This autobiography chronicles the life and career of Haralampos M. Moutsopoulos, an internationally renowned professor of medicine and prolific researcher on Sjögren's syndrome and autoimmune rheumatic diseases. In language that is simple and direct, he takes us on a fascinating journey from the days of his

first scientific awakenings at a hospital in his native town of Ioannina, Greece, through his university years in Athens and training in the U.S., to his eventual return to his homeland. In Greece, he developed two centers of excellence in his field, first at the newly founded University of Ioannina Medical School Department of Internal Medicine and, second, at the Athens University Medical School, Department of Pathophysiology, where he taught until his retirement in 2011. Along the way, he introduces us to his teachers and mentors, and to the colleagues and

students he mentored in turn, many of whom went on to assume high-ranking positions in Greece and abroad. A major theme throughout the book is his impassioned struggle for excellence, meritocracy, and transparency in universities and in the National Health System in Greece. Peppered with both amusing and unsettling incidents from this lifelong crusade to raise professional standards and against misconduct, the book is a must-read for anyone interested in learning about or entering the medical profession.

"Graduate school enrollment is up significantly and more students than ever need help figuring out how to finance their education. It's more expensive than undergrad, and most students can no longer count on mom and dad for financial support. Paying for Graduate School Without Going Broke, now in its second year, advises students on how to get the aid they need to attend the schools they want. With our exclusive EFC calculator

and FAFSA Worksheet, we give expert tips on increasing student-aid eligibility, and our experts show how to find hidden funding resources."

When they prepare for medical school, few candidates take the time to acquire the caliber of recommendation letters they will need to distinguish themselves in a highly competitive applicant pool. This book, which was written by an Ivy League admissions expert, offers detailed advice to write (and get) persuasive letters that highlight the personal, academic and professional strengths the committee expects to see. It also includes 45 successful recommendation letters, including several that "explain" extenuating circumstances in a candidate's history (such as disappointing grades, a gap in employment, and low MCAT scores). At top medical schools, where the competition is fierce, the quality

and depth of a candidate's reference letters can make the difference between acceptance and rejection. Whether you are an applicant who needs a persuasive letter of recommendation, or someone who has been asked to write one, this exceptional book is mandatory reading. *Health Resources Statistics* Frontiers Media SA

Communication Skills for the Environmental technician This book provides environmental technology students with an enjoyable way to quickly master the basic communication skills needed by the environmental technician. Like all the books in the critically acclaimed Preserving the Legacy series, it follows a rapid-learning modular format featuring learning objectives, summaries, chapter-end reviews, practice questions, and skill-building activities. The only book available that specifically addresses the communication responsibilities of the environmental technician, it offers a thorough review of corporate communication basics and covers the environmental documents commonly generated by technicians. Communication Skills for the Environmental Technician

features: * Advice on foundation reading and technical writing skills, including mastery of outlining and grammar awareness * Chapters on writing skills for business letters and memos; technical documents such as contingency plans, logbooks, and field notes; and completion and filing procedures for numerous reporting forms * In-depth coverage of oral communication skills, both for formal presentations and informal conferencing * Specifics of the job search: creating portfolios, writing resumes and cover letters, and performing well in the interview setting With its comprehensive coverage and quick-reference format, *Communication Skills for the Environmental Technician* is also a handy resource for any environmental technician needing a helpful refresher or useful working reference. The HAZARDOUS MATERIALS TRAINING AND RESEARCH INSTITUTE (HMTRI), recognized by agencies including the EPA, the National Science Foundation, and the National Institute of Environmental Health

Sciences, was established in 1987 in Cedar Rapids, Iowa, with the intention of promoting worker protection and the maintenance of a clean and safe environment through education and training.

Seasoned classroom veterans, pre-tenured faculty, and neophyte teaching assistants alike will find this book invaluable. HHMI Professor Jo Handelsman and her colleagues at the Wisconsin Program for Scientific Teaching (WPST) have distilled key findings from education, learning, and cognitive psychology and translated them into six chapters of digestible research points and practical classroom examples. The recommendations have been tried and tested in the National Academies Summer Institute on Undergraduate Education in Biology and through the WPST. Scientific Teaching is not a prescription for better teaching. Rather, it encourages the reader to approach teaching in a way that captures the spirit

and rigor of scientific research and to contribute to transforming how students learn science.
