 A basic guide to hospital billing and reimbursement, *Understanding Hospital Billing and Coding, 3rd Edition* helps you understand, complete, and submit the UB-04 claim form that is used for all Medicare and privately insured patients. It describes how hospitals are reimbursed for patient care and services, showing how the UB-04 claim form reflects the flow of patient data from the time of admission to the time of discharge. Written by coding expert Debra P. Ferenc, this book also ensures that you understand the essentials of ICD-10-CM and develop skills

in both inpatient coding and outpatient/ambulatory surgery coding. UB-04 Claim Simulation on the companion Evolve website lets you practice entering information from source documents into the claim form. Over 300 illustrations and graphics bring important concepts to life. Detailed chapter objectives highlight what you are expected to learn. Key terms, acronyms, and abbreviations with definitions are included in each chapter. Concept Review boxes reinforce key concepts. Test Your Knowledge exercises reinforce lessons as you progress through the material. Chapter summaries review key concepts. Practice hospital cases let you apply concepts to real-life scenarios. UPDATED content reflects the most current industry changes in ICD-10, MR-DRGs, PPS Systems, and the Electronic Health Record. NEW Hospital Introduction chapter includes a department-by-department overview showing how today's hospitals really work NEW Health Care Payers and Reimbursement section follows the workflow of the hospital claim by including successive chapters on payers, prospect payment systems, and accounts receivable management.

Medical coding professionals provide a key step in the medical billing process. Every time a patient receives professional health care in a physician's office, hospital outpatient facility or ambulatory surgical center (ASC), the provider must document the services provided. The medical coder will abstract the information from the documentation, assign the appropriate codes, and create a claim to be paid, whether by a commercial payer, the patient, or CMS. While the medical coder and medical biller may be the same person or may work closely together to make sure all invoices are paid properly, the medical coder is primarily responsible for abstracting and assigning the appropriate coding on the claims. In order to accomplish this, the coder checks a variety of sources within the patient's medical record, (i.e. the transcription of the doctor's notes, ordered laboratory tests, requested imaging studies and other sources) to verify the work that was done. Then the coder must assign CPT codes,

ICD-9 codes and HCPCS codes to both report the procedures that were performed and to provide the medical biller with the information necessary to process a claim for reimbursement by the appropriate insurance agency. This text is intended to dispel any ambiguity prior to taking your national certification. This text contains over 400 preparatory examination questions, covering ICD-9, ICD-10, Revenue cycle, Medical report extrapolation assignments, HCPCS, UB04, and CPT.
