Corporate social responsibility (CSR) expresses a fundamental morality in the way a company behaves toward society. It follows ethical behavior toward stakeholders and recognizes the spirit of the legal and regulatory environment. The idea of CSR gained momentum in the late 1950s and 1960s with the expansion of large conglomerate corporations and became a popular subject in the 1980s with R. Edward Freeman's *Strategic Management: A Stakeholder Approach* and the many key works of Archie B. Carroll, Peter F. Drucker, and others. In the wake of the financial crisis of 2008–2010, CSR has again become a focus for evaluating corporate behavior. First published in 1953, Howard R. Bowen's *Social Responsibilities of the Businessman* was the first comprehensive discussion of business ethics and social responsibility. It created a foundation by which business executives and academics could consider the subjects as part of strategic planning and managerial decision-making. Though written in another era, it is regularly and increasingly cited because of its relevance to the current ethical issues of business operations in the United States. Many experts believe it to be the seminal book on corporate social responsibility. This new edition of the book includes an introduction by Jean-Pascal Gond, Professor of Corporate Social Responsibility at Cass Business School, City University of London, and a foreword by Peter Geoffrey Bowen, Daniels College of Business, University of Denver, who is Howard R. Bowen's eldest son.

Remote Sensing Image Fusion: A Practical Guide gives an introduction to

remote sensing image fusion providing an overview on the sensors and applications. It describes data selection, application requirements and the choice of a suitable image fusion technique. It comprises a diverse selection of successful image fusion cases that are relevant to other users and other areas of interest around the world. The book helps newcomers to obtain a quick start into the practical value and benefits of multi-sensor image fusion. Experts will find this book useful to obtain an overview on the state of the art and understand current constraints that need to be solved in future research efforts. For industry professionals the book can be a great introduction and basis to understand multisensor remote sensing image exploitation and the development of commercialized image fusion software from a practical perspective. The book concludes with a chapter on current trends and future developments in remote sensing image fusion. Along with the book, RSIF website provides additional up-to-date information in the field.

Based on the 2010 conference 'Towards the establishment of genetic reserves for crop wild relatives and landraces in Europe', this book is the cutting-edge discussion of agrobiodiversity conservation. By considering the benefits of understanding and preserving crop wild relatives and landraces, it encompasses issues as wide-ranging and topical as habitat protection, ecosystem health and food security. "Agrobiodiversity Conservation" focuses on Europe, but is globally relevant. It is suitable for postgraduate students of conservation and environmental studies, conservation

professiona.

The French Broad CABI

This is the second of two volumes deriving from papers presented at the Nineteenth Annual UWM linguistics Symposium held in Milwaukee in 1990. It focuses on the evolution of grammatical form and meaning from lexical material, which has reinvigorated historical analysis and theory and led to advances in the understanding of the relation between diachrony and universals. The richness and potential of some of the leading approaches to grammaticalization are here illustrated in thirteen selected papers.

The linguistic integration of adult migrants: from one country to another, from one language to another Pearson

This volume introduces the field of child language development studies, and presents hypotheses in an accessible, largely non-technical language, aiming to demonstrate the relationship between these hypotheses and interpretations of data. It makes the assumption that having a theory of language development is as important as having reliable data about what children say and understand, and it advocates a combination of both 'rationalist' and more 'empiricist' traditions. In fact, the author overtly argues that different traditions provide different pieces of the picture, and that taking any single approach is unlikely to lead to productive understanding. Susan Foster-Cohen explores a range of issues, including the nature of prelinguistic communication and its possible relationship to linguistic development; early stages of language development and how they can be viewed in the light of later developments; the nature and role of children's experience with the

language(s) around them; variations in language development due to both pathological and non-pathological differences between children, and (in the latter case) between the languages they learn; later oral language development; and literacy. The approach is distinctly psycholinguistic and linguistic rather than sociolinguistic, although there is significant treatment of issues which intersect with more sociolinguistic concerns (e.g. literacy, language play, and bilingualism). There are exercises and discussion questions throughout, designed to reinforce the ideas being presented, as well as to offer the student the opportunity to think beyond the text to ideas at the cutting edge of research. The accessible presentation of key issues will appeal to the intended undergraduate readership, and will be of interest to those taking courses in language development, linguistics, developmental psychology, educational linguistics, and speech pathology. The book will also serve as a useful introduction to students wishing to pursue post-graduate courses which deal with child language development.

Health and social care in every system and in every country is labour intensive, and must be oriented to people's needs if it is to be effective. It is now widely recognized that human resources for health (HRH) are a key enabler for the attainment of universal health coverage, and for the achievement of Sustainable Development Goal (SDG) 3 - Ensure healthy lives and promote well-being for all at all ages. As is stressed in the Global Strategy on Human Resources for Health: Workforce 2030, there can be no viable national, or global, health system without an effective health workforce.

The Global Strategy, adopted at the Sixty-ninth World Health Assembly in May 2016, challenges the erroneous narrative of health workers as a unit of cost in the production of health. The evidence instead presents an intersectoral agenda on the pre-condition of equitable access to health workers in the attainment of universal health coverage, along with a dynamic labour market understanding of the substantive impact on education, employment, jobs and innovation in the health and social care economy. The Global Strategy, therefore, enables governments and other relevant stakeholders to adopt a holistic, rather than fragmented, approach to ensuring that the health workforce contributes both to improved health and to broader socioeconomic development.

1. STRESS -- 2. STRESS IN INDUSTRY -- 3. THOSE WHO ARE VULNERABLE -- 4. HOW TO PREVENT AND TO TREAT -- 5. PRINCIPLES OF PREVENTION OF STRESS-RELATED DISEASES. Countless people in today's society complain of "stress". The word is often misused, and used, in the most varied of meanings. What, then, do we actually mean by stress? How does it feel? What takes place in the body? Does it make sense to talk about stress illnesses? How common are they? Can stress be measured? Can stress be cured or, indeed, can it be prevented? In the following pages an attempt is made to answer both these and other common questions about stress. To facilitate comprehension, a few simplifications have been unavoidable. The aim has been merely to present the most elementary of introductions. Those who wish, therefore, to explore the topic more thoroughly are referred to the more detailed works listed in the bibliography at the end of this booklet. The publication has five chapters: stress; stress in industry; those who are vulnerable; how to prevent and to treat; principles of prevention of stress-related diseases.

Social Responsibilities of the Businessman Springer

The linguistic integration of migrants affects every aspect of settling in a new country (employment, health, etc.). The aim of this collection of texts is to propose a number of specific measures member states can take to help adult

migrants become acquainted with the language of the host country. The main focus is on organising language courses that meet migrants' real communication needs. It is not enough for authorities simply to consider the technical aspects of such courses, they should also design and conduct them in accordance with the fundamental values of the Council of Europe. A number of issues concerning the linguistic integration of adult migrants are presented here, beginning with the notion of linguistic integration itself. Family reunion, the nature of citizenship and the function of language tests, among others, are dealt with from the point of view of language and language use. Readers are invited to reflect on the type of language competences that need to be acquired as well as an appropriate use of the Common European Framework of Reference for Languages. The collection also sets out approaches and instruments designed to assist in implementing effective policies.

The Social Psychology of Tourist Behaviour CRC Press

This book covers research topics in bilingual education, language policies, language contact, identity of bilingual speakers, early bilingualism, heritage languages, and more, and provides an overview of current theory, research and practice in the field of bilingualism. Each chapter is written by a specialist in the field. Part I focuses on the numerous and heterogeneous relations between languages as well as the implications arising from bilingual speech processing. In Part II, a series of contextualized studies on bilingual classrooms are presented, with diverse research designs applied in different educational settings being a key feature of these studies. Part III bridges theory and practice by

offering an insight into mono- and multilingual school settings showcasing examples of educational institutions where bilingualism successfully soared and depicts the needs related to language education.

Using a variety of research findings and case studies, this publication provides a broad picture of water quality and quantity in Canada as they are affected by agriculture and as they affect agriculture itself. The first part contains background on the water cycle, water supplies in Canada, agriculture & other rural uses of water, and issues related to water quality. The second part describes what is currently known about the health of Canada's rural surface water and groundwater, and the implications for natural ecosystems. The third part describes responses to the various issues of water quality & quantity, citing farming practices and regulatory tools, among other measures. The final part discusses how the growth of agriculture may be limited by issues related to water and how the future might proceed. Includes glossary.

Our interactive world can take a creative product, such as a Hollywood film, Bollywood song, or Latin American telenovela, and transform it into a

source of cultural anxiety. What does this artwork say about the artist or the world she works in? How will these artworks evolve in the global market? Film, music, television, and the performing arts enter the same networks of exchange as other industries, and the anxiety they produce informs a fascinating area of study for art, culture, and global politics. Focusing on the confrontation between global politics and symbolic creative expression, J. P. Singh shows how, by integrating themselves into international markets, entertainment industries give rise to far-reaching cultural anxieties and politics. With examples from Hollywood, Bollywood, French grand opera, Latin American television, West African music, postcolonial literature, and even the Thai sex trade, Singh cites not only the attempt to address cultural discomfort but also the effort to deny entertainment acts as cultural. He connects creative expression to clashes between national identities, and he details the effect of cultural policies, such as institutional patronage and economic incentives, on the making and incorporation of art into the global market. Ultimately, Singh shows how these issues affect the debates on cultural trade being waged by the World Trade Organization, UNESCO, and the developing world.
