GEORGE DEANDRE

The army list Academic Press
Representations of Lie Groups, Kyoto,
Hiroshima, 1986 contains the
proceedings of a symposium on
"Analysis on Homogeneous Spaces and

Representations of Lie Groups" held on
September 1-6, 1986 in Japan. The
symposium provided a forum for
discussing Lie groups and covered topics
ranging from geometric constructions of
representations to the irreducibility of
discrete series representations for
semisimple symmetric spaces. A
classification theory of prehomogeneous

vector spaces is also described. Comprised of 22 chapters, this volume first considers the characteristic varieties of certain modules over the enveloping algebra of a semisimple Lie algebra, such as highest weight modules and primitive quotients. The reader is then introduced to multiplicity one theorems for generalized Gelfand-Graev representations of semisimple Lie groups and Whittaker models for the discrete series. Subsequent chapters focus on Lie algebra cohomology and holomorphic continuation of generalized Jacquet integrals; the generalized Geroch conjecture; algebraic structures on virtual characters of a semisimple Lie group; and fundamental groups of semisimple symmetric spaces. The book concludes with an analysis of the

boundedness of certain unitarizable Harish-Chandra modules. This monograph will appeal to students, specialists, and researchers in the field of pure mathematics.
