Shaped by sound literary and historical scholarship, The Broadview Anthology of British Literature takes a fresh approach to many canonical authors and includes a

broad selection of work by lesser-known writers. The anthology also provides wide-ranging coverage of the worldwide connections of British literature, and it pays attention throughout to matters such as race, gender, class, and sexual orientation. The full anthology comprises six bound volumes, together with an extensive website component; a passcode to access the

latter is included with the purchase of one or more of the bound volumes. A two-volume Concise Edition and a one-volume Compact Edition are also available. Highlights of Volume 5: The Victorian Era include the complete texts of In Memoriam A.H.H., The Importance of Being Earnest, Carmilla, and Strange Case of Dr. Jekyll and Mr. Hyde, as well as Contexts sections on "Work and Poverty,"

"Women in Society," "Sexuality in the Victorian Era," "Nature and the Environment," "The New Woman," and "Britain, Empire, and a Wider World." more Ayahuasca has come to the attention of the Western media. Used by the shamans of Peru, the rituals and practices around this psychoactive plant-based brew date back 50-70,000 years as evidenced by rock and cave paintings found the world over. Through their use of Ayahuasca, Shamans establish contact with the spirit world which they call upon

to aid them in their healing practices, understanding of the cosmos, and how to live well in the world. In "The Shaman & Ayahuasca," internationally respected Peruvian shaman Don Jose Campos illuminates the practices and benefits of Ayahuasca with grace and gentleness, while expressing respect and gratitude for the gifts Ayahuasca has bestowed on him throughout the 25 years

he has been a practicing shaman. He takes the reader on a journey through his own discovery of other worlds, other dimensions, alien entities and plant teachers. "The Shaman & Ayahuasca" gives an overview of an entire cosmology with the potential to benefit all of mankind. It is the perfect book to introduce readers to the profound experiences of Ayahuasca." **The Toad of**

 From man's best friend to wild beasts, five of the most enduring tales of animals in literature—tog

ether in one collection for animal lovers of all ages. Animals as characters have played a significant part in literature, from Aesop's ancient fables and the Garden of Eden story to contemporary literature. Gathered in this single volume are some of the most memorable animal stories that continue to stand the test of time. The Jungle Book: Travel to the wilds of colonial India in this

collection of seven tales centered on a young boy named Mowgli, who is raised by wolves in the jungle—with a supporting cast featuring a bear, a panther, a tiger, a python, and a tribe of monkeys. *Black Beauty*: A nineteenth-century English horse recounts his dramatic life story, from his carefree youth on the farm to trying times pulling cabs in London. *The Call of the Wild*: Buck the dog lived a

happy life in California until his master's greed launches him on a life-changing journey in the Klondike Gold Rush of the 1890s. *The Wind in the Willows*: Hold on to your hats and take a seat beside Mole, Rat, Badger, and the incomparable Toad as they encounter all kinds of adventure in the English countryside. *The Story of Doctor Dolittle*: An English physician discovers how

to speak to animals through his parrot, Polynesia, and soon sets sail for Africa, where he encounters monkeys, a vengeful king, fearsome pirates, and the rare pushmi-pullyu. *Children's Catalog* Broadview Press "The Toad of Dawn is the dramatic story of how Dr. Octavio Rettig Hinojosa - a Mexican doctor with a crack cocaine addiction - came to heal himself by employing an

As aide-de-camp to Brigadier General George Crook, he had an insider's view of the early Apache campaigns, the Great Sioux War, the Cheyenne Outbreak, and the Geronimo War. Bourke's	writings reveal much about military life on the western frontier, but he also was a noted ethnologist, writing extensive descriptions of American Indian civilization and illustrating his diaries with sketches and photographs. Previously, researchers could consult only a small part of Bourke's diary material in various publications, or else take a research trip to the archive and microfilm
--	--	---

housed at West Point. Now, for the first time, the 124 manuscript volumes of the Bourke diaries are being compiled, edited, and annotated by Charles M. Robinson III in an easily accessible form to the modern researcher. This fifth volume opens at Fort Wingate as Bourke prepares to visit the Navajos. Next, at the Pine River Agency, he is witness to the Sun

Dance, where despite his discomfort at what he saw, he noted that during the Sun Dance piles of food and clothing were contributed by the Indians themselves, to relieve the poor among their people. Bourke continued his travels among the Zunis, the Rio Grande pueblos, and finally, with the Hopis to attend the Hopi Snake dance. The volume concludes at Fort Apache, Arizona, which is stirring with excitement

over the activities of the Apache medicine man, Nakai'-dokli'ni, which Bourke spelled Na Kay do Klinni. This would erupt into bloodshed less than a week later. Volume Five is especially important because it is the first in this series to deal almost exclusively with Bourke's ethnological research. Aside from a brief trip to the East Coast, most of the text involves his observations either during the Great

Oglala Sun Dance of 1881, or among the pueblos of New Mexico and Arizona. Bourke's account of the Sun Dance is particularly significant because it was the last one held by the Oglalas. The Hopi material in this volume served as the basis of The Snake Dance of the Moquis of Arizona, published three years later in 1884, and perhaps his best-known work after On the Border with Crook.

Extensively annotated and with a biographical appendix on Indians, civilians, and military personnel named in the diaries, this book will appeal to western and military historians, students of American Indian life and culture, and to anyone interested in the development of the American West. A journey from Burning Man to the Akashic Field that suggest how 5-MeO-DMT triggers the human capacity for higher knowledge through direct contact with the zero-point field •

Examines Bufo alvarius toad venom, which contains the potent natural psychedelic 5-MeO-DMT, and explores its entheogenic use •

Proposes a new connection between the findings of modern

physics and the knowledge held by shamans and religious sages for millennia The venom from Bufo alvarius, an unusual toad found in the Sonoran desert, contains 5-MeO-DMT, a potent natural chemical similar in effect to the more common entheogen DMT. The venom can be dried into a powder, which some researchers speculate was used ceremonially by Amerindian shamans.

When smoked it prompts an instantaneous break with the physical world that causes out-of-body experiences completely removed from the conventional dimensions of reality. In Tryptamine Palace, James Oroc shares his personal experiences with 5-MeODMT, which led to a complete transformation of his understanding of himself and of the very fabric of reality. Driven to comprehend

the transformational properties of this substance, Oroc combined extensive studies of physics and philosophy with the epiphanies he gained from his time at Burning Man. He discovered that ingesting tryptamines unlocked a fundamental human capacity for higher knowledge through direct contact with the zero-point field of modern physics, known to the

ancients as the Akashic Field. In the quantum world of nonlocal interactions, the line between the physical and the mental dissolves. 5-MeO-DMT, Oroc argues, can act as a means to awaken the remarkable capacities of the human soul as well as restore experiential mystical spirituality to Western civilization. **Children's Catalog of One Thousand Books**

Holstein-Friesian World Children's Literature Review
 In this monograph, I relate findings from more than 30 years of experiences and observations with this substance, in various user groups and individuals, both in the US and in Europe. I use the term underground in referring to the explorations with these substances, in the sense that they were hidden - out of

respect for the restrictions and prohibitions of mainstream culture. These are ethnographic field reports: first-hand observations from an underground sub-culture, accompanied by the experiences of a selected number of participant-observers. It is important to recognize that in research with these and other so-called psychedelic or entheogenic substances, one cannot limit the observations

and reflections solely to their physical and psychological effects. As most of the people cited here emphasize, the experiences with these substances at times can go far beyond their physical and psychological effects into the deepest and highest dimensions of our existence, both the cosmic and the spiritual.
