 Subject:

science;  
 biology,  
 chemistry,  
 and physics  
 Level: Key  
 Stage 3 (age  
 11-14)  
 Exciting, real-  
 world 11-14

science that  
 builds a base  
 for  
 International  
 GCSEs  
 Pearson's  
 popular 11-14  
 Exploring  
 Science

course - loved by teachers for its exciting, real-world science - inspires the next generation of scientists. With brand-new content, this 2019 International edition builds a base for progression to International GCSE Sciences and fully covers the content of the 13+ Common Entrance Exam. Exciting, real-world science that inspires the next generation of scientists. Explore real-

life science that learners can relate to, with stunning videos and photographs. Provides content for a broad and balanced science curriculum, while building the skills needed for International GCSE sciences and the 13+ Common Entrance Exam. Choose from two Student Book course options to match the way your school teaches 11-14 science. The Student Books are arranged by year (Year

7, 8 and 9) or by science (biology, chemistry, physics). This Student Book contains all Year 9 biology, chemistry and physics content. Learn more about this series, and access free samples, on our website: [www.pearsonschools.co.uk/ExploringScienceInternational](http://www.pearsonschools.co.uk/ExploringScienceInternational). Collins Exploring Biology McGraw-Hill Education Concepts of Biology is designed for the typical introductory

biology course for nonmajors, covering standard scope and sequence requirements. The text includes interesting applications and conveys the major themes of biology, with content that is meaningful and easy to understand. The book is designed to demonstrate biology concepts and to promote scientific literacy.

**Exploring Science** New Harbinger Publications  
This should be

the last course a student takes before high school biology. Typically, we recommend that the student take this course during the same year that he or she is taking prealgebra. *Exploring Creation With Physical Science* provides a detailed introduction to the physical environment and some of the basic laws that make it work. The fairly broad scope of the book provides the student

with a good understanding of the earth's atmosphere, hydrosphere, and lithosphere. It also covers details on weather, motion, Newton's Laws, gravity, the solar system, atomic structure, radiation, nuclear reactions, stars, and galaxies. The second edition of our physical science course has several features that enhance the value of the course: \* There is more color in this

edition as compared to the previous edition, and many of the drawings that are in the first edition have been replaced by higher-quality drawings. \* There are more experiments in this edition than there were in the previous one. In addition, some of the experiments that were in the previous edition have been changed to make them even more interesting and easy to perform. \* Advanced

students who have the time and the ability for additional learning are directed to online resources that give them access to advanced subject matter. \* To aid the student in reviewing the course as a whole, there is an appendix that contains questions which cover the entire course. The solutions and tests manual has the answers to those questions. Because of the

differences between the first and second editions, students in a group setting cannot use both. They must all have the same edition. A further description of the changes made to our second edition courses can be found in the sidebar on page 32. **The Gender Quest Workbook** Usborne Workbooks Notebooking journal for elementary study of human anatomy,

<p>written from a Christian perspective. <i>Cognition</i> Highlights Press The Pearson Science Second Edition Teacher Companion make lesson preparation and implementation easy by combining full Student Book pages with a wealth of teacher support, to help you meet the demands of the Australian Curriculum: Science as well as the 2017 Victorian Curriculum.</p>	<p><u>Exploring Science</u> HarperCollins UK Many tens of thousands of mental health and health care professionals have used this essential book--now significantly revised with 70% new content reflecting important advances in the field--to develop and sharpen their skills in motivational interviewing (MI). Clear explanations of core MI concepts are accompanied by carefully</p>	<p>crafted sample dialogues, exercises, and practice opportunities. Readers build proficiency for moving through the four processes of MI--engaging, focusing, evoking, and planning--using open-ended questions, affirmations, reflective listening, and summaries (OARS), plus information exchange. In a large-size format for easy photocopying, the volume includes more</p>
---	---	---

than 80 reproducible worksheets. Purchasers get access to a companion website where they can download and print the reproducible materials. New to This Edition \*Fully revised and restructured around the new four-process model of MI.

\*Chapters on exploring values and goals and "finding the horizon."  
\*Additional exercises, now with downloadable worksheets.  
\*Teaches how

to tailor OARS skills for each MI process.  
\*Integrates key ideas from positive psychology. Winner (First Place)-- American Journal of Nursing Book of the Year Award, Adult Primary Care Category See also Motivational Interviewing, Fourth Edition: Helping People Change and Grow, by William R. Miller and Stephen Rollnick, and Motivational Interviewing and CBT: Combining

Strategies for Maximum Effectiveness, by Sylvie Naar and Steven A. Safren. This book is in the Applications of Motivational Interviewing series, edited by Stephen Rollnick, William R. Miller, and Theresa B. Moyers.

Exploring Science International. **Exploring Science** Collins Introduce early learners to real science with the Exploring the Building Blocks of Science Book 1 Student Textbook. Foundational scientific concepts and terminology are presented clearly and in a manner that's easy for kids to understand. Using this book gives kids a solid base on which to build a further study of science.

This year-long curriculum contains four chapters of each of five scientific disciplines: chemistry, biology, physics, geology, and astronomy, as well as an introduction to the material covered and a concluding chapter for a total of 22 chapters. The many graphics in this full color textbook reinforce the concepts presented and make the book fun for kids and teachers alike to read. This Student

Textbook is accompanied by Exploring the Building Blocks of Science Book 1 Laboratory Notebook (experiments) and Exploring the Building Blocks of Science Book 1 Teacher's Manual. Other supplemental materials are available at [www.realscience4kids.com](http://www.realscience4kids.com). **Exploring Science for the New Junior Cycle** HarperCollins UK An encyclopedia designed especially to meet the needs of

<p>elementary, junior high, and senior high school students.</p> <p><u>Exploring Science</u> Cambridge University Press Introduction to Health Science: Pathways to Your Future is a pathway-focused textbook program that helps you explore and prepare for healthcare careers.</p> <p>Organized into units based on the five health science pathways, the text covers all the skills and knowledge</p>	<p>areas included in the National Health Science Standards. Assessment activities at the end of each chapter offer multiple opportunities for students to simulate healthcare careers, practice skills, and to think deeply about the information they've learned.</p> <p><i>Usborne Workbooks Comprehension 8-9</i> Guilford Publications Grade 9 Biology for Jamaica provides a new course for</p>	<p>students studying the sciences separately at Grade 9. It is an activity led course set in relevant contexts and develops the skills necessary for success in biology.
