**A Contextual Behavioral Guide to the Self** Springer Science & Business Media  
 This book provides an original review of Ocean Literacy as a component of public policy in Europe and beyond. The impact of the ocean on human activities is one of the most significant environmental issues facing humanity. By offering valuable insights into the interrelationships between geography, environment, marine science and education, the book explores key issues relating to the future of our planet and the way people respond to them. This volume discusses concepts concerning citizenship education and co-creation and the role of public policy and different international initiatives in raising awareness and mitigating the effects of over-use and misuse of valuable resources. A range of innovative projects are presented and evaluated from the local to national and global levels. This book advances knowledge and provides a picture of these advances, presents the issues and challenges, including the important role that geography education and geographical awareness could play in advancing the case for Ocean Literacy. This crossdisciplinary

book appeals to students and scientists as well as professionals and practitioners in geography, environmental and marine sciences, international policy and many related fields.

 Chapter "A Multi-functional Design Approach to Deal with New Urban Challenges" is available open access under a Creative Commons Attribution 4.0 International License via [link.springer.com](http://link.springer.com).

**Focalóir gaoidhilge-sax-bhéarla, or An Irish-English dictionary** Cornell University Press

*Regional Urban Systems in the Roman World* offers comprehensive reconstructions of the urban systems of large parts of the Roman Empire. In accounting for region-specific urban patterns it uses a combination of diachronic and synchronic approaches.

*Obras completas* Springer Nature  
 This book aims at informing on new trends, challenges and solutions, in the multidisciplinary field of biomedical engineering. It covers traditional biomedical engineering topics, as well as innovative applications such as artificial intelligence in health care, tissue engineering, neurotechnology and wearable devices. Further topics include mobile health and electroporation-based

technologies, as well as new treatments in medicine. Gathering the proceedings of the 8th European Medical and Biological Engineering Conference (EMBEC 2020), held on November 29 - December 3, 2020, in Portorož, Slovenia, this book bridges fundamental and clinically-oriented research, emphasizing the role of education, translational research and commercialization of new ideas in biomedical engineering. It aims at inspiring and fostering communication and collaboration between engineers, physicists, biologists, physicians and other professionals dealing with cutting-edge themes in and advanced technologies serving the broad field of biomedical engineering.

**Islamic Glass in the Making** Routledge

Every summer season, the sun-drenched coasts of Bulgaria and Croatia turn into densely inhabited, intensively exploited tourism industry hotspots. This book traces the various architectural and urban planning strategies pursued there since the mid 1950s, in order first to create then to further develop modern holiday destinations. It focusses on individual resorts and outstanding buildings have been economically and physically restructured, in a myriad of ways, leaving a legacy of deserted ruins, cautious renovations, exorbitant conversions and on-going public protest.

**The Routledge Handbook of Critical Resource Geography** Cambridge University Press

New insights into the history of Islamic glassmaking The ancient glass industry changed dramatically towards the end of the first millennium. The Roman glassmaking tradition of mineral soda glass was increasingly supplanted by the use of plant ash as the main fluxing agent at the turn of the ninth century CE. Defining primary production groups of plant ash glass has been a challenge due to the high variability of raw materials and the smaller scale of production. *Islamic Glass in the Making* advocates a large-scale archaeometric approach to the history of Islamic glassmaking to trace the developments in the production, trade and consumption of vitreous materials between the eighth and twelfth centuries and to separate the norm from the exception. It proposes compositional discriminants to distinguish regional production groups, and provides insights into the organisation of the glass industry and commerce during the early Islamic period. The interdisciplinary approach leads to a holistic understanding of the development of Islamic glass; assemblages from the early Islamic period in Mesopotamia, Central Asia, Egypt, Greater Syria and Iberia are evaluated, and placed in the larger geopolitical context. In doing so, this book fills a gap in the present literature and advances a large-scale approach to the history of Islamic glass.

**Current Controversies in the Anxiety Disorders** Springer Nature  
*Paradise Lost* is an epic poem in blank verse by the 17th-century English poet John Milton. It was originally published in 1667 in ten books; a second edition followed in 1674, redivided into twelve books (in the manner of the division of Virgil's *Aeneid*) with minor revisions throughout and a note on the versification. The poem concerns the Judeo-Christian story of the Fall of Man; the temptation of Adam and Eve by the fallen angel Satan and their expulsion from the Garden of Eden. Milton's purpose, stated in Book I, is "justify the ways of God to men" and elucidate the conflict between God's eternal foresight and free will. It is considered by critics to be Milton's 'major work', and helped solidify his reputation as one of the greatest English poets of his time. The poem concerns the Biblical story of the Fall of Man: the temptation of Adam and Eve by the fallen angel Satan and their expulsion from the Garden of Eden. Milton's purpose, stated in Book I, is to 'justify the ways of God to men'.

**Evolution and Learning** Springer Nature

Mountain regions are subject to a unique set of economic pressures: they act as collective enterprises which have to

valorize rare resources, such as spectacular landscapes. While primarily rural in nature, they often border large cities, and the development of industries such as hydroelectric power and the rapid development of tourism can bring about sweeping socio-economic change and vast demographic alterations. *The Spatial and Economic Transformation of Mountain Regions* describes the socio-economic changes and spatial impacts of the last four decades, with the transformation of mountain areas held up as an example. Much of the real-world context draws on the Alps, spanning as they do the significant economies of France, Italy, Germany, Switzerland, and Austria. Chapters address academic discourse on regional development in these mountain areas and suggest alternative approaches to the liberal-productivist societal model. This book will be essential reading for professionals, institutions, and NGOs searching for counter-models to the existing marketing approaches for peripheral areas. It will also be of interest to students of regional development, economic geography, environmental studies, and industrial economics.

**Advances in Understanding Soil Degradation** Legare Street Press

This book contains a series of lectures given in a Summer School held in Aussois (France) in September 1989. It offers a global perspective on the current state-of-the-art in the rapidly emerging field of metallic multilayered structures.

**Interspecies Futures [IF]** BRILL

Publishers Weekly Top 10 Best of the Year In her new collection, Story Prize finalist Maureen F. McHugh delves into the dark heart of contemporary life and life five minutes from now and how easy it is to mix up one with the other. Her stories are post-bird flu, in the middle of medical trials, wondering if our computers are smarter than us, wondering when our jobs are going to be outsourced overseas, wondering if we are who we say we are, and not sure what we'd do to survive the coming zombie plague. Praise for Maureen F. McHugh: "Gorgeously crafted stories."—Nancy Pearl, NPR "Hauntingly beautiful."—Booklist "Unpredictable and poetic work."—The Plain Dealer Maureen F. McHugh has lived in New York; Shijiazhuang, China; Ohio; Austin, Texas; and now lives in Los Angeles, California. She is the author of a Story Prize finalist collection, *Mothers & Other Monsters*, and four novels, including Tiptree Award-winner *China Mountain Zhang* and New York Times editor's choice *Nekropolis*. McHugh has also worked on alternate reality games for *Halo 2*, *The Watchmen*, and *Nine Inch Nails*, among others. io9 Best SF&F Books of 2011 Tiptree Award Honor List Philip K. Dick Award finalist Story Prize Notable Book

**Acts of Care** Mediterranean Island Landscapes

The Wiley Handbook of Contextual Behavioral Science describes the philosophical and empirical foundation of the contextual behavioral science movement; it explores the history and goals of CBS, explains its core analytic assumptions, and describes Relational Frame Theory as a research and practice program. This is the first thorough examination of the philosophy, basic science, applied science, and applications of Contextual Behavioral Science Brings together the philosophical and empirical contributions that CBS is making to practical efforts to improve human wellbeing Organized and written in such a way that it can be read in its entirety or on a section-by-section basis, allowing readers to choose how deeply they delve into CBS Extensive coverage of this wide ranging and complex area that encompasses both a rich basic experimental tradition and in-depth clinical application of that experimental knowledge Looks at the development of RFT, and its implications for alleviating human suffering

**8th European Medical and Biological Engineering Conference** Springer

The self plays an integral role in human motivation, cognition, and social identity. A Contextual Behavioral Guide to the Self translates this difficult—yet essential—therapeutic process into easy-to-apply steps and user-friendly language. For many clients, it's incredibly difficult to shed preconceived notions of “who they really are,” and negative perceptions of the self can lead to feelings of low self-worth that stand in the way of treatment. Furthermore, every client who partakes in acceptance and commitment therapy (ACT) must identify a self as part of their treatment, and clinicians often report that observing the self, or “self as context,” is the most difficult of all six core ACT processes. Problems with the self arise when clients orient themselves in the world and learn to relate to others, but these problems can vary considerably. For example, some clients may have deficits in developing a strong sense of self in the first place—particularly if they are diagnosed with autism spectrum conditions (ASC). Depressed clients or those with borderline personality disorder (BPD) may develop a skewed, negative sense of self, and those with narcissistic personality disorder (NPD) may develop an inflated sense of self. With this unique road map, you will learn to apply the complex theory of the self into everyday practice, and help all clients develop empathy, compassion, and flexible perspective taking—leading to better treatment outcomes and better lives for clients.

#### The Spatial and Economic Transformation of Mountain Regions

John Wiley & Sons

Once a thriving metropolis on the banks of the Mississippi, St. Louis, Missouri, is now a ghostly landscape of vacant houses, boarded-up storefronts, and abandoned factories. The Gateway City is, by any measure, one of the most depopulated, deindustrialized, and deeply segregated examples of American urban decay. “Not a typical city,” as one observer noted in the late 1970s, “but, like a Eugene O'Neill play, it shows a general condition in a stark and dramatic form.” Mapping Decline examines the causes and consequences of St. Louis's urban crisis. It traces the complicity of private real estate restrictions, local planning and zoning, and federal housing policies in the “white flight” of people and wealth from the central city. And it traces the inadequacy—and often sheer folly—of a generation of urban renewal, in which even programs and resources aimed at eradicating blight in the city ended up encouraging flight to the suburbs. The urban crisis, as this study of St. Louis makes clear, is not just a consequence of economic and demographic change; it is also the most profound political failure of our recent history. Mapping Decline is the first history of a modern American city to combine extensive local archival research with the latest geographic information system (GIS) digital mapping techniques. More than 75 full-color maps—rendered from census data, archival sources, case law, and local planning and property records—illustrate, in often stark and dramatic ways, the still-unfolding political history of our neglected cities.

#### St. Peter's in the Vatican Springer Nature

In Acts of Care, Sara Ritchey recovers women's healthcare work by identifying previously overlooked tools of care: healing prayers, birthing indulgences, medical blessings, liturgical images, and penitential practices. Ritchey demonstrates that women in premodern Europe were both deeply engaged with and highly knowledgeable about health, the body, and therapeutic practices, but their critical role in medieval healthcare has been obscured because scholars have erroneously regarded the evidence of their activities as religious rather than medical. The sources for identifying the scope of medieval women's health knowledge and healthcare practice, Ritchey argues, are not found in academic medical treatises. Rather, she follows fragile traces detectable in liturgy, miracles, poetry, hagiographic narratives,

meditations, sacred objects, and the daily behaviors that constituted the world, as well as in testaments and land transactions from hospitals and leprosia established and staffed by beguines and Cistercian nuns. Through its surprising use of alternate sources, Acts of Care reconstructs the vital caregiving practices of religious women in the southern Low Countries, reconnecting women's therapeutic authority into the everyday world of late medieval healthcare. Thanks to generous funding from the University of Tennessee, Knoxville, the ebook editions of this book are available as Open Access (OA) volumes from Cornell Open ([cornellpress.cornell.edu/cornell-open](http://cornellpress.cornell.edu/cornell-open)) and other Open Access repositories.

#### **The Quantum Theory of Atoms in Molecules** New Harbinger Publications

Mediterranean islands exhibit many similarities in their biotic ecological, physical and environmental characteristics. There are also many differences in terms of their human colonization and current anthropogenic pressures. This book addresses in three sections these characteristics and examines the major environmental changes that the islands experienced during the Quaternary period. The first section provides details on natural and cultural factors which have shaped island landscapes. It describes the environmental and cultural changes of the Holocene and their effects on biota, as well as on the current human pressures that are now threats to the sustainability of the island communities. The second section focuses on the landscapes of the largest islands namely Sicily, Sardinia, Corsica, Cyprus, Crete, Malta and the Balearics. Each island chapter includes a special topic reflecting a particular characteristic of the island. Part three presents strategies for action towards sustainability in Mediterranean islands and concludes with a comparison between the largest islands. Despite several published books on Mediterranean ecosystems/landscapes there is no existing book dealing with Mediterranean islands in a collective manner. Students, researchers and university lecturers in environmental science, geography, biology and ecology will find this work invaluable as a cross-disciplinary text while planners and politicians will welcome the succinct summaries as background material to planning decisions.

#### The Geology of Central Europe: Precambrian and Palaeozoic

Bentham Science Publishers

This book offers a collection of essays on Byzantine Italy which provides a fresh synthesis of current research as well as new insights on various aspects of its local societies from the 6th to the 11th century.

#### **Regional Urban Systems in the Roman World, 150 BCE - 250 CE** Springer Science & Business Media

Imagine for a moment taking your family on the global adventure of a lifetime. What might that look like? Enrolling your children in an international school in Singapore? Homeschooling while you drive through Europe or sail across an ocean? Backpacking through Asia? The Road Taken will guide you to your family dream and then walk you through not only how to get it, but how to manage the side effects of stretching out of your collective comfort zone. Author and clinical psychologist Michelle Damiani weaves together her story of moving to an Italian village with the experiences of over thirty contributors to create what is sure to be the definitive manual for families who crave an international adventure. Because you owe it to yourself and your family to consider discovering the world together.

#### Ocean Literacy: Understanding the Ocean Archipelago

This unique two-volume set provides detailed coverage of contemporary learning theory. Uniting leading experts in modern behavioral theory, these texts give students a complete view of the field. Volume I details the complexities of Pavlovian

conditioning and describes the current status of traditional learning theories. Volume II discusses several important facets of instrumental conditioning and presents comprehensive coverage of the role of inheritance on learning. A strong and complete base of knowledge concerning learning theories, these volumes are ideal reference sources for a.

[The Eerdmans Encyclopedia of Early Christian Art and Archaeology](#) John Wiley & Sons

A volume of five parts, this book is a culmination of selected research papers from the second version of the international conferences on Urban Planning & Architectural Design for sustainable Development (UPADSD) and Urban Transit and Sustainable Networks (UTSN) of 2017 in Palermo and the first of the Resilient and Responsible Architecture and Urbanism Conference (RRAU) of 2018 in the Netherlands. This book, not only discusses environmental challenges of the world today, but also informs the reader of the new technologies, tools, and approaches used today for successful planning and development as well as new and upcoming ones. Chapters of this book provide in-depth debates on fields of environmental planning and management, transportation planning, renewable energy generation and sustainable urban land use. It addresses long-

term issues as well as short-term issues of land use and transportation in different parts of the world in hopes of improving the quality of life. Topics within this book include: (1) Sustainability and the Built Environment (2) Urban and Environmental Planning (3) Sustainable Urban Land Use and Transportation (4) Energy Efficient Urban Areas & Renewable Energy Generation (5) Quality of Life & Environmental Management Systems. This book is a useful source for academics, researchers and practitioners seeking pioneering research in the field.

*Sustainability in Energy and Buildings 2021* Rialto Press  
More than 400 distinguished scholars, including archaeologists, art historians, historians, epigraphers, and theologians, have written the 1,455 entries in this monumental encyclopedia--the first comprehensive reference work of its kind. From Aachen to Zurzach, Paul Corby Finney's three-volume masterwork draws on archaeological and epigraphic evidence to offer readers a basic orientation to early Christian architecture, sculpture, painting, mosaic, and portable artifacts created roughly between AD 200 and 600 in Africa, Asia, and Europe. Clear, comprehensive, and richly illustrated, this work will be an essential resource for all those interested in late antique and early Christian art, archaeology, and history. -- Provided by publisher.
