Praise for Directory of Global Professional Accounting and Business Certifications "In a globalized world, employers are confronted by a bewildering variety of professional qualifications, some valid, some less weighty and some spurious and fraudulent. This excellent compilation enables the reader to touch base with such organizations and explore their true credentials through access to their whereabouts including Web sites. It is additionally pleasing that updates will be provided via the publisher's own Web site." --Professor Dr. Gerald Vinten Deputy Principal, Thames Graduate School, Ilford, London Past president, chairman and committee chair, and member of several professional bodies (including the Institute of Internal Auditors, Royal Society of Health, CIPFA, and AAT) "I've often wondered what the 'alphabet soup' after some colleagues' names means and how impressed I really should be. Now I can find out!...This directory will be a valuable reference guide for human resource professionals and anyone else who wants to know what those letters mean and how seriously to take them." --James Roth, PhD, CIA, CCSA President, AuditTrends "The Directory of Global Professional Accounting and Business Certifications by Lal Balkaran is an indispensable reference source for anyone involved in the international accounting, auditing, and business professions. It is global, comprehensive, accurate, and easy to use. It is like having a personal contact book to all

the world's professional organizations." --Belverd E. Needles Jr. Ernst & Young Alumni Professor, DePaul University Organized as a directory for easy reference of accounting and business designations, designatory letters, and contact information of all disciplines, Directory of Global Professional Accounting and Business Certifications contains over 960 bodies administering well in excess of 2000 designations and designatory letters in 145 countries. This handy, yet comprehensive, directory also provides an index with a country-by-country listing of the professional designations that exist there.

In this new book a group of 18 distinguished authors presents comprehensive surveys of current issues in the field of finance and development. . . This book nicely bridges the gap between general research on the role of finance for economic growth and the role finance plays for developing economies and poverty reduction. . . Moreover, the authors identify a great number of promising ideas for future research. . . Ryszard Kokoszczyński, SUERF Newsletter The European Money & Finance Forum In the last two decades, the role of finance in the development process has become a major topic of research and debate. Although it is widely agreed that there is an important link between the two, there is much less consensus on the exact nature of the relationship. Is financial development a prerequisite for general economic development, or is it a more passive by-product of the development process? In this valuable new book, a distinguished group of authors takes stock of the existing state of knowledge in the field of finance and the development process. Each chapter offers a comprehensive survey and synthesis of current issues. These include such critical subjects as

savings, financial markets and the macroeconomy, stock market development, financial regulation, foreign investment and aid, financing livelihoods, microfinance, rural financial markets, small and medium enterprises, corporate finance and banking. This book will be accessible to postgraduate and advanced undergraduate students of finance and development. It will also be an essential reference source for all professionals and academics working in this area who want to learn how finance can contribute to the development process and poverty reduction.

First published in 1997, this edited volume emerged in response to Zambia's recent reinstatement of multiparty democracy and its ensuing economic, social policy and public administrative reform. Following the establishment of the single party state under the United National Independence Party in 1972, a severe decline in the price of copper (Zambia's principle export) resulted in high national debt and increasing riots. This volume situates itself in response to the transition from the UNIP to the Movement for Multiparty Democracy (MMD), seeing it as a verdict delivered by the people. Its authors aim to explore the causes of this verdict through areas such as financial innovation, land policy, the health industry and universities. They thoroughly examine the attempts and potential pitfalls of the reform programme as well as its impact on Zambian society. The general conclusion reached by the contributors to this volume is that while the reform programme is a necessary condition for economic rebirth its details require careful consideration in order to ensure it has the desired socio-economic impact on the people of Zambia. This should also serve as an important example to other countries embarking on similar programmes of reform.

This publication contains the proceedings of the 19th session of the Intergovernmental Working Group of Experts on International Standards of Accounting and Reporting (ISAR), held in Geneva from 25-27 September 2002. The session dealt with two main agenda issues: accounting for small and medium-sized enterprises, and transparency and disclosure requirements for corporate governance. The publication also includes three articles which consider developments in accounting education and training in the Baltic countries; international accounting education standards for professional accountants and trends in global education; and the International Accounting Standards Board and its proceedings.

This book analyses the role of public sector accounting, and the relevance of accounting frameworks, in assisting financially sustainable policy making. Focussing on the European context, the book examines financial reporting, management accounting, budgeting and other reporting requirements, for example, Government Finance Statistics. It also analyses emerging forms of reporting, such as popular reporting and integrated reporting, which may also be considered by policy makers, standard setters, and managers of public sector entities.

Some see trade in services as irrelevant to the development agenda for least developed countries (LDCs). Others see few benefits from past market openings by LDCs. This book debunks both views. It finds that serious imperfections in Zambia's reform of services trade deprived the country of significant benefits and diminished faith in liberalization. What is to be done? Move aggressively and consistently to eliminate barriers to entry and competition. Develop and enforce regulations to deal with market failures. And implement proactive policies to widen the access of firms, farms, and consumers to services of all kinds. These lessons from Zambia are applicable to all LDCs. In all this, international agreements can help. But to succeed, LDCs must commit to open markets and their trading partners must provide assistance for complementary reforms. Zambia, which leads the LDC group at the World Trade Organization, can show the way.

The study presents archival evidence to show how President Kaunda raised political and economic exclusivity in Zambia in the early years of Zambia's independence, and how this retarded capital investment. Despite formal reforms and a new government, this institutional mechanism still dominates and constrains Zambia's political economy today.

This handbook offers a comprehensive and authoritative account of the Zambian economy, including past and current trends. The Zambian economy has evolved from simple and fragmented agrarian activities at the turn of the 20th Century into a wide range of organized and regulated modern economic activities today. While the economy has largely revolved around the mining industry since the early 1920s when the extraction of copper and other mineral ores on the Copperbelt began, there has been a gradual broadening of economic activities over time, with services now accounting for almost two-thirds of gross domestic product (GDP). This book shows that since colonial times, one of the persistent items on the economic development agenda in what is today known as Zambia has been the need to diversify the economy to reduce dependence on mining, in terms of foreign exchange earnings and public revenue. While the need to diversify the economy has been well-acknowledged by successive Zambian governments, including the current government, achieving this goal has proved to be elusive so far. By presenting a collection of well-researched and empirically supported chapters on the key areas of the Zambian economy, this volume gives readers a good sense of where the Zambian economy has come from, where it is at the moment, but also highlights the challenges and prospects for economic growth.

Accounting practice, whether in business or government, is more dynamic, more complex, and addresses a wider array of issues than it did as little as five years ago. Significant and rapid social, political, technological and economic changes are taking place in the world economy and it is increasingly recognised that accountants in all countries play a key role in the process of economic development. Accounting education is undergoing a thorough review on a worldwide basis and major developments are taking place to produce quality accounting education that can keep pace with dramatic world change. This book provides an up-to-date view of the state of accounting education throughout the world and focusses on the global challenges facing accounting education as we approach the millennium.

Legal Aspects of Banking Regulation Corwin Press

International trade in 2009 is projected to contract for the first time since 1982. As a result, export diversification has gained new urgency as one way of using exports to recover lost growth momentum. Moreover, diversification is central to reducing income volatility and sustaining high growth rates, which are especially important for countries with large populations living in poverty. In the 1950s, countries became concerned that their dependence on primary products would lead to steady falls in the purchasing power of primary exports and thus slow growth. A major policy objective of developing countries since that time has been to diversify out of primary products into manufactures. Although some nations have been at least partially successful, many low-income countries remain dependent on a narrow range of primary products. 'Breaking Into New Markets' argues for a comprehensive view of diversification. It explores new thinking and evidence about export diversification and elaborates on policies for its promotion. These policies span tariffs and taxes, services, and government activities to help firms take advantage of global opportunities. The book is a compilation of chapters written as short, policy-focused pieces. Many digest longer, more academic papers in an effort to make the information accessible to a larger policy and nontechnical audience. In that sense, the book is a policy primer on what export diversification can and cannot do for growth and how to make diversification happen. Intelligently designed policies that efficiently address the obstacles to export growth are critical for overall economic growth and poverty reduction. This book offers insights useful to policy makers and practitioners as they embark on efforts to design new programs of competitiveness in their trade strategies.

Migrants have long faced unwarranted constraints to sending money to family members and relatives in their home countries, among them costly fees and commissions, inconvenient formal banking hours, and inefficient domestic banking services that delay final payment to the beneficiaries. Yet such remittances are perhaps the largest source of external finance in developing countries. Officially recorded remittance flows to developing countries exceeded US\$125 billion in 2004, making them the second largest source of development finance after foreign direct investment. This book demonstrates that governments in developing countries increasingly recognize the importance of remittance flows and are quickly addressing these constraints.
