"I began building tiny houses back in 2009 when I built one for my mom. The house she was living in was starting to fall apart and become unlivable, so I knew I had to find her alternative housing. After researching various options I discovered the tiny house movement and realized that it was the perfect solution for her. A tiny house could be constructed to very high standards and still be affordable, plus it can be easily moved."--author.

While some people thrive on extravagance and lavishness, to be able to signify opulence and sense of worth, some people regard this excess, ridiculous. It makes sense too. One single person occupies a small space in the world, why does he need a massive dwelling place? Why the need for all the fluff when things can be kept simple? There are basically two types of tiny houses, with homes a little larger than others, and the smallest of its kind that are less than 200 square feet. To be included in this category, a home has to be less than 1,000

square meters The concept of tiny houses appeal to many because too much is often overwhelming. It is in the simplicity and straightforwardness of living that you get to appreciate life's intricate corners. As a matter of fact, if you take time to ask a tiny house owner, he will tell you that the biggest lure is the craftiness-when you're able create something so brilliant, it raises eyebrows-that's the main satisfaction. Tiny house dwellers live a life, worthy of applause. It is truly magical to be able to live large in a tiny place. If you are considering the leap from traditional living to this concept, then this is all you need. Here is a preview of what this book offers:

How to Build a Tiny House Tilt

Development

Part how-to, part

personal memoir, The

Big Tiny is an utterly

seductive meditation

on the benefits of slowing down, scaling back, and appreciating the truly important things in life. More than ten years ago, a near-death experience abruptly reminded sustainability advocate and pioneer Dee Williams that life is short. So, she sold her sprawling home and built an eighty-four-square-foot house—on her own, from the ground up. Today, Williams can list everything she owns

on one sheet of paper, her monthly housekeeping bills amount to about eight dollars, and it takes her about ten minutes to clean the entire house. Adapting a new lifestyle left her with the ultimate luxury—more time to spend with friends and family—and gave her the freedom to head out for adventure at a moment's notice, or watch the clouds and sunset while drinking a beer on her (yes, tiny) front porch.
