JAZMYN HATFIELD

Industrial Security Helion and Company

On 21 May 1980, under the codename Operation Tiro-Tiro, 32 Battalion attacked and routed a FAPLA brigade at Savate. Fifteen members of 32 Battalion were killed in the action and many more wounded. It was the highest South African casualty rate in a single skirmish since the start of the Border War. Overall, however, Savate was a significant victor

The book, made up of three parts, covers a wide spectrum of political economy issues on post-apartheid South Africa. Although the text is mainly descriptive, to explain various areas of the political economy of post-apartheid South Africa, the first and the last parts provide illuminating insights on the kind of society that is emerging during the twenty-one years of democracy in the country. The book discusses important aspects of the political history of apartheid South Africa and the evolution of post-apartheid society, including an important recap of the history of southern Africa before colonialism. The text is a comprehensive description of numerous political economy phenomena since South Africa gained its political independence and covers some important themes that have not been discussed in detail in other publications on post-apartheid South Africa. The book also updates earlier work of the author on policy and law making, land and agriculture, education and training as well as on poverty and inequality in post-apartheid South Africa thereby providing a wide-ranging overview of the socio-economic development approaches followed by the successive post-apartheid administrations. Interestingly, three chapters focus on various aspects of the post-apartheid South African economy: economic policies, economic empowerment and industrial development. Through the lens of the notion of democratic developmental state and taking apartheid colonialism as a point of departure, the book suggests that, so far, post-apartheid South Africa has mixed socio-economic progress. The author's extensive experience in the South African government ensures that the book has policy relevance while it is also theoretically sound. The text is useful for anyone who wants to understand the totality of the policies and legislation as well as the political economy interventions pursued since 1994 by the South African Government.

[Researching the Military](#) Springer Nature

The SAS veteran, mercenary and author of *No Mean Soldier* looks back on a life of combat in this revised and expanded edition of his classic memoir. Peter McAleese's *No Mean Soldier* set the bar

for the modern military memoir. This completely revised and expanded edition sees a philosophical McAleese revisiting his time with Britain's Parachute Regiment, the SAS, Rhodesia's SAS and the South African Defense Force's 44 Para Brigade. Peter also recounts a range of other adventures, from his experiences with private military companies to near fatal skydiving accidents. With previously unpublished photos from McAleese's private collection, *Beyond No Mean Soldier* delves deeper and further into the author's wide-ranging experiences, the men he's served with, and the operations he'd conducted. Here in startling detail are the Aden insurgency; covert operations with the Rhodesian SAS; one of the first ever operational HALO inserts in British military history; assaults on SWAPO positions with 44 Para's Pathfinder Company; a botched assassination attempt in Colombia; and much more.

[A Military History of Modern South Africa](#) Taylor & Francis

A gripping firsthand account of life and combat operations in the elite South African Special Forces, known as Recces, by a veteran Recce officer. The South African Special Forces are one of the most effective—and mysterious—military units in the world. Working in secret on covert operations, the legendary Recces have long fascinated, but little is known about how they operate. Now Koos Stadler, a career officer in the South African Special Forces, shares a revealing chronicle of his life and his experiences in the Border War. Shortly after passing the grueling Special Forces selection course in the early 1980s, Koos Stadler joined the so-called Small Teams group at 5 Reconnaissance Regiment. This sub-unit was made up of two-man teams and was responsible for many secret missions behind enemy lines. Sent to blow up railway lines and enemy fighter jets in south Angola, Stadler and his partner stared death in the face many times.

[Contemporary Issues in South African Military Psychology](#) Taylor & Francis

This timely book examines how the South African National Defence Force has adapted to the country's new security, political and social environment since 1994. In South Africa's changed political state, how has civilian control of the military been implemented and what does this mean for 'defence in a democracy'? This book presents an overview of the security environment, how the mission focus of the military has changed and the implications for force procurement, force preparation, force employment and force sustainability. The author addresses other issues, such as: · the effect of integrating former revolutionary soldiers into a professional armed force · the effect of affirmative action on meritocracy, recruitment and retention · military veterans, looking at the difficulties they face in reintegrating back into society and finding gainful employment · gender equality and mainstreaming · the rise of military unions

and why a confrontational, instead of a more corporatist approach to labour relations has emerged · HIV/AIDS and the consequences this holds for the military in terms of its operational effectiveness. In closing, the author highlights key events that have caused the SANDF to become 'lost in transition and transformation', spelling out some lessons learned. The conclusions she draws are pertinent for the future of defence, security and civil-military relations of countries around the world.

[Political Economy of Post-apartheid South Africa](#) Simon and Schuster

Book & CD. This fourth edition makes it clear that all who are interested in the sustainability of South Africa -- and Africa -- must put human resource management (HRM) at the very core of the management of organisations generally. The content is aligned to outcomes that are geared towards analytical and critical thinking about the theory and practice of HRM in South Africa. The African context is addressed, and ample information about HRM aspects 'elsewhere in Africa' is provided. This edition breaks away even further from the traditional structure of so many standard HRM textbooks. It challenges a broadening of the 'agenda' and scope of HRM work: HRM is not only about managing employees, but also about managing the work and the people who do the work of and in organisations. This may involve alternative ways of getting the work of organisations done superiorly. This book will help you to apply HRM effectively to achieve its ultimate aim, namely to add value to people, to organisations and to society. This comprehensive book is organised around themes such as: Developing an appreciation for the context of HRM in South Africa; Strategising, designing and planning as preparatory HRM work; Sourcing work talent; Facing the countrys people empowerment challenge; Meeting the reward and care challenge; Handling labour and employee relations challenges; Championing change and transformation; Managing HRM-related information, including HRM and sustainability reporting. Based on most recent theoretical developments, the emphasis is on the practical applications. Samples of relevant documents are included, and an accompanying CD contains a wealth of relevant resources as well as a continuing, integrating case study that serves as a basis for these applications, and individual and group activities. As a package, South African Human Resource Management will be extremely valuable to both current and aspirant managers, and human resource practitioners.

Proceedings of conference held 10-15 August 2003 in Bucharest, Romania.

African Peacekeeping Springer Nature

A comprehensive and practical guide to security organization and planning in industrial plants Features Basic definitions related to plant security Features Countermeasures and response methods Features Facilities and equipment, and security organization Topics covered are applicable to multiple types of industrial plants Illustrates practical techniques for assessing and evaluating financial and corporate risks

Security in an Interconnected World CRC Press

This edited volume provides a critical and comparative discussion of the changing synergy between the military and society in the dramatically transforming global security climate, drawing on examples from the Asian, Pacific, African, Middle Eastern, European and South American regions. The book is interdisciplinary and covers wide-ranging issues relating to civil military relations, democratization, regional security, ethnicity, peace-building and peace keeping, civilian oversight, internal repression, gender, regime change and civil society.

State, Foreign Operations, and Related Programs Appropriations for 2016 Penguin Random House South Africa

A fast-moving, action-packed account of Granger Korff's two years' service during 1980/81 with 1 Parachute Battalion at the height of the South African 'bush war' in South West Africa (Namibia) and Angola. Apart from the 'standard' counterinsurgency activities of Fireforce operations, ambushing and patrols, to contact and destroy SWAPO guerrillas, he was involved in several massive South African Defence Force (SADF) conventional cross-border operations, such as Protea, Daisy and Carnation, into Angola to take on FAPLA (Angolan MPLA troops) and their Cuban and Soviet allies. Having grown up as an East Rand rebel street-fighter, Korff's military 'career' is marred with controversy. He is always in trouble—going AWOL on the eve of battle in order to get to the front; facing a court martial for beating up, and reducing to tears, a sergeant-major in front of the troops; fist-fighting with Drug Squad agents; arrested at gunpoint after the grueling seven-week, 700km Recce selection endurance march—are but some of the colorful anecdotes that lace this account of service in the SADF.

The Chicago Manual of Style John Wiley & Sons

Women and Gender Perspectives in the Military compares the integration of women, gender perspectives, and the women, peace, and security agenda into the armed forces of eight countries plus NATO and United Nations peacekeeping operations. This book brings a much-needed crossnational analysis of how militaries have or have not improved gender balance, what has worked and what has not, and who have been the agents for change. The country cases examined are Sweden, the Netherlands, Canada, the United States, the United Kingdom, Israel, Australia, and South Africa. Despite increased opportunities for women in the militaries of many countries and wider recognition of the value of including gender perspectives to enhance operational effectiveness, progress has encountered roadblocks even nearly twenty years after United Nations Security Council Resolution 1325 kicked off the women, peace, and security agenda. Robert Egnell, Mayesha Alam, and the contributors to this volume conclude that there is no single model for change that can be applied to every country, but the comparative findings reveal many policy-relevant lessons while advancing scholarship about women and gendered perspectives in the military.

32 Battalion Sun Press

This book provides an interdisciplinary overview of the causes and impacts of COVID-19 on populations, economies, politics, institutions and environments from all world regions. The book

maps the causes, effects and impacts of the virus and describes the impact of the virus on among others health care, teaching and learning, travel, tourism, daily life, local and regional economies, media impacts, elections, and indigenous populations and much more. Contributions to this book come from the humanities, social and policy science disciplines as well as from emerging transdisciplinary fields including climate change, sustainability, health care and epidemiology, security, art, visualization, economic and social well-being, law and borderland studies. As such, this book will be a rich source of information to all those geographers, social scientists and urban and regional planners working in this field.

COVID-19 and a World of Ad Hoc Geographies African Sun Media

Colonel Mike Hoare led 300 'Wild Geese' across the Congo to crush a communist rebellion, rescue 2000 nuns and priests from barbarity, beat Che Guevara ... and become a legend. Of Irish blood, Mike was schooled in England and, during World War 2, was the 'best bloody soldier in the British Army'. He demobbed as major, qualified in London as a chartered accountant and emigrated to South Africa. Going rogue, he started living dangerously to get more out of life, including trans-Africa motorbike trips, bluewater sailing, exploring remote areas, and leading safaris in the Kalahari Desert. Here Mike got to know the CIA agent who was to change his life ... and who was to stop Nelson Mandela's. Later Mike was technical advisor to the film *The Wild Geese*, which starred Richard Burton playing the Mike Hoare character. In 1981 Mike led 50 'Frothblowers' in a bid to depose the socialist government of the Seychelles. Things went wrong and soon Mike was to spend three years in jail for hijacking a Boeing 707. In this, the story behind the story - rich in new material - Mike's son Chris separates the man from the myth in a way only a son can, and concludes his 'mad dad' was an officer and a gentleman with a bit of pirate thrown in.

U.S. Army Leadership Handbook Biteback Publishing

GEOTECHNICAL ASPECTS OF UNDERGROUND CONSTRUCTION IN SOFT GROUND comprises a collection of 112 contributions presented at the Tenth International Symposium on Geotechnical Aspects of Underground Construction in Soft Ground, held in Cambridge, United Kingdom, 27-29th June 2022. This 2nd edition also includes four general reports on the symposium themes which give an overview of the papers submitted to the symposium, covered in four technical sessions. The symposium is the latest in a series which began in New Delhi in 1994, and was followed by symposia in London (1996), Tokyo (1999), Toulouse (2002), Amsterdam (2005), Shanghai (2008), Rome (2011), Seoul (2014) and Sao Paulo (2017). This symposium was organised by the Geotechnical Research Group at the University of Cambridge, under the auspices of the Technical Committee TC204 of the International Society for Soil Mechanics and Geotechnical Engineering (ISSMGE). Geotechnical Aspects of Underground Construction in Soft Ground includes contributions from more than 25 countries on the research, design and construction of underground works in soft ground. The contributions cover the following themes: Field case studies Sensing technologies and monitoring for underground construction in soft ground Physical and numerical modelling of tunnels and deep excavations in soft ground Seismic response of underground infrastructure in soft ground Design and application of ground improvement for underground construction Ground movements, interaction with existing structures and mitigation measures Similar to previous editions, GEOTECHNICAL ASPECTS OF UNDERGROUND CONSTRUCTION IN SOFT GROUND represents a valuable source of reference on the current practice of analysis, design, and construction of tunnels and deep excavations in soft ground. The

book is particularly aimed at academics and professionals interested in geotechnical and underground engineering.

Apartheid Georgetown University Press

Military Psychology for Africa is the first textbook of its kind from Africa. Selected authors with competent military psychology knowledge, skills, expertise and experience each contributed a chapter to this unique book. The book empowers academics, students and military fellows to apply this knowledge at academic institutions and military units, during operations, and in presenting short courses. The book will also equip soldiers with new knowledge for advancing peace on the continent and abroad.

Failed States and Institutional Decay Routledge

What do we mean by failed states and why is this concept important to study? The "failed states" literature is important because it aims to understand how state institutions (or lack thereof) impact conflict, crime, coups, terrorism and economic performance. In spite of this objective, the "failed state" literature has not focused enough on how institutions operate in the developing world. This book unpacks the state, by examining the administrative, security, judicial and political institutions separately. By doing so, the book offers a more comprehensive and clear picture of how the state functions or does not function in the developing world, merging the failed state and institutionalist literatures. Rather than merely describing states in crisis, this book explains how and why different types of institutions deteriorate. Moreover, the book illustrates the impact that institutional decay has on political instability and poverty using examples not only from Africa but from all around the world.

South Africa's Post-Apartheid Military Penguin Random House South Africa

A well-timed, extremely thought-provoking imperative, particular to the African context, that deals with a highly contemporary issue within the people management and the management studies fields specifically in the military context.

Recce Springer Nature

South Africa is popularly perceived as the most influential nation in Africa – a gateway to an entire continent for finance, trade and politics, and a crucial mediator in its neighbours' affairs. On the other hand, post-Apartheid dreams of progress and reform have, in part, collapsed into a morass of corruption, unemployment and criminal violence. A Short History of South Africa is a brief, general account of the history of this most complicated and fascinating country – from the first evidence of hominid existence to the wars of the 18th, 19th and 20th centuries that led to the establishment of modern South Africa, the horrors of Apartheid and the optimism following its collapse, as well as the prospects and challenges for the future. This readable and thorough account, illustrated with maps and photographs, is the culmination of a lifetime of researching and teaching the broad spectrum of South African history. Natrass's passion for her subject shines through, whether she is elucidating the reader on early humans in the cradle of humankind, or describing the tumultuous twentieth-century processes that shaped the democracy that is South Africa today.

Systems Thinking Routledge

Contemporary Issues in South African Military Psychology, is a well-timed, extremely thought-provoking, imperative, particular to the African context, and deals with a highly contemporary issue within the people management and the management studies fields specifically in the military field and context. This is specifically of importance as military psychology is a behavioural science that combines theory and practical application. - Prof Karel Stanz, University of Pretoria
