The unabridged versions

of these definitive works are now available together as a highly designed paperback with flaps with a new introduction by Robert Weick. Part of the Knickerbocker Classics series, a modern design makes this timeless book a perfect travel companion. Considered to be one of the most influential political

writings, The Communist Manifesto is as relevant today as when it was originally published. This pamphlet by the German philosophers Karl Marx and Friedrich Engels, published in 1884 as revolutions were erupting across Europe, discusses class struggles and the problems of a capitalist society. After being exiled to London, Marx published

the first part of Das Kapital, a theoretical text that argues that capitalism will create greater and greater division in wealth and welfare and ultimately be replaced by a system of common ownership of the means of production. After Marx's death, Engels completed and published the second and third parts from his colleague's notes. The Knickerbocker Classics bring together the essential works of classic authors from around the world in stunning editions to be

collected and enjoyed.

### **Economics from a Global Perspective**

Taylor & Francis  
This title was first published in 2002: This important collection of international research on fisheries economics offers a comprehensive source of contemporary research on key topics in the field, as well as presenting the history of how the economic theory of fisheries exploitation has developed. Bringing into focus a wide range of inquiry, this second volume concentrates on

extensions, analysis of management agencies and applications. Individual papers examine fundamental issues including, multispecies models, international utilization and recreational fisheries. Fisheries Economics is an invaluable research reference collection for the libraries of academic and other professional economists, as well as an indispensable resource for those studying across the fields of natural resources, fisheries economics and

particularly fisheries management.

This second edition of *eCommerce Economics* addresses the economic issues associated with using computer-mediated electronic networks, such as the Internet, as mechanisms for transferring ownership of or rights to use goods and services. After studying this book, students will recognize problems that arise in the electronic marketplace, such as how to gauge the competitive

environment, what products to offer, how to market those products, and how to price those products. They also will understand the conceptual tools required to evaluate the proper scope of public policies relating to electronic commerce. Core topics covered in the book include the underpinning of electronic commerce and the application of basic economic principles, including the theories of perfect and imperfect competition, to the electronic marketplace.

Building on this foundation, the book discusses virtual products, network industries, and business strategies and conduct. Additional key topics include Internet advertising, intellectual property rights in a digital environment, regulatory issues in electronic markets, public sector issues, online banking and finance, digital cash, international electronic trade, and the implications of e-commerce for aggregate economic activity.

Ludwig von Mises Institute  
 The second edition of *Effective Grading*—the book that has become a classic in the field—provides a proven hands-on guide for evaluating student work and offers an in-depth examination of the link between teaching and grading. Authors Barbara E. Walvoord and Virginia Johnson Anderson explain that grades are not isolated artifacts but part of a process that, when

integrated with course objectives, provides rich information about student learning, as well as being a tool for learning itself. The authors show how the grading process can be used for broader assessment objectives, such as curriculum and institutional assessment. This thoroughly revised and updated edition includes a wealth of new material including: Expanded integration of the use of technology and online teaching A sample syllabus with goals, outcomes, and criteria for

student work New developments in assessment for grant-funded projects Additional information on grading group work, portfolios, and service-learning experiences New strategies for aligning tests and assignments with learning goals Current thought on assessment in departments and general education, using classroom work for program assessments, and using assessment data systematically to "close the loop" Material

on using the best of classroom assessment to foster institutional assessment New case examples from colleges and universities, including community colleges "When the first edition of Effective Grading came out, it quickly became the go-to book on evaluating student learning. This second edition, especially with its extension into evaluating the learning goals of departments and general education programs, will make it even more valuable for everyone working to

improve teaching and learning in higher education." —L. Dee Fink, author, *Creating Significant Learning Experiences* "Informed by encounters with hundreds of faculty in their workshops, these two accomplished teachers, assessors, and faculty developers have created another essential text. Current faculty, as well as graduate students who aspire to teach in college, will carry this edition in a briefcase for quick reference to scores of examples of classroom

teaching and assessment techniques and ways to use students' classroom work in demonstrating departmental and institutional effectiveness." —Trudy W. Banta, author, *Designing Effective Assessment Fisheries Economics, Volume II* Crown Currency From Beijing to Seattle, women's movements within academe and in local-global communities are growing at an unprecedented rate, raising pointed questions about paradigms of Western feminism,

development, global trade, and scholarship. Despite this growing visibility, the perspectives of far too many women, especially from the Global South, are still excluded from mainstream U.S. scholarship. Presented with the task of preparing students for life in this new and rapidly shrinking world, many scholars have found themselves overwhelmed by the need to cross disciplinary and geographic borders. But some faculty are leading the way -- often in defiance of academic

traditions and prejudices - to a curriculum that reflects consequences of globalization. Encompassing Gender is the long-awaited anthology of more than 40 essays by 60 scholars, many of them working in curriculum-transformation groups that cut across the humanities, the sciences, and the social sciences, all of them committed to an interdisciplinary approach to internationalizing the curriculum. *Catalogue of the Officers and Students of Talladega*

& Business Media  
With over a million copies  
sold, Economics in One  
Lesson is an essential  
guide to the basics of  
economic theory. A  
fundamental influence on  
modern libertarianism,  
Hazlitt defends capitalism  
and the free market from  
economic myths that  
persist to this day.  
Considered among the  
leading economic thinkers  
of the "Austrian School,"

which includes Carl Menger, Ludwig von Mises, Friedrich (F.A.) Hayek, and others, Henry Hazlitt (1894-1993), was a libertarian philosopher, an economist, and a journalist. He was the founding vice-president of the Foundation for Economic Education and an early editor of *The Freeman* magazine, an influential libertarian publication. Hazlitt wrote *Economics in One Lesson*, his seminal work, in 1946. Concise and instructive, it is also deceptively prescient and far-reaching

in its efforts to dissemble economic fallacies that are so prevalent they have almost become a new orthodoxy. Economic commentators across the political spectrum have credited Hazlitt with foreseeing the collapse of the global economy which occurred more than 50 years after the initial publication of *Economics in One Lesson*. Hazlitt's focus on non-governmental solutions, strong — and strongly reasoned — anti-deficit position, and general emphasis on free

markets, economic liberty of individuals, and the dangers of government intervention make *Economics in One Lesson* every bit as relevant and valuable today as it has been since publication. *Catalogue* John Wiley & Sons  
This book is based on presentations at AE'2006 (Aalborg, Denmark) – the second symposium on Artificial Economics. As a new constructive simulation method, Agent-Based Computational Economics (ACE) has in recent years proven its

strength and applicability. Coverage in this volume extends to well known questions of economics, like the existence of market efficiency, and to questions raised by new analytical tools, for example networks of social interaction.

Economics from a Global Perspective was the first textbook on IB Diploma economics in the market (originally launched in

1995) helping define the syllabus in terms of breadth and depth for teachers, and constituting the main reference source for students. Over 50,000 copies have been sold to date. With Forewords by Gareth Rees, Manuel Fernandez Canque & Andrew Maclehorse. Features of the Third Edition | Covers the entire IB Diploma syllabus - for exams in 2013 onward | Each topic covered in the appropriate breadth, depth & sequence | Learning Outcomes listed for each sub-section, with

corresponding exercises & multiple choice questions | International perspective throughout | Treats world poverty and development in depth | Numerous case studies, readings & profiles | Higher Level material colour coded | Supported by two student workbooks (Multiple Choice Questions for Economics and Data Response Questions for Economics) The text is thorough and authoritative whilst maintaining a student friendly approach. The clarity of expression is a

significant feature, recognising that IB students have many demands upon their time and that many are also studying in a foreign language. Economics from a Global Perspective is written to give the student a clear understanding and a real enjoyment of economics. Alan Glanville has 32

years experience as an IB teacher, examiner and author. Jacob Glanville has 20 years experience as a professional economist.
