Whether you are a
beginning manager or a
seasoned expert,
leadership in nursing
today is challenging. To

win the talent war and
become the boss that no
one wants to leave, you
need to add individualized
coaching to your
leadership toolbox. The
Nurse Leader Coach gives
you the tools you need to
change from being a
manager to a leader
coach.

Joycelyn Elders, M.D.
Columbia University Press

This new title provides a
strong state-of-the-art
assessment for cancer
nursing research.
Oncology nurses and
other healthcare
professionals will also be
able to utilize this text as
a foundation for
developing future
research directions and to
break down the science
for dissemination and use

in everyday practice. Advancing Oncology Nursing Science also makes a significant contribution to the evidence-based-practice (EBP) agenda, synthesizing information on bodies of substantiated science that can be translated into clinical practice and health policy. Sections include foundations and priorities of oncology nursing science; advancing oncology nursing science; leading causes of cancer; current and emerging issues in oncology

research; and research training and education. Also included is a section detailing selected resources for advancing oncology nursing science. From practitioners to nurse investigators, from faculty to graduate students, all manner of health professionals will want to add this title to their nursing library. Evidence-Based Practice in Nursing & Healthcare Jones & Bartlett Learning Everyone loves scary stories and award-winning comedy writer/director Carl Reiner invites readers

to huddle close as he tells a young boy's tale of the mysterious house next door. Something with red beams of light shooting from its eyes was coming down the basement stairs. It came closer and closer... the hair on the back of my neck was sticking straight out. I finally saw it- and it was alive! As the story becomes spookier and spookier, Reiner pauses to ask "Shall we turn the page- or is it too scary?" That's for you to decide! Parents and children can read along together as

they listen to spooky sound effects and Carl Reiner's hilarious performance of Tell Me a Scary Story... on the accompanying CD.

Promise on Parnassus

Harper Collins

In this smart, playful, and provocative book, one of today's most original business thinkers argues that we underestimate the importance of romance in our lives and that we can find it in and through business—by designing products, services, and experiences that connect us with

something greater than ourselves. Against the backdrop of eroding trust in capitalism, pervasive technology, big data, and the desire to quantify all of our behaviors, The Business Romantic makes a compelling case that we must meld the pursuit of success and achievement with romance if we want to create an economy that serves our entire selves. A rising star in data analytics who is in love with the intrinsic beauty of spreadsheets; the mastermind behind a brand built on absence;

an Argentinian couple who revolutionize shoelaces; the founder of a foodie-oriented start-up that creates intimate conversation spaces; a performance artist who offers fake corporate seminars for real professionals—these are some of the innovators readers will meet in this witty, deeply personal, and rousing ramble through the world of Business Romanticism. The Business Romantic not only provides surprising insights into the emotional and social

aspects of business but also presents “Rules of Enchantment” that will help both individuals and organizations construct more meaningful experiences for themselves and others. The Business Romantic offers a radically different view of the good life and outlines how to better meet one’s own desires as well as those of customers, employees, and society. It encourages readers to expect more from companies, to give more of themselves, and to fall back in love with

their work and their lives. **The Channels of Student Activism** Jones & Bartlett Publishers
There is a looming threat, hovering like the Sword of Damocles. For whom the freaking bell tolls? We are all increasingly at grave risk for neurological disorders, including Alzheimer's, dementia, and Parkinson's - diseases that inflict a staggering toll on the afflicted and their loved ones. Most troubling, current pharmacological interventions are not cures and do not often

provide needed relief. This book will inform and empower you to develop a plan of action to help you or your loved one fight against Alzheimer's, Parkinson's, and other neurological disorders. Informed by relevant research, this book shows that movement or exercise, particularly when combined with music, can have a powerful impact on brain health. The scientific research is also illuminated and amplified by the lived experiences of people whose stories

reveal how movement, exercise, and dance therapy are helping them in the struggle against neurological disorders. Movement + Music = Medicine will increase your knowledge about the medicinal impact of rhythmic movement and give you greater confidence to make decisions that may improve your brain health. While movement, exercise, and dance are by no means cures for these cruel neurologic conditions, they may provide sorely needed

relief and give you a fighting chance at a better quality of life. Reviews and praise for Movement + Music = Medicine "This well-researched book with intriguing and insightful anecdotes makes a substantial contribution towards understanding how movement, particularly dance, may help slow the course of Alzheimer's and Parkinson's diseases. The book is especially relevant and timely, given the alarming increase in the two diseases - medical

conditions often associated with aging but highly variable between patients. Movement + Music = Medicine is highly recommended for a general audience seeking to learn more about neurological disorders and how lifestyle changes, particularly movement, exercise, and dance, may make a difference." Arthur S. Levine, M.D. Executive Director, University of Pittsburgh Brain Institute, Professor of Medicine, Molecular Genetics, and Neurobiology. "Dr. Spectar has created a

masterpiece combining the history of dance across culture and time and the evidence to support brain health and combatting neurodegenerative disease... I am convinced, I will now be prescribing dance to my patients, for lasting limberness of the brain and the body."Mylynda B. Massart, M.D., Ph.D., Physician and co-director, Pitt Clinical and Translational Science Institute."I have never seen a compilation of science and humanities so beautifully intertwined-

like a dance in and of itself! ... Through the lens of health and healing, Dr. Jem Spectar masterfully crafts the interrelationship between science and art as supported by a vast collection of empirical data, multicultural applications, and personal narratives that argue for the critical need of dance and movement to sustain a healthy society... Movement + Music = Medicine provides a substantial contribution to the growing field of Medical Humanities within medical schools, graduate

studies, residency programs, public health departments, and, of course, dance... [This] book is phenomenal!"Susan Wieczorek, Ph.D., Associate Professor of Communications, UPJ."As caregiver for a spouse struggling with late-stage Alzheimer's Disease, reading this enormously resourceful book makes me wonder what life for us might be like today if the book had been available earlier in our journey... Dr. Spectar's book appears to fill a void

in therapeutic resources for Alzheimer's Disease patients and caregivers... I highly recommend this book for anyone who suspects a neurological disease may become an issue in their family. It's a must read for newly diagnosed patients with a neurological disease and for family members caring for patients who are advancing through various stages of the diseases." Livy - a caregiver

Nurse Manager Engagement: Strategies for Excellence and Commitment is based on the groundbreaking and highly regarded national "Nurse Engagement Study" project funded by The Robert Wood Johnson Foundation. The book builds upon the key ideas in the study by including examples from Dr. Mackoff's conversations and key teaching points from her work with several hundred nurse managers in the three years following this innovative study. Nurse

Manager Engagement offers a groundbreaking approach—one that distinguishes it from other nurse management books by a focus on building a model of the solution rather than a description of the problem. It focuses on the crucial role of the nurse manager in engaging staff nurses and building a pipeline for future nurse leadership.
The Business Romantic
Mascot Books
Everything is Possible: A Nurse's Memoir recounts the personal and professional life of a

woman who is daughter, mother, nurse, wife, friend, educator, scholar and mentor through decades that span the second half of the twentieth century and reaches into the new millennium. In her own words, Sylvia Kleiman Fields shares her diverse experiences and places them in the context of the sweep of events that mark these decades. By combining the insights gleaned from a keen memory of her life and the perceptions of a health care professional

steeped in the power of observation and diagnosis, the author tells a story that is both intimate and expansive. With courage and conviction her journey takes her beyond the intimate confines of the small New York apartment she sometimes shared with Holocaust survivors. She explores the halls of academia, the adventure of international conferences, the challenges of making and maintaining family life, the opportunities to pursue health care

missions and the excitement of conducting research and interprofessional teaching. If you find yourself attracted to the accounts of the lives of determined and intelligent individuals or if you desire to learn more about the people who shape significant institutions in American life, then *Everything Is Possible: A Nurse's Memoir* will speak to you through the voice of a woman of persistence, insight, and achievement. [Disposable People?](#) Gold

Leaf Press (WA)

In *Narrating Practice with Children and Adolescents*, social workers, sociologists, researchers, and helping professionals share engaging and evocative stories of practice that aim to center the young client's story. Drawing on work with a variety of disadvantaged populations in New York City and around the world, they seek to raise awareness of the diversity of the individual experiences of youth. They make use of a

variety of narrative approaches to offer new perspectives on a range of critical health care, mental health, and social issues that shape the lives of children and adolescents. The book considers the narratives we tell about the lives and experiences of children and adolescents and proposes counternarratives that challenge dominant ideas about childhood. Contributors examine the environments and structures that shape the lives of children and youth

from an ecological lens. From their stories emerge questions about how those working with young clients might respond to a changing landscape: How do we define and construct childhood? How do poverty and inequality impact children's health and welfare? How is childhood lived at the intersection of race, class, and gender? How can practitioners engage children and adolescents through culturally responsive and democratic processes? Offering new frameworks

for reflecting on social work practice, the essays in *Narrating Practice with Children and Adolescents* also serve as a vehicle for exploration of children's agency and voice.

Based Practice in Nursing & Healthcare: A Guide to Best Practice, 4th Edition
Bernadette Mazurek Melnyk, PhD, RN, APRN-CNP, FAANP, FNAP, FAAN and Ellen Fineout-Overholt, PhD, RN, FNAP, FAAN Enhance your clinical decision-making capabilities and improve patient outcomes through evidence-based practice. Develop the skills and knowledge you need to make evidence-based practice (EBP) an integral part of your clinical decision-making and everyday nursing practice

with this proven, approachable text. Written in a straightforward, conversational style, *Evidence-Based Practice in Nursing & Healthcare* delivers real-world examples and meaningful strategies in every chapter to help you confidently meet today's clinical challenges and ensure positive patient outcomes. NEW! *Making Connections: An EBP Exemplar* opens each unit, immersing you in an unfolding case study of EBP in real-life practice.

NEW! Chapters reflect the most current implications of EBP on health policy and the context, content, and outcomes of implementing EBP competencies in clinical and academic settings. NEW! Learning objectives and EBP Terms to Learn at both the unit and chapter levels help you study efficiently and stay focused on essential concepts and vocabulary. Making EBP Real features continue to end each unit with real-world examples that demonstrate the principles of EBP applied.

EBP Fast Facts reinforce key points at a glance. Clinical Scenarios clarify the EBP process and enhance your rapid appraisal capabilities. *Creating & Sustaining Civility in Nursing Education, 2nd Ed.* Arcadia Publishing Follow siblings Robbie and Saniyah as they relive the outstanding accomplishments of iconic African-Americans, including the university's founder, Booker T. Washington. Take in the spirit and pageantry of Homecoming as the

Marching Crimson Pipers entertain and lead more than 30,000 fans in singing the university's signature songs. After the game, witness the Black Greek sororities' and fraternities' comradery as they passionately sing their traditional songs. Then, share the families' pride when they take a generational picture with their Legacy Brick. Community Health Nursing Elsevier Health Sciences In 1859, at the largest recorded slave auction in American history, over

400 men, women, and children were sold by the Butler Plantation estates. This book is one of the first to analyze the operation of this auction and trace the lives of slaves before, during, and after their sale. Immersing herself in the personal papers of the Butlers, accounts from journalists that witnessed the auction, genealogical records, and oral histories, Anne C. Bailey weaves together a narrative that brings the auction to life. Demonstrating the

resilience of African American families, she includes interviews from the living descendants of slaves sold on the auction block, showing how the memories of slavery have shaped people's lives today. Using the auction as the focal point, *The Weeping Time* is a compelling and nuanced narrative of one of the most pivotal eras in American history, and how its legacy persists today. [The Years of Zero-Coming](#)

of Age Under the Khmer Rouge is a survivor's account of the Cambodian genocide carried out by Pol Pot's sadistic and terrifying Khmer Rouge regime in the late 1970s. It follows the author, Seng Ty, from the age of seven as he is plucked from his comfortable, middle-class home in a Phnom Penh suburb, marched along a blistering, black strip of highway into the jungle, and thrust headlong into the unspeakable barbarities of an agricultural labor camp. Seng's mother was

worked to death while his siblings succumbed to starvation. His oldest brother was brought back from France and tortured in the secret prison of Tuol Sleng. His family's only survivor and a mere child, Seng was forced to fend for himself, navigating the brainwashing campaigns and random depravities of the Khmer Rouge, determined to survive so he could bear witness to what happened in the camp. *The Years of Zero* guides the reader through the author's long,

desperate periods of harrowing darkness, each chapter a painting of cruelty, caprice, and courage. It follows Seng as he sneaks mice and other living food from the rice paddies where he labors, knowing that the penalty for such defiance is death. It tracks him as he tries to escape into the jungle, only to be dragged back to his camp and severely beaten. Through it all, Seng finds a way to remain whole both in body and in mind. He rallies past torture, betrayal, disease and

despair, refusing at every juncture to surrender to the murderers who have stolen everything he had. As *The Years of Zero* concludes, the reader will have lived what Seng lived, risked what he risked, endured what he endured, and finally celebrate with him his unlikeliest of triumphs. Nurse Manager Engagement University Press of Florida
The children whose stories are told in *Nobody Don't Love Nobody* share one thing in common: they all live with their families in a homeless

shelter's family dormitory, where they can stay for up to three months. And most of them attend classes at the School With No Name, a public school classroom at the shelter, where Stacey Bess is their teacher. Their stories do much to humanize the face of homelessness today and emphasize that the homeless are not simply a population of aimless or alcoholic, single men. But mostly these stories show how love and respect can change and empower a life. When the children are

befriended by their teacher, their peers, an NBA all-star, and other members of the community who take the time to reach out, the children respond in kind with remarkable offerings of their own.

Movement + Music = Medicine Ballantine Books
Giving Voice to What We Know links Margaret Newman's Theory of Health as Expanding Consciousness (HEC) with nursing knowledge development, clinical practice, education and curriculum development,

research, and nursing administration. At a time when nurses are increasingly asked to justify their contribution to clinical practice outcomes, Giving Voice to What We Know serves as a guide for nurses to do so by articulating their contributions to both immediate and long-term changes in healthcare. Written by nurse educators who teach research and practice within the theoretical framework of HEC, the text provides clear examples of theory-based

practice models, as well as a variety of practical examples for using the model to create a partnership with patients--the essence of nursing.

Intervention Research

William Morrow
A “bracing and well-argued” study of America’s college debt crisis—“necessary reading for anyone concerned about the fate of American higher education” (Kirkus).
College is far too expensive for many people today, and the confusing mix of federal,

state, institutional, and private financial aid leaves countless students without the resources they need to pay for it. In *Paying the Price*, education scholar Sara Goldrick-Rab reveals the devastating effect of these shortfalls. Goldrick-Rab examines a study of 3,000 students who used the support of federal aid and Pell Grants to enroll in public colleges and universities in Wisconsin in 2008. Half the students in the study left college without a degree, while less than 20 percent

finished within five years. The cause of their problems, time and again, was lack of money. Unable to afford tuition, books, and living expenses, they worked too many hours at outside jobs, dropped classes, took time off to save money, and even went without adequate food or housing. In many heartbreaking cases, they simply left school—not with a degree, but with crippling debt. Goldrick-Rab combines that data with devastating stories of six individual students,

whose struggles make clear the human and financial costs of our convoluted financial aid policies. In the final section of the book, Goldrick-Rab offers a range of possible solutions, from technical improvements to the financial aid application process, to a bold, public sector-focused “first degree free” program. “Honestly one of the most exciting books I’ve read, because [Goldrick-Rab has] solutions. It’s a manual that I’d recommend to anyone out

there, if you're a parent, if you're a teacher, if you're a student."—Trevor Noah, *The Daily Show*
Narrating Practice with Children and Adolescents Cambridge University Press
This highly anticipated, fully revised second edition revisits and augments the award-winning *Creating & Sustaining Civility in Nursing Education*. In this comprehensive new edition, author Cynthia Clark explores the problem of incivility within nursing academe and

provides practical solutions that range from ready-to-use teaching tools to principles for broad-based institutional change. She further explores the costs and consequences of incivility, its link to stress, ways to identify the problem, and how to craft a vision for change – including bridging the gap between nursing education and practice. Rather than dwell on the negative, this book focuses on solutions, including role-modeling and mentoring, stress management, and

positive learning environments. Nurse educators at all levels will appreciate the variety of evidence-based strategies that faculty – and students – can implement to promote and maintain civility and respect in the education setting, including online learning. *The Weeping Time* John Hunt Publishing
Written in an accessible, user-friendly, and practical style, this text provides a focused and highly engaging introduction to community health nursing. It focuses

on health care for people in their homes and where they live with an overriding emphasis on care of the client in the community, and the business and politics of community health nursing. This book is accompanied by a robust Companion Website full of online activities to enhance the student learning experiences. [Everything Is Possible](#)
HarperCollins
Researchers who study ancient human diets tend to focus on meat eating because the practice of

butchery is very apparent in the archaeological record. In this volume, Julie Lesnik highlights a different food source, tracing evidence that humans and their hominin ancestors also consumed insects throughout the entire course of human evolution. Lesnik combines primatology, sociocultural anthropology, reproductive physiology, and paleoanthropology to examine the role of insects in the diets of hunter-gatherers and our nonhuman primate

cousins. She posits that women would likely spend more time foraging for and eating insects than men, arguing that this pattern is important to note because women are too often ignored in reconstructions of ancient human behavior. Because of the abundance of insects and the low risk of acquiring them, insects were a reliable food source that mothers used to feed their families over the past five million years. Although they are consumed worldwide to this day, insects are not

usually considered food in Western societies. Tying together ancient history with our modern lives, Lesnik points out that insects are highly nutritious and a very sustainable protein alternative. She believes that if we accept that edible insects are a part of the human legacy, we may have new conversations about what is good to eat—both in

past diets and for the future of food.

Nobody Don't Love Nobody University of Chicago Press

This is the time for laying the foundation of wisdom within your own consciousness. To become aware of the wise self within, to nurture it until it grows into a tree of strength that will provide fruit not only for you, but

will help to inspire all those you come into contact with everyday. Gaining in knowledge about your own role and understanding your relationship with God will enable you to do the things that you need to do, so that a wiser civilization, and a new and better world, can be created. Today is the time to start receiving these treasures from God.
