This book is the first for the My Thoughts Can Change The World Project: a traveling project with author and illustrator Rachel DiNunzio. In December, 2014 Rachel visited Mill Middle School to kick-start the project.A message from Rachel:What we do and what we internally think, impacts others. The My Thoughts Can Change The World project's goal is to make a positive impact for people, animals, plants, and our environment, through the sharing of thoughts and ideas. The Mill Middle 6th Grade class was given this question: An idea, a thought, a hope, however big or small, can start a ripple. No matter if it is to help your family or neighborhood, school or community, nation or world: it starts with you. What will you do? What could we all do? This project was completely voluntary. Each student was given the opportunity to write and illustrate their idea. An amazing 128 Mill Mustangs chose to contribute.Our collective goal is to create as many positive 'thought ripples' as possible through the sharing of these ideas. To do this, the students illustration may be featured as the SRP: Thought of the Day on the Studio RADish Press website, on the social media

feeds, and through the spreading of this book.My personal goal is to empower each student, show that they matter and are important, and to demonstrate how positively aiming their thoughts can create a really big impact.Aside from the costs necessary to produce and print the books, any proceeds will go towards impacting someone's life close to home through a local charity. The book itself becomes the ripple. Beginning with each student's thought, then combining these thoughts into a collaborative work, distributing the the final collection to family, friends, and members of the community, will ultimately lead to the donation of the funds raised from this project.

What are "essential questions," and how do they differ from other kinds of questions? What's so great about them? Why should you design and use essential questions in your classroom?

Essential questions (EQs) help target standards as you organize curriculum content into coherent units that yield focused and thoughtful learning. In the classroom, EQs are used to stimulate students' discussions and promote a deeper understanding of the content. Whether you are an Understanding by Design (UbD) devotee or are searching for ways to address standards—local or Common Core State Standards—in an engaging way, Jay McTighe and Grant Wiggins provide practical guidance on how to design, initiate, and embed inquiry-based teaching and learning in your classroom. Offering dozens of examples, the authors explore the usefulness of EQs in all K-12 content areas, including skill-based areas such as math, PE, language instruction, and arts education. As an important element of their backward design approach to designing curriculum, instruction, and assessment, the authors

- \*Give a comprehensive explanation of why EQs are so important;
- \*Explore seven defining characteristics of EQs;
- \*Distinguish between topical and overarching questions and their uses;
- \*Outline the rationale for using EQs as the focal point in creating units of study; and
- \*Show how to create effective EQs, working from sources including

standards, desired understandings, and student misconceptions. Using essential questions can be challenging—for both teachers and students—and this book provides guidance through practical and proven processes, as well as suggested "response strategies" to encourage student engagement. Finally, you will learn how to create a culture of inquiry so that all members of the educational community—students, teachers, and administrators—benefit from the increased rigor and deepened understanding that emerge when essential questions become a guiding force for learners of all ages.

Supplement your social studies curriculum with 180 days of daily geography practice! This essential classroom resource provides teachers with weekly geography units that build students' geography knowledge, and are easy to incorporate into the classroom. In a world that is becoming more connected and globalized, 21st century students must have the skills necessary to understand their world and how geography affects them and others. Students will develop their map and spatial skills, learn how to answer text- and photo-dependent questions, and study the 5 themes of geography. Each week covers a particular topic and introduces students to a new place or type of map. The first two weeks consist of a mini-unit that focuses entirely on map skills. For additional units, students will study various places, and how culture and geography are related. With a focus on the six populated continents, students will explore various types of maps including physical maps, political maps, topographic maps, thematic maps, climate maps, regional maps, and various topics including scale, legends, cardinal directions, latitude and longitude, and more. Aligned to state standards and National Geography Standards, this resource includes digital materials.
