Whose Time Is It?

Wipf and Stock

The dramatic human
story of an epic
scientific quest and of

one man's forty-year
obsession to find a
solution to the
thorniest scientific
dilemma of the day--
"the longitude
problem." Anyone alive
in the eighteenth
century would have
known that "the
longitude problem"
was the thorniest
scientific dilemma of
the day-and had been
for centuries. Lacking
the ability to measure
their longitude, sailors
throughout the great
ages of exploration had
been literally lost at
sea as soon as they

lost sight of land. Thousands of lives and the increasing fortunes of nations hung on a resolution. One man, John Harrison, in complete opposition to the scientific community, dared to imagine a mechanical solution—a clock that would keep precise time at sea, something no clock had ever been able to do on land. Longitude is the dramatic human story of an epic scientific quest and of Harrison's forty-year obsession with building his perfect timekeeper, known today as the chronometer. Full of heroism and chicanery, it is also a fascinating brief history of astronomy, navigation, and clockmaking, and opens a new window on our world.

W. G. Sebald meets Maggie Nelson in an autobiographical narrative of embodiment, visual art, history, and loss. How do the bodies we inhabit affect our relationship with art? How does art affect our relationship to our bodies? T Fleischmann uses Felix González-Torres's artworks—piles of candy, stacks of paper, puzzles—as a path through questions of love and loss, violence and rejuvenation, gender and sexuality. From the back porches of Buffalo, to the galleries of New York and L.A., to farmhouses of rural Tennessee, the artworks act as still points, sites for reflection situated in

lived experience. Fleischmann combines serious engagement with warmth and clarity of prose, reveling in the experiences and pleasures of art and the body, identity and community.

Leona Chickering disappears mysteriously in a London street. Her husband goes to the American Embassy for help and learns through Interpol that Leona left Paris on a tour party to China, first stop Peking. The trip was arranged through a french journalist, Andre Valois, a former lover of Leona when both were in China covering the

Sino-Japanese war. At Peking, Leona is met by an associate of Andre's, who tells her that her ex-husband Paul is being released and will be repatriated at Hongkong soon. The man responsible for Paul's release is Alexei Petrov, a Russian correspondent who had been Leona's lover during a winter in Japanese-occupied Hankow. Leona learns of the time for Paul's release at the Hongkong border and goes there to meet him, in a traumatic ending, Paul is met by a Chinese wife and their daughter. WHAT TIME IS IT IN CHINA? Is a novel of a woman's journey back in time, reunions with two former lovers, and memories of a China she knew years earlier vividly contrasted with

present day China. *Time Warped* iUniverse
Gruzinski's sensitive analysis brings out the singularities of the two visions, that of Islam and that of America, each already keeping a watchful eye on the other and yet irreducibly different, with this question always in the background: what did it mean to 'think the world' at the dawn of modern times? *What Time is It There?* U of Minnesota Press
From the New York Times bestselling authors of *Sprint* comes "a unique and engaging read about a proven habit framework [that] readers can apply to each day" (Insider, Best Books to Form New Habits). "If you want to achieve more (without going nuts),

read this book.”—Charles Duhigg, author of *The Power of Habit* Nobody ever looked at an empty calendar and said, "The best way to spend this time is by cramming it full of meetings!" or got to work in the morning and thought, "Today I'll spend hours on Facebook! Yet that's exactly what we do. Why? In a world where information refreshes endlessly and the workday feels like a race to react to other people's priorities faster, frazzled and distracted has become our default position. But what if the exhaustion of constant busyness wasn't mandatory? What if you could step off the hamster wheel and start taking control of your time and

attention? That's what this book is about. As creators of Google Ventures' renowned "design sprint," Jake and John have helped hundreds of teams solve important problems by changing how they work. Building on the success of these sprints and their experience designing ubiquitous tech products from Gmail to YouTube, they spent years experimenting with their own habits and routines, looking for ways to help people optimize their energy, focus, and time. Now they've packaged the most effective tactics into a four-step daily framework that anyone can use to systematically design their days. *Make Time* is not a one-size-fits-all formula. Instead, it

offers a customizable menu of bite-size tips and strategies that can be tailored to individual habits and lifestyles. *Make Time* isn't about productivity, or checking off more to-dos. Nor does it propose unrealistic solutions like throwing out your smartphone or swearing off social media. Making time isn't about radically overhauling your lifestyle; it's about making small shifts in your environment to liberate yourself from constant busyness and distraction. A must-read for anyone who has ever thought, *If only there were more hours in the day...*, *Make Time* will help you stop passively reacting to the demands of the modern world and start

intentionally making time for the things that matter.

What Time Is It?

Random House Books for Young Readers

One of Smithsonian Magazine's Ten Best History Books of 2021

A captivating, surprising history of timekeeping and how it has shaped our world. For thousands of years, people of all cultures have made and used clocks, from the city sundials of ancient Rome to the medieval water clocks of imperial China, hourglasses fomenting revolution in the Middle Ages, the Stock Exchange clock of Amsterdam in 1611, Enlightenment observatories in India, and the high-precision clocks circling the Earth on a fleet of GPS satellites that have

been launched since 1978. Clocks have helped us navigate the world and build empires, and have even taken us to the brink of destruction. Elites have used them to wield power, make money, govern citizens, and control lives—and sometimes the people have used them to fight back. Through the stories of twelve clocks, *About Time* brings pivotal moments from the past vividly to life. Historian and lifelong clock enthusiast David Rooney takes us from the unveiling of al-Jazari's castle clock in 1206, in present-day Turkey; to the Cape of Good Hope observatory at the southern tip of Africa, where nineteenth-century British government astronomers moved

the gears of empire with a time ball and a gun; to the burial of a plutonium clock now sealed beneath a public park in Osaka, where it will keep time for 5,000 years. Rooney shows, through these artifacts, how time has been imagined, politicized, and weaponized over the centuries—and how it might bring peace. Ultimately, he writes, the technical history of horology is only the start of the story. A history of clocks is a history of civilization. *Time Is Irreverent: Ooh, It's a Trilogy!* (Books 1-3) Waribashi From Cozy Classics to New Twists on Holiday Favorites, *It's Always Time For Pie* Whether you're craving a comforting favorite or an exciting new flavor, a celebratory

Could Confucius hit a

Who is this guru lurking in the grand old game? Well, he's the winner of ten World Series rings, a member of both the Hall of Fame and the All-Century Team, and perhaps the most popular and beloved ballplayer of all time. And without effort or artifice he's waxed poetic on the mysteries of time ("It gets late awful early out there"), the meaning of community ("It's so crowded nobody goes there anymore"), and even the omnipresence of hope in the direst circumstances ("It ain't over 'til it's over"). It's

What Time Is It?

AN INSTANT NEW YORK TIMES BESTSELLER

"Provocative and appealing . . . well worth your extremely limited time."

—Barbara Spindel, *The Wall Street Journal* The average human lifespan is absurdly, insultingly brief.

Assuming you live to be eighty, you have just over four thousand weeks. Nobody needs telling there isn't enough time. We're obsessed with our lengthening to-do lists, our overfilled inboxes, work-life balance, and the ceaseless battle against distraction; and we're deluged with advice on becoming more productive and efficient, and "life hacks" to optimize our days. But such techniques often end up making things worse. The sense of

anxious hurry grows more intense, and still the most meaningful parts of life seem to lie just beyond the horizon. Still, we rarely make the connection between our daily struggles with time and the ultimate time management problem: the challenge of how best to use our four thousand weeks. Drawing on the insights of both ancient and contemporary philosophers, psychologists, and spiritual teachers, Oliver Burkeman delivers an entertaining, humorous, practical, and ultimately profound guide to time and time management. Rejecting the futile modern fixation on “getting everything done,” *Four Thousand Weeks* introduces

readers to tools for constructing a meaningful life by embracing finitude, showing how many of the unhelpful ways we’ve come to think about time aren’t inescapable, unchanging truths, but choices we’ve made as individuals and as a society—and that we could do things differently.
