FOREWORD BY GUY KAWASAKI
Presentation designer and internationally acclaimed communications expert Garr Reynolds, creator of the most popular Web site on presentation design and delivery on the Net — presentationzen.com — shares his experience in a provocative mix of illumination, inspiration, education, and guidance that will change the way you think about making presentations with PowerPoint or Keynote. Presentation Zen

challenges the conventional wisdom of making "slide presentations" in today's world and encourages you to think differently and more creatively about the preparation, design, and delivery of your presentations. Garr shares lessons and perspectives that draw upon practical advice from the fields of communication and business. Combining solid principles of design with the tenets of Zen simplicity, this book will help you along the path to simpler, more effective presentations. [Green Computing in Smart Cities: Simulation and Techniques](#) Bloomsbury Publishing
The book collects the latest research and thinking from

international experts on green computing and the smart city. The financial and environmental costs of energy are a concern in smart cities due to the high usage of computing, technology, security, IoT, communications, traffic, and other technologies. This book tackles this problem with a focus on computing, reporting on various approaches being taken worldwide, illustrated by several international case studies demonstrating these approaches. Researchers use this book as an up-to-date reference and engineers use it as a guide for the design and implementation of real solutions.

"The Gift of the Magi" is a short story by O. Henry first published in 1905. The story tells of a young husband and wife and how they deal with the challenge of buying secret Christmas gifts for each other with very little money. As a sentimental story with a moral lesson about gift-giving, it has been popular for adaptation, especially for presentation at Christmas time.

Each project in this book combines bookbinding with a specific craft such as quilting, jewelry making, or polymer clay, and offer levels of expertise: basic, novice, and expert. Illustrated step-by-step instructions and photographs demonstrate how to construct the cover pages, and a unique binding technique, easy enough for a beginner to master. Each project also features two other versions with the same

binding geared to those with more or less experience. The novice version is for those who have no knowledge of the craft and want shortcuts, but love the look. For the quilter's book, for example, vintage quilt pieces become the covers so all that's needed in the binding. Or if you're interested in wool felting use an old sweater. This offers great opportunities for upcycling. The expert version is for those who have a great deal of knowledge and proficiency of a certain craft - the master art quilter, for example. For this version, an expert guest artist has created the cover and the author has created the binding. This offers yet another creative opportunity - the collaborative project.

Since crafters often get involved with round-robins and other shared endeavors, this will show them yet another way to combine their skills. No other craft book offers the possibilities and challenges that *Adventures in Bookbinding* does. Readers will return to it again and again to find inspiration and ideas. *Good and Cheap* John Wiley & Sons
The book begins with an overview of automation history and followed by chapters on PLC, DCS, and SCADA -describing how such technologies have become synonymous in process instrumentation and control. The book then introduces the niche of Fieldbuses in process industries. It then goes on to discuss wireless

communication in the automation sector and its applications in the industrial arena. The book also discusses the all-pervading IoT and its industrial cousin, IIoT, which is finding increasing applications in process automation and control domain. The last chapter introduces OPC technology which has strongly emerged as a de facto standard for interoperable data exchange between multi-vendor software applications and bridges the divide between heterogeneous automation worlds in a very effective way. Key features: Presents an overall industrial automation scenario as it evolved over the years Discusses the already established PLC, DCS, and SCADA

in a thorough and lucid manner and their recent advancements Provides an insight into today's industrial automation field Reviews Fieldbus communication and WSNs in the context of industrial communication Explores IIoT in process automation and control fields Introduces OPC which has already carved out a niche among industrial communication technologies with its seamless connectivity in a heterogeneous automation world Dr. Chanchal Dey is Associate Professor in the Department of Applied Physics, Instrumentation Engineering Section, University of Calcutta. He is a reviewer of IEEE, Elsevier, Springer, Acta Press,

Sage, and Taylor & Francis Publishers. He has more than 80 papers in international journals and conference publications. His research interests include intelligent process control using conventional, fuzzy, and neuro-fuzzy techniques. Dr. Sunit Kumar Sen is an ex-professor, Department of Applied Physics, Instrumentation Engineering Section, University of Calcutta. He was a coordinator of two projects sponsored by AICTE and UGC, Government of India. He has published around 70 papers in international and national journals and conferences and has published three books - the last one was published by CRC Press in 2014. He is a

reviewer of Measurement, Elsevier. His field of interest is new designs of ADCs and DACs.

A sparkling contemporary retelling of Pride and Prejudice set in the tantalizing world of New York City burlesque, perfect for fans of The Kiss Quotient and The Roommate. After a betrayal derailed her interior design career, Liz Bennet found a fresh start in New York. Now an executive assistant by day and stage kitten by night, she's discovered a second home with the performers at Meryton, Manhattan's top-tier burlesque venue. Love's the last thing on her mind when she

locks eyes with Will Darcy across the crowded club, yet the spark between them is undeniable—that is, until she overhears the uptight wealth manager call her merely “tolerable.” Bennet is determined to write Darcy off, but once their besties fall head-over-heels, they’re thrown into each other’s orbit again and again. Each encounter begins to feel more heated than the last, but is their chemistry enough to topple that terrible first impression? What’s more, when a charming newcomer arrives on the scene with accusations against Darcy, and a sudden development leaves Meryton’s fate in jeopardy, Bennet will have to decide who to trust in time to salvage

her design dreams, her heart, and the stage she shares with her found family...

Corporate Internal Investigations have become more and more important for businesses as a means to minimise business liability risks. These liability risks often

result from a managerial failure to observe a particular regulatory code. For international businesses, the obligation upon management to supervise compliance does not stop at national borders and the introduction of whistle-blowing systems within businesses is only a small step in terms of minimising the risks. The greater challenge for businesses is to examine and analyse the findings of internal investigations, and this often calls for an internal investigation to be conducted internationally. Recent cases of law enforcement by national or international authorities against companies and

individuals have highlighted the legal pitfalls and boundaries of Corporate Internal Investigations. The authors of this work offer an overview of the recurring legal questions regarding internal investigations in 13 different jurisdictions (Austria, Brazil, China, France, Germany, Great Britain, Indonesia, Italy, Mexico, Russia, Spain, Switzerland and USA). The book is especially concerned with the requirements for the initiation of internal investigations and the legal boundaries of different investigative measures. In addition, questions concerning data protection, employment laws, the conduct of interviews with employees and penalties for inappropriate

employee conduct are described.
