It is a book that shimmers with love, that invites slow reading, plowing through the emotions, the doubts, the powerless - without being sentimental. De Standaard --Book Jacket.

 This book describes a process framework for business information management: the Business Information Services Library (BiSL®) - a public domain standard that is consistent with the IT Infrastructure Library (ITIL) and Application Services Library (ASL). BiSL establishes a bridge between IT and business processes, and between business information administrators and information managers. The BiSL process model provides an insight into all of the primary processes within their field of operations and into the relationship between the various processes. It offers a starting point for the improvement of these processes using best practices, amongst other things, and it provides uniform terminology. This book explains BiSL, a process framework for business information management, encompassing the best way to manage and execute business information management in day-to-day practice, and explains how the framework BiSL can help to improve business processes and the alignment of business and IT. The Netherlands, like much of the world, is struggling to balance the development of natural resources like oil and coal with its commitment to environmental preservation. In the landmark study *Geology of the Netherlands*, a team of expert geologists presents an overview of the Low Countries' geology as well as contemporary problems the land faces. This lavishly illustrated volume examines the stratigraphy and structural setting of the Netherlands from the Pre-Silesian to the Quaternary eras; it will be an essential resource for geologists, engineers, and students.

How can a therapist help his or her clients and ensure that they continue to maintain the insights and motivations learned during therapy in everyday life, beyond termination? *Restoration Therapy* is a professional resource that introduces the reader to the essential elements of its namesake, and from there guides

clinicians to a systemic understanding of how certain forces lead to destructive cycles in relationships, which perpetuate more and more dysfunction among members. Clients and therapists both will understand issues more clearly, experience the impacts that emotion can have on insight, and practice the process so more loving and trustworthy relationships can take hold in the intergenerational family.

Fifteen-year-old Laurence Roach just wants a normal life, but it's not easy when your mum is a depressed alcoholic, and your six-year-old brother thinks he's a dog. When Mum fails to come home one night, Laurence tells nobody, terrified he and his brother will be taken into care if anyone finds out. Instead, he attempts to keep up the pretence that Mum is still around: dressing up in her clothes to trick the neighbours and spinning an increasingly complicated tangle of lies. After two weeks on their own, running out of food and money, and with suspicious adults closing in, Laurence finally discovers what happened to his mother. And that's when the trouble really starts . . . A compelling thriller filled with some hilarious and surreal moments. *Fifteen Days Without a Head* is a tender, honest story about family, forgiveness and hope.

Metropolitan Governance is the first book to bring together competing perspectives on the question and consequences of centralized vs. decentralized regional government. Presenting original contributions by some of the most notable names in the field of urban politics, this volume examines the organization of governments in metropolitan areas, and how that has an effect on both politics and policy. Existing work on metropolitan governments debates the consequences of interjurisdictional competition, but neglects the role of cooperation in a

decentralized system. Feiock and his contributors provide evidence that local governments successfully cooperate through a web of voluntary agreements and associations, and through collective choices of citizens. This kind of "institutional collective action" is the glue that holds institutionally fragmented communities together. The theory of institutional collective action developed here illustrates the dynamics of decentralized governance and identifies the various ways governments cooperate and compete. *Metropolitan Governance* provides insight into the central role that municipal governments play in the governance of metropolitan areas. It explores the theory of institutional collective action through empirical studies of land use decisions, economic development, regional partnerships, school choice, morality issues, and boundary change—among other issues. A one-of-a-kind, comprehensive analytical inquiry invaluable for students of political science, urban and regional planning, and public administration—as well as for scholars of urban affairs and urban politics and policymakers—*Metropolitan Governance* blazes new territory in the urban landscape.

Where did math come from? Who thought up all those algebra symbols, and why? What is the story behind π ? ... negative numbers? ... the metric system? ... quadratic equations? ... sine and cosine? ... logs? The 30 independent historical sketches in *Math through the Ages* answer these questions and many others in an informal, easygoing style that is accessible to teachers, students, and anyone who is curious about the history of mathematical ideas. Each sketch includes Questions and Projects to help you learn more about its topic and to see how the main ideas fit into the bigger picture of history. The 30 short stories are preceded by a 58-page bird's-eye overview of the entire panorama of mathematical history, a whirlwind tour of the most important people, events, and trends that shaped the mathematics we know today. "What to Read Next" and reading suggestions after each sketch provide starting points for readers who want to learn more. This book is ideal for a broad spectrum of audiences, including students in history of mathematics courses at the late high school or early college level, pre-service and in-service teachers, and anyone who just wants to know a little more about the origins of mathematics.

Earthly fathers are meant to be windows on the father heart of

God. Sadly, parenting can fall well short of this image. As a consequence we can have a poor interpretation of what God truly thinks of us and can spend our lives struggling with the symptoms of fear and insecurity. Today, more than ever, people have a love hunger which never seems satisfied, leading many searching in the wrong places to find fulfilment for their deep needs. One of the most defining aspects of Christianity, compared to other religions, is that God is also known as "Father." Jesus even instructs us to approach God this way through the Lord's Prayer. The revelation of the Father heart of God has for many been a major step on the road to true wholeness, and away from the anxiety of performance based striving to please God. As you move along the stepping stones described in this book, you will journey from a distorted self-image based on abandonment, neglect, rejection or abuse to an image based on the Word of God and revelation from the Holy Spirit - meaning you can finally remove your distance from God and experience the love and freedom there is to be had through a heavenly Father relationship.

The Rise and Fall of Human Rights provides a groundbreaking ethnographic investigation of the Palestinian human rights world—its NGOs, activists, and "victims," as well as their politics, training, and discourse—since 1979. Though human rights activity began as a means of struggle against the Israeli occupation, in failing to end the Israeli occupation, protect basic human rights, or establish an accountable Palestinian government, the human rights industry has become the object of cynicism for many Palestinians. But far from indicating apathy, such cynicism generates a productive critique of domestic politics and Western interventionism. This book illuminates the successes and failures of Palestinians' varied engagements with human rights in their quest for independence.
