When the newly promoted Judge Kraken, under the influence of the mysterious and evil Sisters of Death (from the 'Deadworld' dimension which was the original home of Judge Death and the other Dark Judges), kidnaps Psi-Judge Agee, all hell breaks loose in Mega-City One! The sisters use Agee's powerful psi abilities to free the Dark Judges from dimensional limbo (where they were exiled by Judge Anderson). Now it's up to Dredd, Anderson, and all the other Judges in Mega-City One to stop these extraordinarily powerful beings - before they can completely lay waste to the city, and go on to kill all the inhabitants of Dredd's future Earth!

Faithful Renderings reads translation history through the lens of

Jewish-Christian difference and, conversely, views Jewish-Christian difference as an effect of translation. Subjecting translation to a theological-political analysis, Seidman asks how the charged Jewish-Christian relationship—and more particularly the dependence of Christianity on the texts and translations of a rival religion—has haunted the theory and practice of translation in the West. Bringing together central issues in translation studies with episodes in Jewish-Christian history, Naomi Seidman considers a range of texts, from the Bible to Elie Wiesel's *Night*, delving into such controversies as the accuracy of various Bible translations, the medieval use of converts from Judaism to Christianity as translators, the censorship of anti-Christian references in Jewish texts, and the translation of Holocaust testimony. *Faithful Renderings* ultimately reveals that translation is not a marginal phenomenon but rather a crucial issue for understanding the relations between Jews and Christians and indeed the development of each religious community.

Incorporating introductions, readings, and cases that span the breadth of the discipline, *Contemporary Bioethics: A Reader with Cases* captures the spirit of bioethics as a rich, exciting, and continually evolving field. It covers all the essential topics - including abortion, reproductive ethics, end-of-life care, research ethics, and allocation of resources - and also extends into cutting-edge areas like environmental sustainability, terrorism, neuroethics, immigration, genetic manipulations, and links

between first- and third-world health. The book opens with a substantial introduction that explores key differences between secular and religious modes of argumentation. Each of the following chapters contains an in-depth introduction, a selection of concise readings, discussion questions, and a collection of 7-10 case studies.

*Conspiracy Theories in the United States and the Middle East* is the first book to approach conspiracy theorizing from a decidedly comparative and interdisciplinary perspective. Whereas previous studies have engaged with conspiracy theories within national frameworks only, this collection of essays draws attention to the fact that conspiracist visions are transnational narratives that travel between and connect different cultures. It focuses on the United States and the Middle East because these two regions of the world are entangled in manifold ways and conspiracy theories are currently extremely prominent in both. The contributors to the volume are scholars of Middle Eastern Studies, Anthropology, History, Political Science, Cultural Studies, and American Studies, who approach the subject from a variety of different theories and methodologies. However, all of them share the fundamental assumption that conspiracy theories must not be dismissed out of hand or ridiculed. Usually wrong and frequently dangerous, they are nevertheless articulations of and distorted responses to needs and anxieties that must be taken seriously. Focusing on individual case studies and displaying a high sensitivity for local conditions and the cultural environment, the essays offer a nuanced image of the workings of conspiracy theories in the United States and the Middle East.

THE MULTI-MILLION COPY BESTSELLING AUTHOR> The poems of *How to Fly* (in *Ten Thousand Easy Lessons*) find breath and lightness in the common business of living. Barbara Kingsolver's generous collection is divided into thematic sections that loop and interweave to form a carefully patterned whole: a series of 'How to' poems that smartly balance tongue-in-cheek pragmatism with revelatory wisdom, a complicated yet affirmative family pilgrimage to Italy, cherished childhood memories, the perils and pleasures of being a [female] writer, elegies to lost loved ones, and elegies to the planet. Blending resourcefulness and wonder with all the compassionate humanity of her prose, *How to Fly* will both delight Kingsolver's devoted readership and welcome a host of new readers to her startling verse, while revealing an intimate side to her creative practice as yet unseen.

"It is not for you to call profane what God counts clean."

Did Christianity replace traditional African religion with the arrival of European missionaries in past centuries? Or did sub-Saharan African cultures persist in maintaining their religious worldviews even after accepting the salvific message of Christianity? In this compelling book, Laurenti Magesa argues that despite missionary Christianity's refusal to acknowledge the worth of traditional African religious culture, the incarnational spirituality of those cultures remains vibrant and visible today, and has much to offer and teach other cultures, both Christian and not.

The biography and personality of the "Father of Medicine" were known to the world through these important, but little studied letters and speeches. W.D. Smith here presents them newly edited from the most important manuscripts, with a facing English translation, and offers an introduction that gives a literary analysis and places them in relation to ancient history and ancient medical science. The speeches appear to be early (III B.C.) propaganda for the Island Cos, whose presence in the Library at Alexandria contributed to the characterization of the Hippocratic Corpus, while the Democritus Letters belong to the Roman period, after the firm establishment of Hippocrates' reputation.

"This book is the first authoritative analysis of the theory of translation in German Romanticism. In a systematic study of Herder, Goethe, Schlegel, Novalis, Humboldt, Schleiermacher, and Hölderlin, Berman demonstrates the importance of the theory of translation for an understanding of German romantic culture, arguing that never before has the concept of translation been meditated in such detail and such depth. Indeed, fundamental questions that arise again today, such as the question concerning the proper versus the literal, of the Other to a given culture, the essence of the work of art, and of language, all these issues, and many more, are shown to have been premeditated in a most important manner by these German Romantics.

Exalted for centuries as a hero and author of the Bible, Moses is inseparable from biblical tradition itself. Moses is also an inherently ambiguous figure and a perennial focus of controversy, from ancient disputes of priestly rivalry to modern issues of class, gender and race. In *Rewriting Moses*, Brian Britt analyses elements of polemic and ideology in the Moses of the Bible, of film, novel, visual art and scholarship. He argues that the biblical Moses lives within writing, while the post-biblical Moses lives more often in biography. Yet later rewritings of Moses refract biblical traditions of writing in surprising ways. *Rewriting Moses* provides an original account of the Freudian insight that traditions preserve what they repress. This is volume 14 in the *Gender, Culture, Theory* series and is volume 402 in the *Journal for the Study of the Old Testament Supplements* series.

Religion is universal human culture. No phenomenon is more widely shared or more intensely studied, yet there is no agreement on what religion is. Now, in *Faces in the Clouds*, anthropologist Stewart Guthrie provides a provocative definition of religion in a bold and persuasive new theory. Guthrie says religion can best be understood as systematic anthropomorphism--that is, the attribution of human characteristics to nonhuman things and events. Many writers see anthropomorphism as common or even universal in religion, but few think it is central. To Guthrie, however, it is fundamental. Religion, he writes, consists of seeing the world as humanlike. As Guthrie shows, people find a wide range of humanlike beings plausible: Gods, spirits, abominable snowmen, HAL the computer, Chiquita Banana. We find messages in random events such as earthquakes, weather, and traffic accidents. We say a fire "rages," a storm "wreaks vengeance," and waters "lie still." Guthrie says that our tendency to find human characteristics in the nonhuman world stems from a deep-seated perceptual strategy: in the face of pervasive (if mostly unconscious) uncertainty about what we see, we bet on the most meaningful interpretation we can. If we are in the woods and see a dark shape that might be a bear or a boulder, for example, it is good policy to think it is a bear. If we are mistaken, we lose little, and if we are right, we gain much. So, Guthrie writes, in scanning the world we always look for what most concerns us--livings things, and especially, human ones. Even animals watch for human attributes, as when birds avoid scarecrows. In short, we all follow the principle--better safe than sorry. Marshalling a wealth of evidence from anthropology, cognitive science, philosophy, theology, advertising, literature, art, and animal behavior, Guthrie offers a fascinating array of examples to show how this perceptual strategy pervades secular life and how it characterizes religious experience. Challenging the

very foundations of religion, *Faces in the Clouds* forces us to take a new look at this fundamental element of human life.
