Kozier and Erb's Fundamentals of Nursing prepares students for practice in a range of diverse clinical settings and help them understand what it means to be a competent professional nurse in the twenty-first century. This third Australian edition has once again undergone a rigorous review and writing process. Contemporary changes in the regulation of nursing are reflected in the chapters and the third edition continues to focus on the three core philosophies: Person-centred care, critical thinking and clinical reasoning and cultural safety. Students will develop the knowledge, critical thinking and clinical reasoning skills to deliver care for their patients in ways that signify respect, acceptance, empathy, connectedness, cultural sensitivity and genuine concern.

This review illustrates the significant progress made by the government of Mauritius in improving its investment climate in recent years. It highlights major initiatives and specific policy measures undertaken, as well as areas that need further reforms to attract more and better investment.

Strategic Plan National Academies Press

El Salvador has made significant development progress in the past 30 years. The end of the civil war in 1992 marked the establishment of a liberal democracy and an open export-led development model, which led to a reduction in poverty and inequality. However, with economic growth averaging a modest 2.4% in the years before the COVID-19 pandemic, and productivity growth of 0.1% over the past decade, the post-war model has not generated the economic momentum or the jobs that the country needs.

Strategic priorities for improving access to quality education in the Kurdistan Region--Iraq Springer Nature

According to Transforming Health Care Scheduling and Access,

long waits for treatment are a function of the disjointed manner in which most health systems have evolved to accommodate the needs and the desires of doctors and administrators, rather than those of patients. The result is a health care system that deploys its most valuable resource--highly trained personnel--inefficiently, leading to an unnecessary imbalance between the demand for appointments and the supply of open appointments. This study makes the case that by using the techniques of systems engineering, new approaches to management, and increased patient and family involvement, the current health care system can move forward to one with greater focus on the preferences of patients to provide convenient, efficient, and excellent health care without the need for costly investment. Transforming Health Care Scheduling and Access identifies best practices for making significant improvements in access and system-level change. This report makes recommendations for principles and practices to improve access by promoting efficient scheduling. This study will be a valuable resource for practitioners to progress toward a more patient-focused "How can we help you today?" culture.

Mystery School

In this book, we can read about new technologies that enhance training and performance; discover new, exciting ways to design and deliver content; and have access to proven strategies, practices and solutions shared by experts. The authors of this book come from all over the world; their ideas, studies, findings and experiences are beneficial contributions to enhance our knowledge in the field of e-learning. The book is divided into three sections, and their respective chapters refer to three macro areas. The first section of the book covers Instructional Design of E-learning, considering methodology and tools for designing e-learning environments and courseware. Also, there are examples of effective ways of gaming and educating. The second section is about Organizational Strategy and Management. The last section deals with the new Developments in E-learning Technology, emphasizing subjects like knowledge building by mobile e-learning systems, cloud computing and new proposals for virtual

learning environments/platforms.

Education Policy Outlook 2019 Working Together to Help Students Achieve their Potential OECD Publishing

This report analyses current trends of adaptation finance provided and mobilised by developed countries for developing countries. It explores potential action areas for international providers to scale up funding for climate change adaptation, including by unlocking the potential of the private sector.

A Patient-Centered Approach to Optimizing Ambulatory Access Springer

Improving access to care is a strategic priority for most academic health systems and a challenge for nearly all. To address that challenge, the AAMC and Vizient sought insights from ambulatory care leaders, physicians, and staff in academic medical centers whose organizations' access performance has been exemplary. This report presents a framework based on common themes that emerged among those high-performing organizations. Readers can use the framework to improve access in their own organizations by focusing on the following drivers: Engaged Leadership Structure and Standard Processes Actionable Data and Analytics Optimized Care Delivery Workforce Engagement Leverage Technology

Education in Afghanistan OECD Publishing

Taking the perspective of institutions and the system, Education Policy Outlook 2019: Working Together to Help Students Achieve their Potential, analyses the evolution of key education priorities and key education policies in 43 education systems. It compares more recent developments in education policy ecosystems (mainly between 2015 and 2019) with various education policies adopted between 2008 and 2014.

Islamic Republic of Mauritania WIPO

An in-depth quantitative analysis is undertaken in this paper to assist the Southern African Development Community (SADC) Secretariat, member countries, and development partners in setting future regional investment priorities for agricultural research and development in the SADC region. A primary goal of this work was to identify a range of agricultural research priorities for achieving sector productivity and overall economic growth in

southern Africa, at both the country and regional levels. This is accomplished by adopting an integrated modeling framework that combines a disaggregated spatial analytical model with an economywide multimarket model developed specifically for the region.

Department of Health and Human Services United Nations Kiribati is a small, low-lying island nation located in the central Pacific Ocean. It spans an area of approximately 3.5 million square kilometers and consists of 33 atolls and islands, with the majority of its land area located less than two meters above sea level. Due to its vulnerability to rising sea levels and the devastating impacts of climate change, Kiribati has been described as a bellwether for the impacts of global warming on low-lying island nations. The population of Kiribati is estimated to be around 119,500, with the majority of the population living on the main island of South Tarawa. Kiribati is a diverse nation, with a varied cultural heritage and a mix of Christianity and traditional beliefs. Its economy is largely based on subsistence agriculture and fishing, although the government has recently introduced policies aimed at attracting foreign investment and developing industries such as tourism and mining. Kiribati has also faced numerous challenges, including the loss of land to erosion, overfishing, and limited access to healthcare and education.

This book is an essential weapon for anyone looking for funding in the extremely competitive grantseeking world. It explains how and why to approach both public and private sponsors with not just information, but persuasion, for the best chance for success. How do you present the right balance of logic, emotion, and relationship-awareness to make a persuasive proposal? What is THE most important thing to do before submitting a proposal to increase your odds for funding success? What portion of the proposal must be stressed even when it has a low point value assigned to it in the reviewer's evaluation form? How can a site visit make or break the fate of a meticulously prepared application? *Models of Proposal Planning & Writing: Second Edition* answers all these critical questions and more for grantseekers, documenting how to write a proposal that will persuade a sponsor to invest in your projects and organization—and just as importantly, explaining why a properly persuasive application puts forth a seamless argument that stands the test of reason, addresses psychological concerns, and connects your project to the values of the sponsor. The book's comprehensive annotations provide practical information that walks readers step-by-step through a logical, integrated process of planning and writing persuasive proposals.

IEO and UNDP carried out an "Evaluation of the UNDP Strategic Plan, Global Programme, and Regional Programmes (2014-17)" with the purpose of strengthening UNDP accountability to global and national development partners, supporting the development of the next Strategic Plan, and supporting organizational learning. The evaluation was designed to inform both internal and external stakeholders of how UNDP is addressing development challenges.

The evaluation assessed the outcomes of the Strategic Plan, and the implementation of global, regional and country-level programming, to ascertain whether UNDP is making progress in achieving its stated goals, and whether the Strategic Plan, Global Programme, and Regional Programmes are serving as effective tools for organizing and guiding UNDP programming and activities.

Military Construction, Veterans Affairs, and Related Agencies Appropriations for 2014 National Academies Press

Taliban's return to power in August of 2021 caused everyone to ask why the two decades of institution building in Afghanistan failed. This book investigates the root causes of failed reforms in an important area of reform: trade and credit institutions. It explains why the efforts to reform and regulate the economic institutions in Afghanistan failed and what we can learn from their failure. It draws on more than eighty interviews with Afghan merchants, business leaders, money dealers, and government officials in five major provinces of Afghanistan to identify the barriers to access to credit and to understand the performance of formal institutions (banks) and their informal counterparts. This book finds that Afghan merchants were often unable to benefit from the offerings of formal institutions for three reasons: a highly volatile business climate, uncertain contract enforcement, and an unsupportive property rights system. Several informal institutions have emerged that alleviate some of the credit constraints on Afghan merchants. These informal institutions include risk-sharing trade credit operations, money dealers' short-term working capital loans, Gerawee, and Sar qufli. Although these informal institutions have helped Afghan merchants survive, they are unable to support economic growth. This book argues that countries like Afghanistan should solve their institutional dilemma by adopting an approach which the author calls "Grounded Institutional Reform." Using this approach, a country would formalize existing informal institutions, a development that would vastly increase their effectiveness. While this book focuses on credit and trade in Afghanistan, the analysis of "formalizing the informal" can easily be extended to solve other types of economic problems in similarly situated countries. This book should be of great interest to scholars, policymakers, and development workers in the field of law, finance, and development.
