Marketing for Attorneys and Law Firms presents timely topics which are well-researched and written by a fine array of authors from around the country. As attorneys are becoming more interested in marketing and how it can benefit their practices, this book is an important tool. It aids attorneys as they evaluate and improve old marketing strategies and create new marketing strategies where such advertising was neglected. It is an ideal readings text for today's attorney and legal consultants who wish to obtain a better insight into select aspects of marketing the law firm. This is the only readings book that focuses on these areas: applications of marketing planning, attorney selection by consumers, and client and provider attitudes toward legal services. Part Two thoroughly examines various aspects of how clients select and evaluate the performance of legal services. Today's attorneys must first fully understand what their clients perceive about their services before jumping into marketing their services. This section provides insight that most attorneys would normally not investigate and lays the groundwork for the development of marketing programs. Part Three addresses the wide use of legal advertising, and again provides insight into what clients and attorneys think and perceive about various forms of advertising the law firm. This provides a base from which attorneys who are planning to advertise may be able to prevent failure and promote a greater level of success for the advertising program. Applied mainly to private legal practices and clinics, some of the specific topics covered in the three sections include consumers' perceptions of attorneys and legal advertising; attorneys' perceptions of marketing and advertising; perceived risk in selecting an attorney and how consumers actually select attorneys; customer/client service attributes for attorneys; measuring the effectiveness of legal advertising; market planning and strategies for today's legal practice; promoting the legal practice; and developing referral and networking systems in legal practice. For attorneys in private practice, law firm libraries and administrators, law professors who specialize in practice development, consultants who concentrate in legal practice marketing, law school libraries, and marketing professors and consultants who teach or consult in the professional service sectors should read this invaluable reference book.

Once upon a time, virtually no one in the academy thought to sue over campus disputes, and, if they dared, judges bounced the case on grounds that it was no business of the courts. Not so today. As Amy Gajda shows in this witty yet troubling book, litigation is now common on campus, and perhaps even more commonly feared. This book explores the origins and causes of the litigation trend, its implications for academic freedom, and what lawyers, judges, and academics themselves can do to limit the potential damage.

Since their development more than three decades ago, lasers have become widely accepted as a valuable modality for treatment of cutaneous lesions. Today, many cosmetic surgeons commonly use laser techniques for a variety of procedures, with markedly improved results over traditional surgical methods. Propelled by technological advances, ongoing clinical progress, and the growing popularity of out-patient procedures, cosmetic laser surgery is a truly dynamic field. *Cosmetic Laser Surgery* is designed to serve as a much-needed, practical, and user-friendly guide to this expanding field. The book provides a summary of current uses of multiple lasers for a variety of cosmetic procedures, and offers expert guidance from leading specialists. Each chapter includes actual case studies with an in-depth background on each that details laser parameters and treatment protocols. The text features over 70 color photographs to illustrate the operative techniques and results of different procedures, and concludes with appendices providing detailed examples of referral letters, consent forms, and operative reports that can help physicians establish and run a viable cosmetic laser practice. Topics covered in this book include: Evaluation, installation, and marketing of a cosmetic laser practice Skin resurfacing with high-energy, pulsed carbon dioxide lasers Laser-assisted blepharoplasty and meloplasty Hair transplantation using laser techniques Laser-assisted uvulopalatoplasty for snoring Laser treatment for scars, telangiectasias, tattoos, and pigmented lesions The selectivity and precision of lasers make them excellent tools for cosmetic surgery, but only if used with a proper knowledge and understanding of their strengths and limitations. *Cosmetic Laser Surgery* provides detailed, specific guidance on making optimal use of various lasers. It is an authoritative and indispensable resource for all dermatologists, plastic surgeons, and otolaryngologists who employ lasers in their practices.

A specialist in questioned documents, Morris reviews the basic concepts of what affect people's writing, such as how they hold the pen; position the paper; move their fingers, hand, wrist; and so on. The examiner, he explains, should be able to visualize the movements of the writer, evaluate pen direction, and determine the significance of such factors as relative relationships between the various parts of writing and the influence of writing on paper with or without a pre-drawn base. This book is the second volume of an intensive "Russian-style" two-year undergraduate course in abstract algebra, and introduces readers to the basic algebraic structures - fields, rings, modules, algebras, groups, and categories - and explains the main principles of and methods for working with them. The course covers substantial areas of advanced combinatorics, geometry, linear and multilinear algebra, representation theory, category theory, commutative algebra, Galois theory, and algebraic geometry - topics that are often overlooked in standard undergraduate courses. This textbook is based on courses the author has conducted at the Independent University of Moscow and at the Faculty of Mathematics in the Higher School of Economics. The main content is complemented by a wealth of exercises for class discussion, some of which include comments and hints, as well as problems for independent study.
