Legal Challenges to the Far-Right

Springer
How can you avoid the common pitfalls when navigating the complexities of personal injury limitation periods? This is a guide to the law of limitation periods in personal injury actions. Pitfalls and problems are highlighted and the limitation periods and service rules are clearly explained,

ensuring that you never issue or serve proceedings outside the legal time limits. Each chapter is supplemented by summaries of the key cases for that topic and Part 2 contains all the relevant legislation. New coverage includes landmark cases, explaining and analysing their impact on practice: - Collins v Secretary of State for Business, Innovation and Skills (Court of Appeal, 2014)

- an asbestos-related lung cancer case of 'seminal importance in relation to long tail industrial disease claims' - Platt v BRB (Residuary) Ltd (Court of Appeal, 2014) - examination of constructive knowledge in the context of limitation in disease cases - RE v GE (2015) - consideration of the court's discretion, conferred by section 33 of the Limitation Act 1980 in the context of a sexual

This work will be of interest to graduate-level students (as well as upper-level undergraduates) in Criminology & Criminal Justice, particularly with a focus on white collar and corporate crime, as well as related

fields like business and management. *Police-Citizen Relations Across the World* Oxford University Press This compilation represents the first study to examine the historical evolution and shifting global dynamics of policing across the Lusophone community. With contributions from a multi-disciplinary range of experts, it traces the role of policing within and across settings that

are connected by the shared legacy of Portuguese colonialism. Previously neglected within studies of the globalisation of policing, the Lusophone experience brings novel insights to established analyses of colonial, post-colonial and transnational policing. This compilation draws research attention to the policing peculiarities of the Lusophone community. It proposes new cultural settings within

which to test dominant theories of policing research. It uncovers an important piece of the jigsaw that is policing across the globe. Key research questions that it addresses include: • What were the patterns of policing, and policing transfers, across Portuguese colonial settings? • How did Portugal's dual status as both fascist regime and imperial power shape its late

colonial policing? • What have been the different experiences of post-colonial and transitional policing across the former Portuguese colonies? • In what ways are Lusophone nations contributing to, and indeed shaping, patterns of transnational policing? • What comparative lessons can be drawn from the Lusophone policing experience? **Leading the Police**

Nature
Police-citizen relations are in the public spotlight following outbursts of anger and violence. Such clashes often happen as a response to fatal police shootings, racial or ethnic discrimination, or the mishandling of mass protests. But even in such cases, citizens' assessment of the police differs considerably across social groups. This raises the question of the sources

and impediments of citizens' trust and support for police. Why are police-citizen relations much better in some countries than in others? Are police-minority relations doomed to be strained? And which police practices and policing policies generate trust and legitimacy? Research on police legitimacy has been centred on US experiences, and relied on

procedural justice as the main theoretical approach. This book questions whether this approach is suitable and sufficient to understand public attitudes towards the police across different countries and regions of the world. This volume shows that the impact of macro-level conditions, of societal cleavages, and of state and political institutions on police-citizen relations has

too often been neglected in contemporary research. Building on empirical studies from around the world as well as cross-national comparisons, this volume considerably expands current perspectives on the sources of police legitimacy and citizens' trust in the police. Combining the analysis of micro-level interactions with a perspective on the contextual framework and varying national

conditions, the contributions to this book illustrate the strength of a broadened perspective and lead us to ask how specific national frameworks shape the experiences of policing.

In 2015 the College of Policing published its Leadership Review with specific reference to the type of leadership required to ensure that the next generation of Chief

Constables and their management approach will be fit for purpose. Three key issues were highlighted as underpinning the effective leadership and management of contemporary policing: hierarchy, culture and consistency. Yet these are not just relevant to modern policing, having appeared as constant features, implicitly and explicitly, since the creation of the

first provincial constabularies in 1835. This collection reviews the history of the UK Chief Constable, reflecting on the shifts and continuities in police leadership style, practice and performance over the past 180 years, critiquing the factors affecting their operational management and how these impacted upon the organization and service delivery of their forces. The individuality of

<p>Chief Constables significantly impacts on how national and local strategies are implemented, shaping relationships with their respective communities and local authorities. Importantly, the book addresses not just the English experience but considers the role of Chief Constables in the whole of the United Kingdom, highlighting the extent to which they could exercise</p>	<p>autonomous authority over their force and populace. The historical perspective adopted contextualises existing considerations of leadership in modern policing, and the extensive timeframe and geographical reach beyond the experience of the Metropolitan force enables a direct engagement with contemporary debates. It also offers a valuable addition to the existing literature</p>	<p>contributing to the institutional memory of UK policing. The contributors represent a range of disciplines including history, law, criminology and leadership studies, and some also have practical policing experience. <i>Text, Cases and Materials on Public Law and Human Rights</i> Taylor & Francis The work considers the international and European obligations of the UK in the realm of challenging</p>

the far-right and assesses the extent to which it adheres to them. It looks at the role of criminal law in tackling hate speech and hate crime and assesses how English law deals with political parties which may deviate from agreed norms and principles such as non-discrimination. The legal analysis is placed within a contextual framework of far-right parties in the United Kingdom and also

incorporates a definitional framework in terms of how the law defines themes relevant to challenging the far-right, such as racial discrimination, terrorism and extremism. The book presents a valuable guide for students, academics and policy-makers in the areas of International Human Rights Law, Criminal Law, Comparative Constitutional Law, National Security Law, Comparative Politics and

Terrorism Studies. The Rise of Comparative Policing Taylor & Francis Critical Perspectives on the Management and Organization of Emergency Services makes an important contribution to the subject of emergency services management and to public administration and organization studies more generally. It critically assesses developments in emergency services

management by examining the multi-dimensional nature of the provision of emergency services and their connectedness in advanced western democracies. The effective management of emergency services has never been more important than in today's high-pressured and cost-conscious public sector. The authors of this volume forensically analyse the challenges of delivering emergency

services within this context. This book provides an in-depth, scholarly and comprehensive analysis of the changing landscape of emergency service provision and clearly addresses a gap in the market for a critical volume on the emergency services. For anyone seeking to understand why and how the management of emergency services matters, this collection is essential

reading. Applying Social Policy to Criminal Justice Practice BRILL This book aims to make clear the interconnections between social policy and criminal justice practice, bringing together key social policy concepts within a framework for reducing reoffending rates. The book focuses on the key social policy issues of employment, health and mental health, low income

and poverty, housing and family. It shows how understanding and treating these as issues interconnecte d to criminal justice outcomes can and does lead to improvements in criminal justice practice. This book enables students and criminal justice practitioners to understand how a social policy focus can better inform practice with those involved in the criminal justice

system. It features: - a 10 point summary of key points for learning; - chapter heading questions to support independent learning; - tables and graphs to illustrate the text.

This book examines how face recognition technology is affecting privacy and confidentiality in an era of enhanced surveillance. Further, it offers a new

approach to the complex issues of privacy and confidentiality , by drawing on Joseph K in Kafka's disturbing novel The Trial, and on Isaiah Berlin's notion of liberty and freedom. Taking into consideration rights and wrongs, protection from harm associated with compulsory visibility, and the need for effective data protection law, the author promotes ethical

practices by reinterpreting privacy as a property right. To protect this right, the author advocates the licensing of personal identifiable images where appropriate. The book reviews American, UK and European case law concerning privacy and confidentiality, the effect each case has had on the developing jurisprudence, and the ethical issues involved. As such, it offers a valuable resource for

students of ethico-legal fields, professionals specialising in image rights law, policy-makers, and liberty advocates and activists.

Face Recognition Technology

Oxford University Press
This book delivers insights into how social science and technology might aid new advancements in managing the complexity inherent within national and international

security landscape. The digital policing landscape is dynamic and intricate, emanating from crimes that are both persistent and transnational. Globalization, human and drug trafficking, cybercrime, terrorism, and other forms of transnational crime can have a significant impact on societies around the world. This necessitates a reassessment of what crime, national security, and

policing mean. Recent global events such as human and drug trafficking, the COVID-19 pandemic, violent protests, cyber threats, and terrorist activities underline vulnerabilities residing in our current security and digital policing posture. As an interdisciplinary collection of studies, this book encapsulates concepts, theories, and technology applications, offering a comprehensive analysis of

current and emerging trends and threats within the context of national and international security. Undertaking an evidence-based approach, this book offers an extraordinarily perceptive and detailed account of issues and solutions related to the complex national and international security landscape. To this end, the book: presents insights into emerging and potential technological and

methodological solutions as well as advancements in relation to integrated computational and analytical solutions that could be deployed for the purposes of national and international security; provides a comprehensive analysis of technical, ethical, legal, privacy, and civil liberty challenges stemming from the aforementioned advancements; and, accordingly, offers detailed

recommendations supporting the design and implementation of best practices including technical, ethical, and legal approaches for national and international security uses. The research contained in the book fits well into the larger body of work on various aspects of AI, cybersecurity, national security, digital forensics, cyberterrorism, ethics, human rights,

cybercrime, and law. It provides a valuable reference for LEAs and security organizations, policymakers, cybersecurity experts, digital forensic practitioners, researchers, academicians, graduates and advanced undergraduates, and other stakeholders with an interest in national and global security.

This book interweaves an

authoritative authorial commentary - significantly expanded from the last edition - with extracts from a diverse and contemporary collection of cases and materials from three leading academics in the field. It provides an all-encompassing student guide to constitutional, administrative and UK human rights law. This fourth edition provides comprehensive coverage of all recent developments,

<p>including the Fixed Term Parliaments Act 2011, restrictions on judicial review (Criminal Justice and Courts Act 2015), changes to judicial appointments (Crime and Courts Act 2013), the 2014 Scottish Independence Referendum, Scotland Act 2016 and draft Wales Bill 2016. Recent devolution cases in the Supreme Court, including Imperial Tobacco (2012) and</p>	<p>Asbestos Diseases (2015) are fully analysed, as is the 2015 introduction of English Votes for English Laws. The remarkable Evans (2015) 'Black Spider memos' case is considered in a number of chapters. The common law rights resurgence seen in Osborn (2013), BBC (2014) and Kennedy (2014) is analysed in several places, along with other key developments in judicial review such as</p>	<p>Keyu (2015) and Pham (2015). Ongoing parliamentary reform in both Lords and Commons, including major advances in controlling prerogative powers, are fully explained, as is the adaptation of the core Executive to Coalition Government (2010-2015). There is comprehensive coverage of key Strasbourg and HRA cases (Horncastle (2010),</p>

Nicklinson (2014), Moohan (2014), Carlile (2014)), and those in core areas of freedom of expression, police powers and public order (Animal Defenders (2013), Beghal (2015), Roberts (2015), Miranda (2016)) and the prisoners' voting rights saga, up to Chester (2015). The Asian Yearbook of Human Rights and Humanitarian Law John Wiley & Sons An important book from a tireless campaigner' Mishal Husain 'Sara Khan is a fearless and principled voice in the struggle for the soul of Islam. Everyone who cares about combatting prejudice should read her, befriend her and fight alongside her.' Nick Cohen Across Britain, Muslims are caught up in a battle over the very nature of their faith. And extremists appear to be gaining the upper hand. Sara Khan has spent the past decade campaigning for tolerance and equal rights within Muslim communities, and is now engaged in a new struggle for justice and understanding - the urgent need to counter Islamist-inspired extremism. In this timely and courageous book, Khan shows how previously antagonistic groups of fundamentalists Muslims have joined forces, creating

pressures that British society has never before encountered. What is more, identity politics and the attitudes of both the far Right and ultra-Left have combined to give the Islamists ever-increasing power to spread their message. Unafraid to tackle some of the pressing issues of our time, Sara Khan addresses the question of how to break the cycle of extremism without alienating

British Muslims. She calls for all Britons to reject divisive ideologies and introduces us to those individuals who are striving to build a safer future. [Policing and Mental Health](#) Bloomsbury Publishing This book provides an ethnography of street-level policing in the United States and offers an analysis with valuable lessons for today's law enforcement officers. Author George C. Klein,

sociologist and former police officer, explores the characteristics of policing in a suburb outside of large Midwestern city in the United States. As a participant-observation fieldworker, he functioned as an ethnographic researcher, recording with a sociological eye the "real world" tasks of policing, including the ordinary as well as the more remarkable aspects of day-to-day law

enforcement. He approaches the data with three levels of analysis, looking at embedded issues in policing, such as discretion, danger, corruption, cynicism, race, and class; a mid-range analysis that examines police work as an example of street-level bureaucracy; and a global analysis assessing the entrenched roles of race, class, and demography in police work, as well as, society, in the U.S. This book focuses on the need for police officers to solve social problems that other institutions in society are unwilling, or unable, to solve. It examines a myriad of issues, such as police socialization, the use of force by police officers, stress levels and suicide risk factors, disparate styles of policing, police militarization, de-escalation, and more. With compelling detail, the author helps the reader understand the turmoil regarding policing in the United States today. It is ideal for police professionals as well as students and scholars of criminal justice, criminology, sociology, psychology, history, political science and journalism.

Information Rights Policy Press
Examining the theory behind the headlines and engaging with current debates, this

new edition provides thoughtful, impartial, and unbiased coverage of sentencing and punishment in the UK. Collectively, Susan Easton and Christine Piper are highly experienced teachers and researchers in this field, making them perfectly placed to deliver this lively account of a highly dynamic subject area. The book takes a thorough and systematic approach to

sentencing and punishment, examining key topics from legal, philosophical, and practical perspectives. Offering in-depth and detailed coverage, while remaining clear and succinct, the authors deliver a balanced approach to the subject. Chapter summaries, discussion questions, and case studies help students to engage with the subject, apply their

knowledge, and reflect upon debates. Fully reworked and restructured, this fifth edition has been updated to include developments such as the Sentencing Act 2020 and changes following the 2019 general election. This is the essential guide for anyone studying sentencing and punishment as part of a law or criminology course.

 Routledge
 This book explores the relationship between policing and mental health. Police services around the world are innovating at pace in order to develop solutions to the problems presented, and popular models are being shared internationally.
 .
 Nevertheless, disparities and

perceptions of unfairness remain commonplace. Innovations remain poorly funded and largely unproven. Drawing together the insights of eminent academics in the UK, the US, Australia and South Africa, the edited collection evaluates the condition of mental health and policing as an interlocked policy area, uncovering and addressing a number of key issues which

are shaping police responses to mental health. Due to a relative lack of academic texts pertaining to developments in England and Wales, the volume contains a distinct section on relevant policies and practices. It also includes sections on US and Australian approaches, focusing on Crisis Intervention Teams (CITs), Mental Health Intervention Teams (MHITs), stressors and innovations from Boston in the US to Queensland in Australia. Written in a clear and direct style, this book will appeal to students and scholars in policing, criminology, sociology, mental health, cultural studies, social theory and those interested in learning about the condition and trajectory of police responses to mental health. *Young British Muslims* John Wiley & Sons "...the book fully justifies its title and will earn a well-thumbed place on the bookshelves, not only of children's lawyers, but also of children's guardians and intermediaries who need to understand how the court can, or cannot, assist the vulnerable to give evidence..." Named one of the best nonfiction books of the year by The Washington Post
“Tangled Up in Blue is a wonderfully insightful book

that provides a lens to critically analyze urban policing and a road map for how our most dispossessed citizens may better relate to those sworn to protect and serve.” —The Washington Post

“Remarkable . . . Brooks has produced an engaging page-turner that also outlines many broadly applicable lessons and sensible policy reforms.” —Foreign Affairs Journalist and law professor Rosa Brooks

goes beyond the "blue wall of silence" in this radical inside examination of American policing. In her forties, with two children, a spouse, a dog, a mortgage, and a full-time job as a tenured law professor at Georgetown University, Rosa Brooks decided to become a cop. A liberal academic and journalist with an enduring interest in law's troubled relationship with violence, Brooks wanted the kind of insider

experience that would help her understand how police officers make sense of their world—and whether that world can be changed. In 2015, against the advice of everyone she knew, she applied to become a sworn, armed reserve police officer with the Washington, DC, Metropolitan Police Department. Then as now, police violence was constantly in the news. The Black Lives

Matter movement was gaining momentum, protests wracked America's cities, and each day brought more stories of cruel, corrupt cops, police violence, and the racial disparities that mar our criminal justice system. Lines were being drawn, and people were taking sides. But as Brooks made her way through the police academy and began work as a patrol officer in the poorest,

most crime-ridden neighborhoods of the nation's capital, she found a reality far more complex than the headlines suggested. In *Tangled Up in Blue*, Brooks recounts her experiences inside the usually closed world of policing. From street shootings and domestic violence calls to the behind-the-scenes police work during Donald Trump's 2016 presidential inauguration, Brooks presents a

revealing account of what it's like inside the "blue wall of silence." She issues an urgent call for new laws and institutions, and argues that in a nation increasingly divided by race, class, ethnicity, geography, and ideology, a truly transformative approach to policing requires us to move beyond sound bites, slogans, and stereotypes. An explosive and groundbreaking

investigation, Tangled Up in Blue complicates matters rather than simplifies them, and gives pause both to those who think police can do no wrong—and those who think they can do no right. *Ethical Issues in Covert, Security and Surveillance Research* Springer Nature The Globalisation of Hate: Internationalising Hate Crime? is the first book to examine the impact of

globalisation on our understanding of hate speech and hate crime. Bringing together internationally acclaimed scholars with researchers, policy makers and practitioners from across the world, it critically scrutinises the concept of hate crime as a global phenomenon, seeking to examine whether hate crime can, or should, be conceptualised within an international framework

and, if so, how this might be achieved. Beginning with the global dynamics of hate, the contributions analyse whether hate crime can be defined globally, whether universal principles can be applied to the phenomenon, how hatred is spread, and how it impacts upon our global society. The middle portion of the book moves beyond the broader questions of globalisation

to jurisdictional examples of how globalisation impacts upon our understanding of, and also our responses to, hate crime. The chapters explore in greater detail what is happening around the world and how the international concepts of hate crime are being operationalised locally, drawing out the themes of globalisation and internationalisation that are relevant to

hate crime, as evidenced by a number of jurisdictions from Europe, the US, Asia, and Africa. The final part of the book concludes with an examination of the different ways in which hate speech and hate crime is being combatted globally. International law, internet regulation and the use of restorative practices are evaluated as methods of addressing hate-based conflict, with the

discussions drawn from existing frameworks as well as exploring normative standards for future international efforts. Taken together, these innovative and insightful contributions offer a timely investigation into the effects of hate crime, offering an interdisciplinary approach to tackling what is now a global issue. It will be of interest to scholars and students of criminology,
