SMITH WHITNEY

Fundamentals of Management Accounting Macmillan College
 Completely revised and restructured new edition, updated to make it applicable to the Financial Services Training Package. The new edition teaches and develops the accounting principles involved for evaluating costs of manufacturing and service industries.

[Applied Management Accounting](#) IOS Press

ACQ 265 is an instructional book for Federal Acquisitions Professionals.

[Advanced Management Accounting](#) Defense Systems Management College

In a series of probing essays covering various periods in America's military history, this official history tells the story of how United States weapons were developed and produced, what notable managers and organizations were involved, and which weapons from those periods had a significant impact on America's wars.

[Handbook of Management Accounting](#) Elsevier Science & Technology

The United States is transitioning from an industrial age to an information age military. This transition requires transformation in warfighting and the way we organize to support the warfighter. Although the end-state of transformation cannot be fully defined in advance, we do know some of the necessary prerequisites for transformation. In particular, we know that early transformation requires exploiting information technology to reform defense

business practices and to create new combinations of capabilities, operating concepts, organizational relationships and training regimes. Successful transformation of U.S. military forces and Department of Defense (DoD) processes requires a strategy with clear objectives. Effective implementation of the strategy requires commitment and attention from the Department's senior leadership and clearly assigned roles and responsibilities. This document communicates the Department's strategy for transformation and assigns senior leader roles and responsibilities to ensure implementation of the strategy. Senior leadership commitment to transformation will mobilize the rest of the Department and stimulate the bottom-up innovation required for successful transformation. Effective implementation of the transformation strategy is an essential prerequisite for strategic management of the Defense program. It will allow the Department to define transformation investments that address future risk with enough specificity that they can be balanced against the other three primary risk areas identified in the Quadrennial Defense Review (QDR): force management, operational, and institutional risk.

[Management Accounting](#) Twayne Publishers

Illustrated using examples this student text explains management accounting in all of its phases, from the determination of figures through their presentation and interpretation, to their application in business management.

[Management Accounting](#) McGraw-Hill/Irwin

This new book on Science and Technology Management is the result of a 4day Advanced NATO Workshop held in Sinala, Romania and addresses an important subject in today's fast

moving world. Technology development, competitively and resulting employment, priorities and budget distribution, globalisation and evaluation processes, government's role and incentives, industrial participation, innovation and SME's international collaboration, scientific and technical aspirations and endeavours are included in its 33 presentations made by scientists, engineers and managers from 18 countries. The cross-fertilisation of ideas from east and west was most fruitful and the problems faced by the Central and Eastern European Countries in their course of transition to market economy are amply discussed. The reader will find useful information on the research and technology development structures of many countries, the methods of implementation and evaluation of research activities, the handling of specialised topics and the ways of maximising economic impact.
