Digital forensic science, or digital forensics, is the application of scientific tools and methods to identify, collect, and analyze digital (data) artifacts in support of legal proceedings. From a more technical perspective, it is the process of reconstructing the relevant sequence of events that have led to the currently observable state of a target IT system or (digital) artifacts. Over the last three decades, the importance of digital evidence has grown in lockstep with the fast societal adoption of information technology, which has resulted in the continuous accumulation of data at an exponential rate. Simultaneously, there has been a rapid growth in network connectivity and the complexity of IT

systems, leading to more complex behavior that needs to be investigated. The goal of this book is to provide a systematic technical overview of digital forensic techniques, primarily from the point of view of computer science. This allows us to put the field in the broader perspective of a host of related areas and gain better insight into the computational challenges facing forensics, as well as draw inspiration for addressing them. This is needed as some of the challenges faced by digital forensics, such as cloud computing, require qualitatively different approaches; the sheer volume of data to be examined also requires new means of processing it.

While there is a lot of appreciation for backend and distributed systems challenges, there tends to be less empathy for why mobile development is hard when done at scale. This book collects challenges engineers face when building iOS and Android apps at scale, and common ways to tackle these. By scale, we mean having numbers of users in the millions and being built by large engineering teams. For mobile engineers, this book is a blueprint for modern app engineering approaches. For non-mobile engineers and managers, it is a resource with which to build empathy and appreciation for the complexity of world-class mobile engineering. The book covers iOS and Android mobile app challenges on these dimensions: Challenges due to the unique nature of mobile applications compared to the web, and to the backend. App complexity challenges. How do you deal with increasingly complicated navigation patterns? What about non-

deterministic event combinations? How do you localize across several languages, and how do you scale your automated and manual tests? Challenges due to large engineering teams. The larger the mobile team, the more challenging it becomes to ensure a consistent architecture. If your company builds multiple apps, how do you balance not rewriting everything from scratch while moving at a fast pace, over waiting on "centralized" teams? Cross-platform approaches. The tooling to build mobile apps keeps changing. New languages, frameworks, and approaches that all promise to address the pain points of mobile engineering keep appearing. But which approach should you choose? Flutter, React Native, Cordova? Native apps? Reuse business logic written in Kotlin, C#, C++ or other languages? What engineering approaches do "world-class" mobile engineering teams choose in non-functional aspects like code quality, compliance, privacy, compliance, or with experimentation, performance, or app size?

How to Find Your Dream Sales Job - The Future is Yours to Create! John Wiley & Sons

Sales is considered to be one of the most recession proof careers. Why should you consider a sales career, how to know if you would be good at it, how to write a resume and a gender neutral cover letter, what to include in your LinkedIn profile, how to do interview prep, what to wear, how to access the hidden job market, how to evaluate a job offer, how to resign from your current job it's all in this book!

More Details: A study published by Jobfox, identified Sales Representative/Business Development as the most recession-proof profession. Profit Magazine reported; "Finding the right sales talent was one of the biggest concerns facing sales organizations today." Similar studies conducted annually by Manpower Inc. report that the position of "sales representative" is consistently considered by management as one of the most difficult jobs to fill. According to the research in the book *"How to Hire & Develop Your Next Top Performer - The Five Qualities That Make Sales People Great"*, 1 in 4 people have an aptitude and are well suited for a career in sales. So, if there are that many sales organizations always looking to hire sales people, and so many people have the ability to sell, why are so many sales people having difficulties finding their dream sales position? It's probably because few of us are ever taught how to actually find it. This

eBook is going to fix that. "How to Find Your Dream Sales Job - The future is yours to create!" will ask and answer four basic questions: 1. Why should you consider a career in sales? 2. How to know if you would be good at it? 3. What does your dream job look like? 4. How do you go out into the job marketplace and find it? Why should you consider a sales career, how to know if you would be good at it, how to write a resume and a gender neutral cover letter, what to include in your LinkedIn profile, how to do interview prep, what to wear, how to access the hidden job market, how to evaluate a job offer, how to resign from your current job IT'S ALL IN THIS BOOK! Written by Susan A. Enns, a sales coach and author who has been in sales, in one form or another, for well over 3 decades. Over those 30 plus years, in all capacities at all levels of sales, sales management, and executive level management, she has interviewed hundreds, maybe even thousands of candidates for various sales and sales management positions. With that experience under her belt and a record of proven performance to her credit, she wrote this book. She started to write it the day she met a very enterprising young man who wanted to start a career in sales. He told her he found a company online and they were going to charge him more than \$3000 to teach him how to find a sales job. She thought at the time that was highway robbery, let alone questioning if it was even legal. She finished writing it shortly after the COVID-19 Pandemic of 2020 changed the world, and so many talented sales people were forced to change jobs and were hitting the job market on a moment's notice. As Confucius once said, "Choose a job you love, and you will never have to work a day in your life". Susan has had such a rewarding career in sales, she wants to help you explore the same opportunity. So let's get started!
