KAIYA ELLE

Encyclopédie méthodique. Géographie-physique. Par le cit. Desmarest Ecole Francaise de Rome
The Multilingual Dictionary of Fish and Fish Products is a world standard guide to the names of fish and fish products traded internationally. This fifth edition comprises 1187 items, with descriptions in English and French and the equivalents for the main headings in 18 other languages: Danish, Dutch, Finnish, German, Greek, Icelandic, Italian, Japanese, Korean, Norwegian, Polish, Portuguese, Russian, Serbian, Croatian, Spanish, Swedish and Turkish. Indexes are provided for each language, including an index of scientific names for species of fish, shellfish, etc. This is an essential reference for all those working in the arena of fisheries, aquaculture, seafood processing and the world trade in aquatic products. The information included is of great commercial use and importance, and copies of this expanded and enhanced new edition should be available in all seafood companies, libraries of research establishments, government departments and universities where aquaculture, fisheries, food science and technology, fish biology and aquatic sciences are studied and taught, throughout the world.

Encyclopedie Methodique Getty Publications

The first comprehensive catalogue of the Getty Museum's significant collection of French Rococo ébénisterie furniture. This catalogue focuses on French ébénisterie furniture in the Rococo style dating from 1735 to 1760. These splendid objects directly reflect the tastes of the Museum's founder, J. Paul Getty, who started collecting in this area in 1938 and continued until his death in 1976. The Museum's collection is particularly rich in examples created by the most talented cabinet masters then active in Paris, including Bernard van Risenburgh II (after 1696-ca. 1766), Jacques Dubois (1694-1763), and Jean-François Oeben (1721-1763). Working for members of the French royal family and aristocracy, these craftsmen excelled at producing veneered and marquetry pieces of furniture (tables, cabinets, and chests of drawers) fashionable for their lavish surfaces, refined gilt-bronze mounts, and elaborate design. These objects were renowned throughout Europe at a time when Paris was considered the capital of good taste. The entry on each work comprises both a curatorial section, with description and commentary, and a conservation report, with construction diagrams. An introduction by Anne-Lise Desmas traces the collection's acquisition history, and two technical essays by Arlen Heginbotham present methodologies and findings on the analysis of gilt-bronze mounts and lacquer. The free online edition of this open-access publication is available at www.getty.edu/publications/rococo/ and includes zoomable, high-resolution

Beginning with 1915 the Abstracts of decisions of the United States Customs court are included

Report

The invention of collage by Picasso and Braque in 1912 proved to be a dramatic turning point in the development of Cubism and Futurism and ultimately one of the most significant innovations in twentieth-century art. Collage has traditionally been viewed as a new expression of modernism, one allied with modernism's search for purity of means, anti-illusionism, unity, and autonomy of form. This book - the first comprehensive study of collage and its relation to modernism - challenges this view. Christine Poggi argues that collage did not become a new language of modernism but a new language with which to critique modernism. She focuses on the ways Cubist collage - and the Futurist multimedia work that was inspired by it - undermined prevailing notions of material and stylistic unity, subverted the role of the frame and pictorial ground, and brought the languages of high and low culture into a new relationship of exchange.
