the establishment of high-performance sports and recreational turf surfaces. It applies to the construction of turf playing surfaces in new projects and to the complete renovation of existing soil profiles in sporting, commercial and public recreational open spaces such as golf greens and tees, cricket pitches and other turfed sporting surfaces.

Ahcchm405

This unit of competency describes the skills and knowledge required to cost a project, including establishing and documenting costs for materials, resources, services, consultants and contractors. This unit applies to supervisors and managers who establish and oversee projects to the best financial advantage of the enterprise. In this role, individuals take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems. All work must be

carried out to comply with organisational requirements, work health and safety legislation and codes, sustainability practices and in consultation with the management team.

Ahcber301

This unit of competency describes the skills and knowledge required to pot up established plants with developed root systems, including preparing and potting up propagated plants and completing

potting up operations. The unit applies to individuals who pot up plants under general supervision with limited autonomy or accountability.
