This book studies a range of legal systems and compares them on their ability to deal with psychosocial risks at work. The book looks at

prevention of psychosocial risks from a labor law perspective and at compensation and reparation from a social security law perspective. It pays special attention to the topic of bullying in the work place, which is currently the subject of most legal summons. This book presents the views on the subject from leading national and

international experts and provides an in-depth coverage of legal systems used in Southern and Northern European countries, as well as Canada and Japan to deal with this topic. The topic of psychosocial risks at work has received much attention recently, both from the general public, the press, and those working in the legal

arena. It is difficult for lawyers to deal with the issue of psychosocial risks at work due to the multifactorial and subjective features involved.

“You did nothing.” Christine Steinmeyer thought the anonymous suicide note she found in her mailbox on Christmas Eve wasn’t meant for her. But the man calling in to her radio show seems convinced otherwise. “You

let her die. . . .” That’s only the beginning. Bit by bit, her life is turned upside down. But who among her friends and family hates her enough to want to destroy her? And why? It’s as if someone has taken over her life, and everything holding it together starts to crumble. Soon all that is left is an unimaginable nightmare. Martin Servaz is on leave in a clinic for depressed cops, haunted by his childhood sweetheart Marianne’s kidnapping by his nemesis, the psychopath

Julian Hirtmann. One day, he receives a key card to a hotel room in the mail—the room where an artist committed suicide a year earlier. Someone wants him to get back to work, which he’s more than ready to do, despite his mandatory sick leave. Servaz soon uncovers evidence of a truly terrifying crime. Could someone really be cruelly, consciously hounding women to death? What if the people closest to us are not what they seem? What happens when someone takes control of

your life and your relationships? And what is hiding in the darkness? In Bernard Minier's Don't Turn Out the Lights, you won't see who's coming after you.

Comment diagnostiquer une situation de harcèlement moral, puis accompagner et soigner les victimes ? Les thérapeutes font face à une demande croissante de prise en charge de patients se trouvant sous l'emprise d'un collègue,

d'un parent ou encore d'un conjoint. Ils doivent donc acquérir de nouvelles compétences spécifiques indispensables.

L'originalité de ce manuel réside dans le fait qu'il met à disposition du lecteur des outils inédits et éprouvés : • un modèle théorique de compréhension du phénomène ; • une analyse fonctionnelle ; • des questionnaires. Cet ouvrage, conçu dans une approche très pratique, répond aux besoins du praticien et enrichit ses

compétences. De nombreux cas cliniques sont présentés et illustrés. Le professionnel est ainsi guidé pas à pas dans sa prise en charge, sur trois grands axes : • l'accompagnement vers une prise de conscience claire de la situation ; • la mise en place d'une protection psychologique et émotionnelle ; • le traitement du traumatisme et l'aide à la reconstruction.

*Décrypter le harcèlement moral* Larousse

Through the first half of the twentieth century, emotions were a legitimate object of

scientific study across a variety of disciplines. After 1945, however, in the wake of Nazi irrationalism, emotions became increasingly marginalized and postwar rationalism took central stage. Emotion remained on the scene of scientific and popular study but largely at the fringes as a behavioral reflex, or as a concern of the private sphere. So why, by the 1960s, had the study of emotions returned to the forefront of academic investigation? In *Science and Emotions after 1945*,

Frank Biess and Daniel M. Gross chronicle the curious resurgence of emotion studies and show that it was fueled by two very different sources: social movements of the 1960s and brain science. A central claim of the book is that the relatively recent neuroscientific study of emotion did not initiate - but instead consolidated - the emotional turn by clearing the ground for multidisciplinary work on the emotions. *Science and Emotions after 1945* tells the story of this shift by

looking closely at scientific disciplines in which the study of emotions has featured prominently, including medicine, psychiatry, neuroscience, and the social sciences, viewed in each case from a humanities perspective. [Comparative Law and Society](#) 50Minutes.com Based on groundbreaking research on the working conditions of airport check-in workers in two countries, a previously unstudied category of predominantly women workers, Ellen Roskam

describes a form of work characterized as modern-day Taylorism. An occupation greatly affected by new forms of work organization and management practices-caught in the throes of rapid change due to international competition, alliances, mergers, and the application of cost-efficiency strategies-check-in work has been undermined in recent years by the adverse effects of liberalization and technological change. By peeling away the veneer of glamour

associated with airport check-in work, Roskam reveals how changes in work organization in this sector have de-skilled, disempowered, and ultimately demoralized workers. In "Excess Baggage", weaving through the psychological distress, physical pain from musculoskeletal disorders, strain, and violence that check-in workers experience and describe in their own words, a picture emerges of a job perceived to be "safe," "clean," "glamour girl" work, but which is

comparable to industrial workplaces that require heavy manual lifting, obligingly performed in skirts, dresses, and pretty little shoes.

*Negotiating Boundaries? Identities, Sexualities, Diversities* Edward Elgar Publishing

Publié en 1998, le livre de Marie-France Hirigoyen, *Le harcèlement moral, la violence perverse au quotidien*, a rencontré un succès considérable et... inattendu : ce succès a révélé un phénomène de société dont on ignorait jusque-là l'ampleur dans

le monde du travail. On connaît la suite : la déferlante des témoignages, l'incroyable médiatisation des "affaires" de harcèlement tant dans le privé que dans le public, les débats entre professionnels (médecins du travail, inspecteurs, syndicalistes, juristes, chefs d'entreprise), la création d'associations, les nombreux colloques organisés sur le thème, et enfin le projet de loi soumis par le groupe communiste à l'Assemblée nationale. Le

harcèlement moral fait aujourd'hui débat et une mise au point s'imposait. Prenant appui sur une enquête menée auprès des centaines de personnes qui lui ont adressé des témoignages écrits, Marie-France Hirigoyen affine ici son analyse et précise la notion, pour éviter que le terme soit utilisé abusivement et à contresens. Y a-t-il une spécificité de la victime ? Un profil de l'agresseur ? Des cas de fausses allégations ? Comment démêler le vrai du faux ?

Qu'est-ce qui n'est pas du harcèlement moral ? Comment repérer ce qui en est ? Quels contextes de travail favorisent les procédés pervers ? Ce livre, nourri de nombreux cas concrets, répond avec précision à ces questions, sans esquiver la complexité des situations. Enfin, convaincue que l'organisation du travail est une donnée nécessaire mais pas suffisante pour expliquer le phénomène, l'auteur consacre la dernière partie du livre à la prévention sur le lieu de

travail et auprès des professionnels, en redonnant un sens fort à l'éthique et à la responsabilité individuelle. Un livre indispensable pour tous ceux qui sont concernés directement ou indirectement par le harcèlement moral. Overcoming Manipulation at Work Charles C Thomas Publisher Comparative Law and Society, part of the Research Handbooks in Comparative Law series, is a pioneering volume that comprises 19 original

essays written by expert authors from across the world. This innovative handbook offers both a history of the field of comparative law and society and a thorough exploration of its methods, disciplines, and major issues, presenting the most comprehensive look into this contemporary field to date. In Part I, Methods and Disciplines, contributors approach critical issues in comparative law and society from a variety of academic fields, including

sociology, criminology, anthropology, economics, political science, and psychology. This multidisciplinary approach highlights the importance of addressing the variance of perspectives inherent to the field. In Part II, Core Issues, chapters offer an exploration of major legal institutions, processes, professionals, and cultures associated with particular legal subjects. Since authors utilize the perspective of at least two different legal systems, this book offers a truly thorough and wide-

ranging focus. The general reader, as well as students and scholars, will find this handbook useful in their continuing explorations into the interaction between law and society. Practitioners such as lawyers and judges with an interest in global perspectives of law will also find much to admire in this innovative volume.

La harcèlement moral au travail n'est pas réservé

aux entreprises privées. Cela frappe aussi le personnel de la fonction publique en France. On ne le dit pas assez. L'auteur raconte ici son histoire et nous livre le détail de sa descente aux enfers à cause de la violence humaine et institutionnelle après 32 années de carrière dans le monde hospitalier, d'abord à cause d'un directeur d'Institut de Formation en Soins Infirmiers qui avait peur qu'il prenne sa place, et ensuite pour avoir osé dénoncer des

agissements  
condamnables de la  
directrice par intérim qui  
remplacera ce dernier.  
Soucieux de vérité, il nous  
fait vivre pas à pas son  
chemin de croix en fin de  
carrière, suivi de la  
découverte étonnante  
d'une justice qui va le  
décevoir. Une de ses  
anciennes étudiantes lui  
écrivra : "Soyez vraiment  
fier de votre parcours.  
Que les personnes qui ont  
cherché à faire douter de  
votre droiture se cachent.  
Je suis heureuse et fière  
de vous connaître et de  
vous avoir connu en tant

que formateur puis en  
tant que personne  
humaine. Soyez fier de ce  
que vous avez accompli.  
Je vous tire ma révérence  
pour ce que vous avez pu  
endurer et malgré tout  
aller jusqu'au bout."

Labour: A Heterodox  
Approach provides a  
theoretical reconstruction  
of the labour and job  
market by examining it in  
a rich historical context. It  
explores the fundamental  
implications of the  
theories of consumption  
and growth and aims at

solving the difficulties  
raised by the dominant  
economic theories  
(neoclassical, Keynesian,  
supply side) by taking into  
account the dimension of  
the historical conflict of  
the labour market and the  
public intervention that  
results from it, such as  
the construction of a  
specific legal framework  
that is to say, labour law.  
The work focuses on  
providing a description of  
conflict and intervention,  
the market's leading  
characteristics, and  
demonstrates that they  
can be interpreted by

introducing two major remedial hypotheses in economic fundamentals. It also contributes to solving several theoretical controversies and highlights the two main perspectives on the economic regulation of the labour market.

La harcèlement moral et la violence psychologique précèdent la violence physique. Des personnalités complexes, souvent appelées pervers narcissiques, sont les auteurs de ces violences

invisibles. Quelles stratégies la loi nous permet-elle de mettre en oeuvre pour les démasquer ? Dans la seconde édition de ce livre revisité, l'auteur fait le point sur les dernières avancées de la loi et de la jurisprudence dans ce domaine. Il s'adresse aux victimes, aux juristes, acteurs médicaux et sociaux.

Popular music and masculinity have rarely

been examined through the lens of research into monstrosity. The discourses associated with rock and pop, however, actually include more 'monsters' than might at first be imagined. Attention to such individuals and cultures can say things about the operation of genre and gender, myth and meaning. Indeed, monstrosity has recently become a growing focus of cultural theory. This is in part because monsters raise shared concerns about transgression,

subjectivity, agency, and community. Attention to monstrosity evokes both the spectre of projection (which invokes familial trauma and psychoanalysis) and shared anxieties (that in turn reflect ideologies and beliefs). By pursuing a series of insightful case studies, *Scary Monsters* considers different aspects of the connection between music, gender and monstrosity. Its argument is that attention to monstrosity provides a unique perspective on the study of masculinity in

popular music culture. *Working Women, 1800-2017* Bloomsbury Publishing USA

In recent years there has been considerable interest in emotional intelligence. Drawing upon a rich theoretical and philosophical tradition, the author explains the concept and process of emotional production and how this works in gratifying, aversive and hierarchical situations as well as irreversible situations and situations of failure and success. This will provide a powerful framework for understanding the

importance of emotional logic in relation to decision making and self-management and includes a number of compelling case studies.

**Personas altamente sensibles** Cambridge Scholars Publishing *Negotiating Boundaries: Identities, Sexualities, Diversities* is a collection of essays by contributors from—and/or on—societies across the world: Bosnia-Herzegovina, Croatia, France, Iran, The Netherlands, New Zealand, Poland, South

and West Africa, the UK and the USA. They are from a range of academic disciplines—English Literature, Islamic and Middle Eastern Studies, Literary and Cultural Studies, Modern Languages, Religious Studies, Social Anthropology, Social Policy, Sociology and Theology. This level of diversity has resulted in the most wide-ranging volume ever published in the social sciences and humanities around the concept of "Boundaries". The book is at the cutting

edge of intellectual thinking on personal and social "boundaries" applied to such areas as: Art, Genocidal Rape, Identities, God/Godde, Lesbianism, Literature, Men in "Women's Professions", Muslim women in Muslim and non-Muslim countries, Nationalism and Symbolism, Poetry, Religion, Sexual Harassment, Sexuality, Women in Science, Transgenderism, Virginity Testing and War. This range of contributors, locations and topics could

have resulted in an incoherent volume with appeal to only a somewhat esoteric readership. However, the skilful use of the concept of "Boundaries" not only gives this book structured coherence, but makes it important reading for a wide range of academics, theorists and researchers in a diversity of disciplines. "This is a lively, engaged, nuanced portrayal of the struggles around identity, inequality and domination. Ambitious in its scope - international,

interdisciplinary and multi-dimensional in its social focus, *Identities, Sexualities, Diversities* offers a powerful picture of struggle and the pursuit of change, through the conceptual lens of boundaries. This collection explores the diverse ways boundaries operate, bringing new insights and questions to an established debate. It also, importantly, explores how boundaries can provide bridges. Thus, through its interweaving of theory and empirical analysis, and through its

stories of bodies, texts, work, sexual expression, self-presentation, and changing values, *Identities, Sexualities, Diversities* offers a text that is reflexive, analytically thoughtful, and, significantly, hopeful." —Davina Cooper, Professor of Law and Political Theory, Director of AHRC Research Centre for Law, Gender and Sexuality, Kent Law School, University of Kent "This is a fascinating collection of papers that provides new and important insights

into the variety and natures of boundaries around ethnicity, identity and sexuality. Using the complex concept of boundaries the writers explore identities, sexualities and diversities through boundary crossings, contested boundaries, oppressive boundaries and creative, resistant boundaries. This provides a wonderful, coherent engagement with some of the key struggles at the present time over contested territory at personal and global levels. The range of

articles ensures that these debates are contextualised in particular societies and cultures providing a rich source of theoretical material that helps our understandings of these complex and crucial issues. The theoretical rigour and fascinating insights presented in this edited book deserves a wide readership from those involved in the social sciences, women's studies, the humanities and all those interested in transgressing conventional boundaries

of scholarship". —Sheila Scraton, Pro-Vice Chancellor, Director of University Research, Professor of Leisure and Feminist Studies, Leeds Metropolitan University.

Ce livre décrit le naufrage personnel et professionnel par lequel les gens sont victimes de ce qu'on appelle le mobbing, ou psycho-terrorisme au travail, qui détruit la capacité de travail et la résilience psychologique de ceux qui le subissent. Tu as entre les mains un

guide d'auto-assistance pratique pour reconnaître le problème et apprendre à l'identifier rapidement, en y répondant de manière proactive plutôt que réactive. Il décrit les façons dont les brimades se produisent, ainsi que les caractéristiques typiques présentées par les auteurs, en analysant les défenses et les rationalisations que les victimes développent généralement lorsqu'elles sont confrontées aux brimades et qui les empêchent de mettre en œuvre une réponse active

pour se sortir du problème.

This book examines how, over the past 300 years or so, women have adapted their work methods, means of subsistence and daily routine to fulfil their dual role as carers and breadwinners. From the industrial revolution, which ended agrarian-

based subsistence and meant an exodus towards the cities for many families, to the digital revolution, which redefined the work environment, working hours and even in some cases biological functions, women have succeeded in meeting the challenge of changing work practices, social expectations and economic and family needs. Although women's work, both past and present, is a much-researched area, this volume sheds new light on the subject by

combining the approach of historians, sociologists, and language and culture specialists, and applying it to different countries.

Drawing upon original fieldwork and little-known archives, the book will be of interest not only to an academic audience, but to anyone wanting to know more about gender, family, and labour issues across Europe between the 19th and 21st centuries.
