DOMINIQUE NEAL

25th International Economic Conference of Sibiu (IECS 2018) Oxford Business Group
Deals with the convergence of business and IT in the retail banking industry. This work aims to introduce the concepts of retail banking from a global perspective. This book covers topics including: an overview of the major retail banking products; payments and lending practices in different continents; and, IT projects in retail banking.

Java Projects Springer

"This book focuses on human, operational, managerial, and strategic organizational issues in e-banking"--Provided by publisher.

Foreign Assistance and Related Programs Appropriations for Year 1986 Routledge

InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.

The Report "O'Reilly Media, Inc."

This book explores the history, structure and current operations of the World Bank, which despite being the largest development organisation and the largest development research body in the world with tremendous direct and indirect influence on developing economies, has rarely received the critical attention its importance merits. The book's unique contribution is twofold: it provides an original analysis of the interaction between economic theory, political practice and the Bank's development praxis as well as two detailed, grounded studies of the Bank's lending practices. The book starts with a detailed examination of the development theory and practice of the World Bank from its Keynesian origins to the current shift through the Washington Consensus to the so-called post-Washington Consensus. The second part is a detailed analysis of the Bank's lending practices in two countries, Vietnam and Indonesia. The case studies extensively utilise World Bank sources—analysing the Project Appraisal Documents for some 113 loans. They also draw on the secondary literature and on interviews with World Bank staff, government officials, academics and NGOs in both countries. The case studies enable the development of empirically-based conclusions regarding the impact of Bank policies on the economic and social development of two important Southeast Asian nations making possible an assessment of the extent to which the rhetoric of the post-Washington Consensus has been incorporated into the Bank's lending practices. This book will be of interest to both advanced undergraduate and graduate students as well as specialist audiences in the fields of international political economy, development, international organizations and Southeast Asian Studies.

Inheritance of Loss IGI Global

On the cusp of 2014 national elections and the 2015 integration of the ASEAN Economic Community, Indonesia is poised to continue its rapid economic expansion. While the country's natural resources are still plentiful, by channelling foreign direct investment into the right areas, the government is ensuring that true potential, in terms of value and manufacturing, is achieved. By inviting targeted investment and adapting existing regulatory frameworks, the government has taken significant steps to facilitate foreign investment and the development of value-added industries. Indonesia is a country renowned for its abundance of natural resources, which include oil, gas, coal, nickel, tin, copper, gold and silver. While slightly down on the previous year, the country's total oil production for 2012 stood at 861,000 barrels per day, accounting for approximately 1.2% of the world's oil production. Indonesia remains the world's largest exporter of thermal coal, exporting a total of 304m tonnes in 2012 to countries such as Japan, South Korea, China and India. The country continues to be the dominant nation in South-east Asia politically and economically, and its participation within ASEAN in particular will likely determine the shape of regional integration, with the introduction of the ASEAN Economic Community (AEC) in 2015 looming as the bloc's next major milestone.

This book constitutes the refereed proceedings of the 10th International Conference on Model Driven Engineering Languages and Systems (formerly the UML series of conferences), MODELS 2007, held

in Nashville, USA, September 30 - October 5, 2007. The 45 revised full papers were carefully reviewed and selected from 158 initial submissions. The papers are organized in topical sections.

Computerworld Springer

With the application of the right policies, Indonesia could return to growth above 6%, and perhaps eventually reach the 7% target set by the new president. The government intends to double expenditure in the key areas of public works, transport and agriculture, and new plans include the construction of 2600 km of roads, 15 airports, 24 ports, 3258 km of railway and the addition of around 35,000 MW to the state electricity company's current capacity. The investments to be made in infrastructure have the potential to boost the economy in both the short and long term. A shift to more investment and less consumption would help lead to more sustainable growth and insulate the country from external shocks. Already the numbers are starting to head in the right direction.

Hearings Before a Subcommittee of the Committee on Appropriations, United States Senate, Ninety-ninth Congress, First Session, on S. 1816, [H.R. 3228] ...

Technological innovations in the banking sector have provided numerous benefits to customers and banks alike; however, the use of e-banking increases vulnerability to system attacks and threats, making effective security measures more vital than ever. Online Banking Security Measures and Data Protection is an authoritative reference source for the latest scholarly material on the challenges presented by the implementation of e-banking in contemporary financial systems. Presenting emerging techniques to secure these systems against potential threats and highlighting theoretical foundations and real-world case studies, this book is ideally designed for professionals, practitioners, upper-level students, and technology developers interested in the latest developments in e-banking security.

Since the beginning of the New Order period in 1965 under General Soeharto, Indonesia has seen the establishment of the authority of the central government in every part of the country as well as the gradual delegation of authority to local provincial governments. This collection of essays

analyzes development and change in public policy and administration during these years, and will be an invaluable resource for both development professionals and students.
