The aim of this
collective work is to
give an account of the
topicality and
dynamics of new
research in the
didactics of evolution,
by articulating
francophone and
international work. The
various contributions
pursue a reflection on
the challenges of
teaching and learning
about evolution, based
on historical,
epistemological and
societal approaches.
The themes addressed
illustrate the vitality
and diversity of
research issues in
educational sciences,

from primary school to
university. Structured
around different
theoretical fields
(problematization,
didactics of the
curriculum, nature of
science, etc.), this book
explores the content,
teaching and learning
processes and
approaches, teaching
practices, as well as
pre-service and in-
service teacher
training, with a view to
both intelligibility and
feasibility.

Angeles Tan Alora
reports on the Code of
Pharmaceutical
Marketmg Practices
developed by the
Pharmaceutical and
Health Care
Association of the
Philippines. Ruud ter
Meulen and his
colleagues provide

detailed analysis of the Remmelink Commission's report on euthanasia in the Netherlands. Kazumasa Hoshino discusses the findings of the Special Committee on Gene Therapy in Japan. As such examples suggest, the activities of many governmental groups and professional advisory bodies, although varied, tend to converge upon a number of especially important issues. If one peruses the index of documents discussed in Volume Four, certain topics are more often the focus of legislation and official concern than others: withholding and withdrawing treatment, access to health care, consent to treatment and experimentation, and issues posed by

HIV testing and AIDS. Such a common focus should not be exaggerated, for the discussion of topics is wide-ranging. But that commonality, when in evidence, is also not surprising. It suggests that key issues and concerns in bioethics may be widely shared among modern cultures and societies, for all the distinctiveness of a particular nation's or region's response to them. Issues of informed consent, after all, implicate more fundamental matters of respect for persons and the rights of individuals in the contexts of therapy and research. Issues of access to medical care concretize deeper questions about the nature and scope of a society's welfare

obligations to its citizens.

Books Lavoisier

This volume continues to build on the relationship between the Research in Management Consulting series and the intervener-researchers at the Socio-Economic Institute for Firms and Organizations (ISEOR) in Ecully, France, extending that partnership to our recent work with the French Foundation for Management Education (FNEGE), a foundation dedicated to closing the gap between the teaching and practice of management in France. As part of the Foundation's multifaceted activities—which range from seminars and an

advanced training initiative for French doctoral students to joint programs with international organizations and associations—FNEGE partnered with ISEOR to sponsor a series of workshops on developing high quality intervention-research. This volume is one of the results from that endeavor. Although intervention-research helps to uncover valuable insight into organizational dynamics and performance, the challenge of capturing and disseminating that insight to both academics and practitioners is entrenched in the rigor-relevance debate. While we are witnessing increased calls for “actionable knowledge,” this ideal,

unfortunately, remains a rather elusive concept as critics contend either that rigorous academic research falls well-short of relevance to the practitioner world or research that proves to be valuable to practitioners falls short of the rigor expected in academic life. This volume is intended to help bridge that divide. Drawing on the FNEGE-ISEOR intervention-research workshop, the volume contains 18 chapters that explore the intervention-research process, from initial conceptualization, to implementation, to publication. The volume will be published in French and English

 "Cézanne, Murder and Modern Life changes the way we think about—and see—Cézanne’s entire oeuvre. Dombrowski’s arguments are convincing and bold, especially on the theme of murder as a vehicle for representation. Modern Olympia has never before been so satisfactorily analyzed." Susan Sidlauskus, Rutgers University, author of *Cezanne's Other: The Portraits of Hortense*
 "Exciting and intelligent, *Cézanne, Murder, and Modern Life* will be important for modernists, and essential for scholars of Cézanne, early Impressionism, and

painting in the 1860s. Dombrowski shows us a Cézanne we did not know.” Nancy Locke, author of *Manet and the Family Romance* Cambridge University Press

The field of regenerative medicine has developed rapidly over the past 20 years with the advent of molecular and cellular techniques. This textbook, *Regenerative Medicine: From Protocol to Patient*, aims to explain the scientific knowledge and emerging technology as well as the clinical application in different organ systems and diseases. International leading experts from four continents describe the latest scientific and clinical knowledge of the field of regenerative medicine.

The process of translating science of laboratory protocols into therapies is explained in sections on regulatory, ethical and industrial issues. This textbook is organized into five parts: (I) Biology of Tissue Regeneration, (II) Stem Cell Science and Technology, (III) Tissue Engineering, Biomaterials and Nanotechnology, (IV) Regenerative Therapies and (V) Regulation and Ethics. The textbook aims to give the student, the researcher, the health care professional, the physician and the patient a complete survey on the current scientific basis, therapeutical protocols, clinical translation and practiced therapies in regenerative medicine.

Nature

Regional Perspectives in Bioethics" illustrates the ways in which the national and international political landscape encompasses persons from diverse and often fragmented moral communities with widely varying moral intuitions, premises, evaluations and commitments.

VIE ET MORT DES EPIDEMIES IAP

Since the first fertilization of a human egg in the laboratory in 1968, scientific and technological breakthroughs have raised ethical dilemmas and generated policy controversies on both sides of the Atlantic.

Embryo, stem cell, and cloning research have provoked impassioned political debate about their religious, moral, legal, and practical implications. National governments make rules that govern the creation, destruction, and use of embryos in the laboratory—but they do so in profoundly different ways. In *Embryo Politics*, Thomas Banchoff provides a comprehensive overview of political struggles about embryo research during four decades in four countries—the United States, the United Kingdom, Germany, and France. Banchoff's book, the first of its kind, demonstrates the impact of particular national histories and institutions on very

different patterns of national governance. Over time, he argues, partisan debate and religious-secular polarization have come to overshadow ethical reflection and political deliberation on the moral status of the embryo and the promise of biomedical research. Only by recovering a robust and public ethical debate will we be able to govern revolutionary life-science technologies effectively and responsibly into the future.

Histoire de La Vie et de L'Administration de Colbert Springer Science & Business Media

Pandemics such as Covid-19, Ebola, SARS, and influenza, as well as the necessary measures for their

research, prevention, and treatment, raise a number of ethical issues that confront science, the medical profession, and health policy. This overview volume, written by renowned experts from medicine, the humanities, and the social sciences, addresses the central ethical issues in pandemics. Focusing on the disciplines of philosophy, public health, bioethics, and law, the book discusses issues of resource allocation, triage, and research, as well as restrictions on freedom, rights and duties of health professionals, and ethical aspects of digital medicine in crises. The volume is intended to serve as a handbook and to provide physicians as

well as nurses, politicians and interested laypersons with valuable advice on how to deal with the difficult moral problems of epidemics and pandemics. With expert contributions by Steffen Augsburg (Giessen), Klaus Bergdolt (Cologne), Nikola Biller-Andorno (Zurich), Walter Bruchhausen (Bonn), Christiane Druml (Vienna), Hans-Jörg Ehni (Tuebingen), Alice Faust (Berlin), Sophia Forster (Erlangen-Nuremberg), Andreas Frewer (Erlangen-Nuremberg), Sara Gerke (Boston/Cambridge), Patrik Hummel (Eindhoven), Elena Jirovsky-Platter (Vienna), Katharina Kieslich (Vienna), Otmar Kloiber (Ferney-Voltaire), Ulrich H. J.

Körtner (Vienna), Eva Kuhn (Bonn), Georg Marckmann (Munich), Timo Minssen (Copenhagen), Tim Nguyen (Geneva), Barbara Prainsack (Vienna), Andreas Reis (Geneva), Anita Rieder (Vienna), Stephan Rixen (Bayreuth), Lana Saksone (Berlin), Martina Schmidhuber (Graz), Harald Schmidt (Philadelphia), Annabel Seebohm (Brussels), Daniel Strech (Berlin), Sebastian Wäscher (Zurich), Hans-Werner Wahl (Heidelberg), Stefanie Weigold (Berlin), and Lena Woydack (Berlin).

Cet ouvrage de
synthèse sur les
fondements théoriques
et épistémologiques de
la science de
l'information répond à
trois questions : -
existe-t-il une science
de l'information à part
entière ? - comment se
définit l'information,

objet de cette science
? - y a-t-il une
spécificité française de
la science de
l'information ? Ce livre
compare les chemins
parcourus par la
science de
l'information en France
et dans le reste du
monde. Il contextualise
cette évolution à l'aune
d'une diversité
d'inscriptions
disciplinaires. L'enjeu
de la science de
l'information est de
concilier l'approche
réaliste de la
connaissance,
l'approche
individualiste des
sciences cognitives et
l'approche collectiviste
où les domaines sont
façonnés et les
comportements sont
modulés par les
environnements, les
cultures et les
construits sociaux
partagés. Cette étude

sera utile à tous les chercheurs, étudiants et professionnels désirant approfondir leurs connaissances sur les fondements théoriques de la science de l'information.

Logos of Phenomenology and Phenomenology of The Logos. Book

Two OECD Publishing
For the first time, based on an extensive survey conducted across the whole of Europe by the Association Descartes, the details of over 1,000 persons and organisations are now available. The Directory is broken down into 14 sections : the first section is devoted to European institutions; the next twelve cover each EEC country and list the names of persons and

organisations involved in bioethics; a complementary listing covers indispensable persons or organisations; A reference work both for researchers and anybody concerned with bioethics.

Annales de l'Observatoire astronomique, magnétique et météorologique de Toulouse ... Springer
Science & Business Media

This book celebrates the investigative power of phenomenology to explore the phenomenological sense of space and time in conjunction with the phenomenology of intentionality, the invisible, the sacred, and the mystical. It examines the course of life through its

ontopoietic genesis, opening the cosmic sphere to logos. The work also explores, on the one hand, the intellectual drive to locate our cosmic position in the universe and, on the other, the pull toward the infinite. It intertwines science and its grounding principles with imagination in order to make sense of the infinite. This work is the first of a two-part work that contains papers presented at the 62nd International Congress of Phenomenology, The Forces of the Cosmos and the Ontopoietic Genesis of Life, held in Paris, France, August 2012. It features the work of scholars in such diverse disciplines as biology, anthropology, pedagogy, and

psychology who philosophically investigate the cosmic origins of beingness. Coverage in this first part includes: Toward a New Enlightenment: Metaphysics as Philosophy of Life, Transformation in Phenomenology: Husserl and Tymieniecka, Biologically Organized Quantum Vacuum and the Cosmic Origin of Cellular Life, Plotinus "Enneads" and Self-Creation, The Creative Potential of Humor, Transcendental Morphology - A Phenomenological Interpretation of Human and Non-Human Cosmos, and Cognition and Emotion: From Dichotomy to Ambiguity.

This volume contains a collection of 11 studies on the philosophical and scientific background of Lucretius' *De rerum natura*. The studies 1-7 form a running commentary on the history of ideas in Drn. 5.780-1160 (Lucretius' famous description of the History of Human Mankind); 8-10 discuss some topics from book 4 (sleep, dreams, optical illusions) in relationship to other philosophical doctrines and ancient medical thought; the last study (11) treats the use of analogy by Lucretius.

The Animal's Defender and Zoophilist Cornell University Press

"A truly remarkable forgotten chapter of European intellectual history, laid out with passion and integrity."

(The Wall Street Journal) The exploits of Alexander the Great were so remarkable that for centuries after his death the Macedonian ruler seemed a figure more of legend than of history. Thinkers of the European Enlightenment, searching for ancient models to understand contemporary affairs, were the first to critically interpret Alexander's achievements. As Pierre Briant shows, in the minds of eighteenth-century intellectuals and philosophers, Alexander was the first European: a successful creator of empire who opened the door to new sources of trade and scientific knowledge, and an enlightened leader who

brought the fruits of Western civilization to an oppressed and backward “Orient.” In France, Scotland, England, and Germany, Alexander the Great became an important point of reference in discourses from philosophy and history to political economy and geography. Voltaire, Montesquieu, and Robertson asked what lessons Alexander’s empire-building had to teach modern Europeans. They saw the ancient Macedonian as the embodiment of the rational and benevolent Western ruler, a historical model to be emulated as Western powers accelerated their colonial expansion into Asia, India, and the Middle East. “This important work. . .

confirms once more that the life-trajectory of the Macedonian conqueror remains an inexhaustible cultural resource.” —Sanjay Subrahmanyam, University of California, Los Angeles, author of *Empires Between Islam and Christianity*

**Catalogue de la bibliothèque:
1904-1912. 1915 IAP**

This edited volume provides an in-depth exploration of a theoretical framework supporting Early Childhood Science Education research and teaching best practices. Particularly by presenting the concept of the Precursor Model from an epistemological, psychological, and didactical point of view at Early Childhood Science Education. The book examines and

discusses the nature of Precursor Models and their use for early science teaching and learning. It scrutinizes different aspects of the construction of such models applied in early childhood education settings and contexts. Several empirical studies are presented within diverse scientific domains, as well as in international educational contexts. By providing a vary of examples of precursor models it makes this book a great companion for teachers aiming to teach children to understand and reason about topics such as: floating and sinking; shadow formation; water state changes; air; clouds and rain; electricity; inheritance and selection; as well as variation within

populations. Finally, this volume supports the development of science education from an early age by using the original framework of a precursor model to mediate teaching and learning science at school during early childhood.

La Recherche-Intervention Dans les Entreprises et les Organisations Univ of California Press

Le present volume rassemble plusieurs etudes qu' Alfred Schutz avait consacrees a diverses questions qui gravitent autour d'un probleme philosophique majeur: celui de la socialite. La plupart de ces etudes ont Me publiees ailleurs, mais elles etaient dispersees et d'un acces parfois difficile. Tel quel, l'ouvrage que nous

presentons n' est que la premiere partie d'un ensemble dans lequel l'auteur se proposait de faire reunir par son disciple et ami Maurice Natanson les nombreux essais qu'il avait ecrits depuis son arrivee aux Etats-Unis au debut de la demiere guerre. La mort l'empecha de voir realiser ce projet. 11 nous a semble que la publication successive de cet ensemble, dans la fidelite aux indications laissees par l'auteur, etait le plus bel hommage que nous pussions rendre a ce penseur qui fut notre ami et meritait sans nul doute de tenir dans le courant phenomenologique une place de premier plan que faillirent lui refuser les circonstances dramatiques de sa vie,

jointes a sa trop grande modestie personnelle. Il me faudrait ici parler de l'homme, evoker sa finesse d'esprit, son ironie penetrante, sa serenite et son courage dans l'exil, l'eventail tres vaste de ses preoccupations, le don de jeu nesses et de sympathie gracieuse auquel il entreprit a quarante ans d'assimiler avec bonheur une culture nouvelle, pour y exceller bien tot.
