Go Set a Watchman HarperOne
Major new reflections on race and schools—by the best-selling author of “Why Are All the Black Kids Sitting Together in the Cafeteria?” A Simmons College/Beacon Press Race, Education, and Democracy Series Book Beverly Daniel Tatum emerged on the national scene in 1997 with “Why Are All the Black

Kids Sitting Together in the Cafeteria?,” a book that spoke to a wide audience about the psychological dynamics of race relations in America. Tatum’s unique ability to get people talking about race captured the attention of many, from Oprah Winfrey to President Clinton, who invited her to join him in his nationally televised dialogues on race. In her first book since that pathbreaking success, Tatum starts with a warning call about the increasing but underreported resegregation of America. A self-described

“integration baby”—she was born in 1954—Tatum sees our growing isolation from each other as deeply problematic, and she believes that schools can be key institutions for forging connections across the racial divide. In this ambitious, accessible book, Tatum examines some of the most resonant issues in American education and race relations: • The need of African American students to see themselves reflected in curricula and institutions • How unexamined racial attitudes can negatively affect minority-

student achievement • The possibilities—and complications—of intimate crossracial friendships Tatum approaches all these topics with the blend of analysis and storytelling that make her one of our most persuasive and engaging commentators on race. *Can We Talk About Race?* launches a collaborative lecture and book series between Beacon Press and Simmons College, which aims to reinvigorate a crucial national public conversation on race, education and democracy.

Real conversations about racism need to start now Let's Talk Race confronts why white people struggle to talk about race, why we need to own this problem, and how we can learn to do the work ourselves and stop expecting Black people to do it for us. Written by two specialists in race relations and parents of two adopted African American sons, the book provides unique insights and practical guidance, richly illustrated with personal examples, anecdotes, research findings, and prompts for personal reflection and conversations about race. Coverage includes: Seeing the varied forms of racism How we normalize and privilege whiteness Essential and

often unknown elements of Black history that inform the present Racial disparities in education, health, criminal justice, and wealth Understanding racially-linked cultural differences How to find conversational partners and create safe spaces for conversations Conversational do's and don'ts. Let's Talk Race is for all white people who want to face the challenges of talking about race and working towards justice and equity. *White Fragility* Bloomsbury Publishing Turn Uncomfortable Conversations into Meaningful Dialogue If you believe that talking about race is impolite, or that "colorblindness" is the preferred approach, you must read this book. *Race Talk* and the *Conspiracy of Silence* debunks the most pervasive myths using evidence, easy-to-understand examples, and practical tools. This significant work answers all your questions about discussing race by covering: Characteristics of typical, unproductive conversations on race Tacit and explicit social rules related to talking about racial issues Race-specific difficulties and misconceptions regarding race talk Concrete advice for educators and parents

on approaching race in a new way "His insistence on the need to press through resistance to have difficult conversations about race is a helpful corrective for a society that prefers to remain silent about these issues." —Christopher Wells, Vice President for Student Life at DePauw University "In a Canadian context, the work of Dr. Derald Wing Sue in *Race Talk: and the Conspiracy of Silence* is the type of material needed to engage a populace that is often described as 'Too Polite.' The accessible material lets individuals engage in difficult conversations about race and racism in ways that make the uncomfortable topics less threatening, resulting in a true 'dialogue' rather than a debate." —Darrell Bowden, M Ed. Education and Awareness Coordinator, Ryerson University "He offers those of us who work in the Diversity and Inclusion space practical tools for generating productive dialogues that transcend the limiting constraints of assumptions about race and identity." —Rania Sanford, Ed.D. Associate Chancellor for Strategic Affairs and Diversity, Stanford University "Sue's book is a must-read for any parent, teacher, professor, practitioner, and

facilitator who seeks to learn, understand, and advance difficult dialogues about issues of race in classrooms, workplaces, and boardrooms. It is a book of empowerment for activists, allies, or advocates who want to be instruments of change and to help move America from silence and inaction to discussion, engagement, and action on issues of difference and diversity. Integrating real life examples of difficult dialogues that incorporate the range of human emotions, Sue provides a masterful illustration of the complexities of dialogues about race in America. More importantly, he provides a toolkit for those who seek to undertake the courageous journey of understanding and facilitating difficult conversations about race." —Menah Pratt-Clarke, JD, PhD, Associate Provost for Diversity, University of Illinois Urbana-Champaign [A Kids Book About Racism](#) Yale University Press Understanding History Guides Modern Discourse In an era of diabolical polarization, discussing issues of race and religion in our political discourse often breaks down into further division without a way forward. These are complex topics,

therefore deserving of layers of depth in research that informs our understanding. The histories of how we developed to current circumstances on the issues of race and religion affect how we shape our perspective. Dialogue will devolve into destructiveness if it's simply a series of opinions asserted to each other. Instead, we may strive with constructive efforts to understand, learn, and embrace the complexity of reality, which does not fit neatly into the boundaries of a single ideology, interest group, or political party. *Can We Talk about Race?* New Society Publishers 'Every voice raised against racism chips away at its power. We can't afford to stay silent. This book is an attempt to speak' The book that sparked a national conversation. Based on the research that race, gender, consent, and body positivity should be discussed with toddlers on up, this read-aloud board book series offers adults the opportunity to begin important conversations with young children in an informed, safe, and supported way. Developed by experts in the fields of early childhood and activism against injustice, this topic-driven board book offers clear, concrete language and beautiful imagery that young children can grasp and adults can leverage for further discussion. While young children are avid observers and questioners of their world, adults often shut down or postpone conversations on complicated topics because it's hard to know where to begin. Research shows that talking about issues like race and gender from the age of two not only helps children understand what they see, but also

increases self-awareness, self-esteem, and allows them to recognize and confront things that are unfair, like discrimination and prejudice. This first book in the series begins the conversation on race, with a supportive approach that considers both the child and the adult. Stunning art accompanies the simple and interactive text, and the backmatter offers additional resources and ideas for extending this discussion.

From everyday apps to complex algorithms, Ruha Benjamin cuts through tech-industry hype to understand how emerging technologies can reinforce White supremacy and deepen social inequity. Benjamin argues that automation, far from being a sinister story of racist programmers scheming on the dark web, has the potential to hide, speed up, and deepen discrimination while appearing neutral and even benevolent when compared to the racism of a previous era. Presenting the concept of the "New Jim Code," she shows how a range of discriminatory designs encode inequity by explicitly amplifying racial hierarchies; by ignoring but thereby replicating social

divisions; or by aiming to fix racial bias but ultimately doing quite the opposite. Moreover, she makes a compelling case for race itself as a kind of technology, designed to stratify and sanctify social injustice in the architecture of everyday life. This illuminating guide provides conceptual tools for decoding tech promises with sociologically informed skepticism. In doing so, it challenges us to question not only the technologies we are sold but also the ones we ourselves manufacture. Visit the book's free Discussion Guide: www.dropbox.com

A Boston Globe Most Anticipated Fall Book

In this urgently needed guide, the PBS host, award-winning journalist, and author of *We Need to Talk* teaches us how to have productive conversations about race, offering insights, advice, and support. A self-described "light-skinned Black Jew," Celeste Headlee has been forced to speak about race—including having to defend or define her own—since childhood. In her career as a journalist for public media, she's made it a priority to talk about race proactively. She's discovered, however, that those exchanges have rarely been productive. While many people say they want to talk about race, the reality is, they want to talk about race with people who agree with them. The subject makes us

uncomfortable; it's often not considered polite or appropriate. To avoid these painful discussions, we stay in our bubbles, reinforcing our own sense of righteousness as well as our division. Yet we gain nothing by not engaging with those we disagree with; empathy does not develop in a vacuum and racism won't just fade away. If we are to effect meaningful change as a society, Headlee argues, we have to be able to talk about what that change looks like without fear of losing friends and jobs, or being ostracized. In *Speaking of Race*, Headlee draws from her experiences as a journalist, and the latest research on bias, communication, and neuroscience to provide practical advice and insight for talking about race that will facilitate better conversations that can actually bring us closer together. This is the book for people who have tried to debate and educate and argue and got nowhere; it is the book for those who have stopped talking to a neighbor or dread Thanksgiving dinner. It is an essential and timely book for all of us.

When John Calvin Marshall graduated from Harvard in 1956, he was prepared for a life of teaching and relative tranquility. But history had another plan for him: here, a veteran author re-envisioning the Martin Luther King Jr. story in fearful, exciting, and violent terms. Political and provocative, *And All Our Wounds Forgiven* is both a compelling political fable and a striking and tender love story about one of this century's most charismatic black leaders and the two women he loved.

White Awareness William Morrow

Witnessing Whiteness invites readers to consider what it means to be white, describes and critiques strategies used to avoid race issues, and identifies the detrimental effect of avoiding race on cross-race collaborations. The author illustrates how racial discomfort leads

white people toward poor relationships with people of color. Questioning the implications our history has for personal lives and social institutions, the book considers political, economic, socio-cultural, and legal histories that shaped the meanings associated with whiteness. Drawing on dialogue with well-known figures within education, race, and multicultural work, the book offers intimate, personal stories of cross-race friendships that address both how a deep understanding of whiteness supports cross-race collaboration and the long-term nature of the work of excising racism from the deep psyche. Concluding chapters offer practical information on building knowledge, skills, capacities, and communities that support anti-racism practices, a hopeful look at our collective future, and a discussion of how to create a culture of witnesses who support allies for social and racial justice. How to Be a (Young) Antiracist Twelve
The New York Times best-selling book exploring the counterproductive reactions

white people have when their assumptions about race are challenged, and how these reactions maintain racial inequality. In this "vital, necessary, and beautiful book" (Michael Eric Dyson), antiracist educator Robin DiAngelo deftly illuminates the phenomenon of white fragility and "allows us to understand racism as a practice not restricted to 'bad people'" (Claudia Rankine). Referring to the defensive moves that white people make when challenged racially, white fragility is characterized by emotions such as anger, fear, and guilt, and by behaviors including argumentation and silence. These behaviors, in turn, function to reinstate white racial equilibrium and prevent any meaningful cross-racial dialogue. In this in-depth exploration, DiAngelo examines how white fragility develops, how it protects racial inequality, and what we can do to engage more constructively.

"Lester's poignant picture book helps children learn, grow, discuss, and begin to create a future that resolves differences" (Children's Literature). Julius Lester said: "I write because our lives are stories. If enough of these stories are told, then perhaps we will begin to see that our lives are the same story. The differences are merely in the details." I am a story. So are you. So is everyone.

About Race HarperCollins

A play about the imagined fault line between black and white lives by Claudia Rankine, the author of *Citizen The White Card* stages a conversation that is both informed and derailed by the black/white American drama. The scenes in this one-

act play, for all the characters' disagreements, stalemates, and seeming impasses, explore what happens if one is willing to stay in the room when it is painful to bear the pressure to listen and the obligation to respond. —from the introduction by Claudia Rankine Claudia Rankine's first published play, *The White Card*, poses the essential question: Can American society progress if whiteness remains invisible? Composed of two scenes, the play opens with a dinner party thrown by Virginia and Charles, an influential Manhattan couple, for the up-

and-coming artist Charlotte. Their conversation about art and representations of race spirals toward the devastation of Virginia and Charles's intentions. One year later, the second scene brings Charlotte and Charles into the artist's studio, and their confrontation raises both the stakes and the questions of what—and who—is actually on display. Rankine's *The White Card* is a moving and revelatory distillation of racial divisions as experienced in the white spaces of the living room, the art gallery, the theater, and the imagination itself.
