Ebony House of Stratus
It's been six years since
the plague and Tristan
has spent five of them in
Maui with her brother
Alden. Life seems quiet.
Simple. Peaceful. All these
illusions are torn away
when she discovers an
alien installation hidden in
the mountains. In
response, she prepares a
boat and starts work on a
new home deep in the
forest. But the locals don't
appreciate her raiding
their town for supplies.
Soon, their resentment
flares into open war—and
draws the attention of the
aliens, who bomb the area
relentlessly. With their
home and lives in ruin,
Tristan and Alden flee
deep into the jungle of
Hana. And discover a

secret paradise. Yet it's
not meant to last. Off the
coast of China, Ness and
his alien ally Sebastian
are tracking an alien
conspiracy. Its tendrils will
lead them straight to
Maui—and pull humanity
to the brink of extinction.

Drug traffickers in
Morocco must be
eliminated and Lady
Jennifer Norrington, along
with her compatriots,
travels from its back
alleys to London, France
and then Kenya, with
murder and mayhem
always present. A heart-
stopping climax involves
treachery, racing cars and
murderous light aircraft,
along with a macabre
episode surrounding
sacred eels.

Exploring Ancient Skies
brings together the
methods of archaeology
and the insights of
modern astronomy to
explore the science of
astronomy as it was
practiced in various
cultures prior to the
invention of the
telescope. The book
reviews an enormous and
growing body of literature
on the cultures of the
ancient Mediterranean,
the Far East, and the New
World (particularly
Mesoamerica), putting the
ancient astronomical
materials into their
archaeological and
cultural contexts. The
authors begin with an
overview of the field and
proceed to essential
aspects of naked-eye
astronomy, followed by an
examination of specific
cultures. The book
concludes by taking into

account the purposes of ancient astronomy: astrology, navigation, calendar regulation, and (not least) the understanding of our place and role in the universe. Skies are recreated to display critical events as they would have appeared to ancient observers--events such as the supernova of 1054 A.D., the "lion horoscope," and the Star of Bethlehem. Exploring Ancient Skies provides a comprehensive overview of the relationships between astronomy and other areas of human investigation. It will be useful as a reference for scholars and as a text for students in both astronomy and archaeology, and will be of compelling interest to readers who seek a broad understanding of our collective intellectual history.

This first history of jet combat by an ex-RAF flier will fascinate students of military history as well as all who thrilled to the rugged hero culture of fighter pilots popularized in the film "Top Gun". of photos. Index.

Aviation Week

The Skyhawk was involved in Vietnam from the very beginning, including the first offensive operations in 1963 into Laos, and the Pierce Arrow operations immediately following the Tonkin Gulf Incident of August 1964. Navy and Marine Corps A-4s quickly established a presence in south-east Asia participating in thousands of sorties against the entrenched communist forces in the South and the heavily defended targets in North Vietnam. A-4 pilots also struck targets along the

infamous Ho Chi Minh Trail, working with ground-based and airborne forward air controllers to interdict the flood of supplies to communist forces in the south. This book will include many first-hand accounts from the pilots who flew one of the greatest attack aircraft ever built and will provide an insightful account of some of the most thrilling

aerial combats that took place during Vietnam. *Air & Space Smithsonian* The Congressional Record is the official record of the proceedings and debates of the United States Congress.
