This book is an entirely new work rather than a revision of Lyndsay Langwill's sixth edition. It is the standard work in its field, the most comprehensive work on wind instrument makers in any language and a major reference tool for collectors and researchers. Some features of the New Langwill Index are: Entries for nearly 6500 makers and inventors, active from the beginning until the middle of the 20th century; Nearly 400 representations of maker's marks; An index of makers under workplace, listing over 1000 localities; A comprehensive bibliography of over 600 titles. - Publisher.

Part 2 of Play Guitar requires only a little knowledge of musical basics at the start and can be used parallel with Part 1 after only a short time. Contained here are newly arranged and composed materials in a wide variety of styles. Also included are many advanced playing techniques, such as slurring, position playing, barre, harmonics and pizzicato; all are explained in numerous illustrations. There is also a complementary chapter on guitar percussion, expanded song accompaniment, rhythms, technical exercises, rasgueado, damping and an overview of chords. All pieces have been recorded live on the companion CD.

An impetuous street urchin with the slanted, yellowish eyes of a predator, a hardened peasant grandmother whose spirit remains unbroken by urban misery, a beautiful, insane Amazon with a horribly fascinating serpentine scar, an unemployed father turned sex-murderer, an animal trainer who loses control of his beasts at a critical moment, a doctor in charge of a ward in a mental institution, and the tiger -- these are central figures in a story that explores a variety of problems characteristic of modern existence: alienation, moral degeneration, mental and spiritual decay, the collapse of the family, the timeless conflicts between male and female, parent and child, nature and civilisation. The Bengal Tiger describes a small boy's search for love, acceptance, and security in a hostile environment.

On the Threshold of Beauty' is an exciting and detailed reconstruction of the emergence of electronic music in the Netherlands. Author Kees Tazelaar, composer and head of the Institute of Sonology at the Royal Conservatoire in The Hague, grippingly relates its turbulent history from the earliest beginnings. This history begins around 1930 with the studio of the Philips Physics Laboratory

and the plans for the Philips pavilion at Expo 58 in Brussels. The goal was a light and sound demonstration for the general public, but the involvement of Le Corbusier, Iannis Xenakis and Edgard Varèse gave this project a highly avant-garde turn. The result, *Poème électronique*, was considered by many to be much more experimental than the music of the research laboratory. In 1960 Philips divested itself of the studio. It was absorbed into a new studio at Utrecht University, where Gottfried Michael Koenig became artistic director in 1964. Tazelaar also looks in detail at the influence wielded by the Contact Organization for Electronic Music during this period. -- Publisher.

A volume of poems concerned with intimacy and wholeness, and with history and how the world endures it—from the Pulitzer Prize-winning author and “one of the greatest poets of our age ... the Thoreau of our era” (Edward Hirsch). A literary event—a new volume of poems by one of the masters of modern poetry—*The Rain in the Trees* is W. S. Merwin's first book since the publication of his *Opening the Hand*. Almost no other poet of our time has been able to voice in so subtle a fashion such a profound series of comments on the passing of history over the contemporary scene. To do this, he seems to have reinvented the poem—so that the experience of reading Merwin is unlike the reading of any other poetry. In such famous books as *The Lice*, *The Moving Target* and (most recently) *Opening the Hand*, he has produced a body of work of great profundity and power made from the simplest and most beautiful poetic speech. Merwin can now rightfully be called a master, and this book shows in every way why this is the case.

This collection of Applied Improvisation stories and strategies draws back the curtain on an exciting, innovative, growing field of practice and research that is changing the way people lead, create, and collaborate. Applied Improvisation is the umbrella term widely used to denote the application of improvised theatre's theories, tenets, games, techniques, and exercises beyond conventional theatre spaces, to foster the growth and/or development of flexible structures, new mindsets, and a range of inter and intra-personal skills required in today's volatile and uncertain world. This edited collection offers one of the first surveys of the range of practice, featuring 12 in-depth case studies by leading Applied Improvisation practitioners and a foreword by Phelim McDermott and Lee Simpson. The contributors in this anthology are professional Applied Improvisation facilitators working in sectors as diverse as business, social science, theatre, education, law, and government. All have experienced the power of improvisation, have a driving need to share those experiences, and are united in the belief that improvisation can positively transform just about all human activity. Each contributor describes their practice, integrates feedback from clients, and includes a workbook component outlining some of the exercises used in their case study to give facilitators and students a model for their own application. This book will serve as a valuable resource for both experienced and new Applied Improvisation facilitators seeking to develop leaders and to build resilient communities, innovative teams, and vibrant organizations. For theatre practitioners, educators, and students, it opens up a new realm of practice and work.

The fascinating story of a hugely popular instrument, detailing its rich and varied history from the Middle Ages to the present The recorder is perhaps best known today for its educational role. Although it is frequently regarded as a stepping-stone on the path toward higher musical pursuits, this role is just one recent facet of the recorder's fascinating history--which spans professional and amateur music-making since the Middle Ages. In this new addition to the Yale Musical Instrument Series, David Lasocki and Robert Ehrlich trace the evolution of the recorder. Emerging from a variety of flutes played by fourteenth-century soldiers, shepherds, and watchmen, the recorder swiftly became an artistic instrument for courtly and city minstrels. Featured in music by the greatest Baroque composers, including Bach and Handel, in the twentieth century it played a vital role in the

Early Music Revival and achieved international popularity and notoriety in mass education. Overall, Lasocki and Ehrlich make a case for the recorder being surprisingly present, and significant, throughout Western music history.

Die Musik in Geschichte und Gegenwart Рипол Классик

(Piano Solo Songbook). "I think there is a similarity between the infinite big and the infinite smallness of everything," says Yann Tiersen. "It's the same experiment looking through a microscope as it is a telescope." Named after a chapel in a small village on the island of Ushant, Kerber marks a new chapter in critically-acclaimed composer Yann Tiersen's career. A chapter still true to Tiersen's nuanced and subtle approach but one that sets out with his most overtly electronic material to date. Beautifully textured, highly immersive and thoughtfully constructed, Tiersen creates an electronic world, providing an environment in which the piano source exists. A sense of place has often been a central theme in Tiersen's work and here that is no different. Each track is tied to a place mapping out the immediate landscape that surrounds Tiersen's home, linking back to his thoughts on the possibilities of the infinite smallness. This official, exclusive folio is beautifully printed on high-quality, uncoated paper with striking graphic artwork. All seven pieces are presented for solo piano and follow an exclusive introduction to the project.

Linnaeus, the Swedish taxonomist, was wrong when he named our species Homo sapiens, i.e. wise man. We are not. We do too many senseless, destructive and irresponsible things to deserve that label. Actually, we need to be educated. Fortunately, we can be educated. We can transform ourselves. We are Homo educandus. Sadly, our current school system is broken. In fact, it does not support education. It deforms. This is what Jan Bransen claims in this book. He convincingly argues that our current school system is based on incoherent ideas, among which the notions that people need to study for years on end before they are ready to take part in our society, or that students learn because teachers teach. We can do better than that. In the second part of the book, Bransen points out that we have reasons to be confident and enthusiastic. We can improve our education system. Applying a dramaturgical analysis of human action, Bransen explains what socialization should look like in primary education, how our personal development can be supported in secondary education and how qualification can be organized in dual tracks in higher education, integrating learning, working and living over our course of life.
