A visual history of the world's most famous and ubiquitous chair. The Monobloc is the bestselling piece of furniture of all time: an estimated one billion copies of this white plastic chair are in circulation all over the world. This book arises from a documentary by German film director Hauke Wendler, who spent eight years filming on five continents to explore the impact of the Monobloc on a global scale. Combining archival documentation with images from Wendler's film (to be released in 2022), this book complicates the narrative and mystery of the Monobloc's popularity. Embracing its ubiquity, it also addresses the chair's environmental,

economic and aesthetic impacts. How does the Monobloc threaten our environment and good taste? Finally, how has it become indispensable to millions of people for whom a chair is a chair and nothing more? This book offers insight, through film, photography and design history, into the story of how an unremarkable, stackable chair conquered the world. *Monobloc* BoD - Books on Demand Ranging over two millennia of history and culture, Koschorke considers such thinkers as Freud, Weber, Rousseau, and Kleist in an exploration that illuminates issues of historical, religious, artistic, psychological, and cultural

importance.

Molly Maverick is giving up dating, relationships and men in general. She might rethink that when she meets Ezra Baptiste.

He's all man when she's used to nothing but boys pretending to be grownups. So he'll need to find a different artist to paint his mural -- and a different graphic designer to help him with his website. He'll need to find someone else to glare at and flirt with and kiss. It can't be Molly - they are too different.

Fabian Lorig develops a procedure model for hypothesis-driven simulation studies which supports the design, conducting, and analysis of simulation experiments. It is

aimed at facilitating the execution of simulation studies with regard to the replicability and reproducibility of the results. In comparison to existing models, this approach is based on a formally specified hypothesis. Each step of the simulation study can be adapted to the central hypothesis and performed in such a way that it can optimally contribute to the verification and thus to the confirmation or rejection of the hypothesis.

Global South Powers in Transition DK Publishing (Dorling Kindersley)

When a young reader once asked Franz Fühmann if he considered his work to be science fiction, he was quick to deny it: he wanted nothing to do with the genre. As he began writing the stories that make up this volume, however, he found himself coming around to the idea of a hybrid genre-- what he calls in German Saiäns-Fiktischen, 'science fiktion' with a k. In seven interlocking

stories, Science Fiktion offers a steampunk takedown of the logic of the Cold War. In this imagined future, two nations compete for global dominance: Uniterr, an exaggeration of the Eastern Bloc, in which personal freedom is curtailed and life regulated with cartoonish strictness; and Libroterr, in which the decadence of the West has been pushed beyond all reason. The stories follow three young citizens of Uniterr: Jirro, a young neutrino physicist whose life is forever changed by a year spent abroad in Libroterr; Janno, a causologist condemned to a life of mediocrity in Uniterr's bureaucracy for the briefest of impure thoughts; and Pavlo, an inventor and a drunkard, whose

mind pushes against the limits of what his world allows. Through these three lives, Fühmann gradually unfolds the contours of their bizarre world in a master class of understated world making. As the reader is swept up in the madness of Libroterr's predator ads (which grab you on the street) and Uniterr's mandatory mind readings, Fühmann's dark comedy from the last century comes to seem all the more prescient in ours. A German twist on an Anglophone tradition, Science Fiktion provides a disturbing vision of the future from the other side of the Berlin Wall.

 ***Now available for preorder: KILL 'EM ALL,

the stunning sequel to KILL YOUR FRIENDS***
 The viciously funny novel by John Niven, bestselling author of Kill Your Friends and Straight White Male. What do you do when a homeless man knows your name? How about when he turns out to be a friend you haven't seen in twenty years? Do you treat him to a hot meal and see him on his way? Give him a wad of middle-class guilt money? Or take him in and get him back on his feet? For Alan, there's no question - only natural that he'd want to see his old mate Craig off the streets, even if only for a few nights, and into some clean clothes. But what if the successful life you've made for yourself - good job, happy marriage, lovely kids,

grand Victorian house (you did well out of the property boom, thank you very much) – is one that that your old pal would quite like to have too? Even if it means taking it from you? Following the divergent lives of two childhood friends, *No Good Deed* is a funny and painful examination of friendship, the strange currents of ambition, loathing, pity and affection that flow between people over the decades, and of men getting older as they fail and succeed.

Sometimes everything sucks. This unique, illustrated guide will help you move past negative thoughts and feelings and discover what truly matters to

you. If you struggle with negative thoughts and emotions, you should know that your pain is real. No one should try to diminish it. Sometimes stuff really does suck and we have to acknowledge it. Worry, sadness, loneliness, anger, and shame are big and important, but they can also get in the way of what really matters. What if, instead of fighting your pain, you realized what really matters to you—and put those things first in life? If you did that, maybe your pain wouldn't feel so big anymore. Isn't it worth a try? *Stuff That Sucks* offers a compassionate and validating guide to accepting emotions, rather than struggling against them. With this book as your guide,

you'll learn to prioritize your thoughts, feelings, and values. You'll figure out what you care about the most, and then start caring some more! The skills you'll learn are based on acceptance and commitment therapy (ACT). Yes, there are a few written exercises, but this isn't a workbook. It's a journey into the stuff that sucks, what makes that sucky stuff suck even more, and how just a few moments each day with the stuff that matters will ultimately transform the stuff that sucks into stuff that is just stuff. Make sense? Maybe you want to be more creative? Or maybe you simply want to do better in school or be a better friend? This book will show you how to focus

on what you really care about, so that all that other sucky stuff doesn't seem so, well, sucky anymore.

In August 1939, U-48, commanded by 'Vaddi' Schultze, took up a waiting position around England. Schultze showed himself to be a notable humanitarian: he addressed signals to Churchill giving positions of ship sinkings so that crews could be saved. By 1 August 1941 this most successful boat of World War II, had sunk 56 merchant ships one corvette.

Do schools work

differently in deprived and privileged neighbourhoods? As segregation is on the rise in many cities, this book explores how different neighbourhood contexts shape public organisations, by using an innovative approach that combines a Bourdieusian perspective and new institutional theory. Based on interviews and ethnographic data from two primary schools in Berlin, Germany, it shows how local social compositions, symbolic meanings of urban areas, and neighbourhood-based policy interventions structure schools. Educational professionals adapt to these structural differences. The book analyses how teachers'

understandings and practices vary by local context – and what that means for the reproduction of urban inequality.

In recent years, hedge funds' successful interventions in some large public companies have revealed their critical role in the corporate governance landscape in the United States and Europe. Due to public opinion, this new form of shareholder activism is accompanied by much polemic. This study examines the nature of hedge fund activism, the types of them, and the market's perception of interventions in the United States. Starting

with a distinction between shareholder activism by traditional institutions, and activism performed by hedge funds, the study elucidates why the latter may be more effective in monitoring management, and reduce agency costs. Analysing the Schedules 13D filed with the U.S. Securities and Exchange Commission, the study provides a classification of activists' demands into ten distinct categories, arguing that hostile forms of activism are not central for hedge funds, and some more aggressive types of activism are possibly used as a negotiating tool to achieve the activist's agenda. Using the event study methodology, the author estimates the

stock returns around the announcement date. For a better understanding of hedge fund activism, and their demands on target companies, the reader will find two original Schedule 13D filings accompanied by letters to the management. Finally, the paper concludes on a view of the subject through the prism of the 2007/ 2008 financial crisis, outlining some trends in the aftermath of the financial market turmoil.
