ROWAN MADDOX

Nominee Directors Walter de Gruyter

From Publisher's Weekly: This posthumous collection of case material illustrates the treatment modality successfully employed by psychiatrist Bruch with patients suffering from the eating disorder of anorexia. Two of her associates at Baylor College of Medicine in Houston have edited this final work, taped by the author before her death in 1984. Bruch makes the reader privy to the therapeutic transaction between her patients who are in what she describes as "the relentless pursuit of thinness." Emphasizing the conversational ambiance of the therapy and discounting heretofore unsuccessful approaches of psychoanalysis and behavior modification, she helped her patients to heal. The dramatic dialogues in the cases presented allow us to hear these desperate young anorexic women individually explore their thwarted development, under the direction of a compassionate physician who guides them towards wellness.

The Last Pope Princeton University Press

Ecocriticism can be described in very general terms as the investigation of the many ways in which culture and the environment are interrelated and conceptualized. Ecocriticism aspires to understand and often to celebrate the natural world, yet it does so indirectly by focusing primarily on written texts. Hailed as one of the most timely and provocative developments in literary and cultural studies of recent decades, it has also been greeted with bewilderment or scepticism by those for whom its aims and methods are unclear. This book seeks to bring into view the development of ecocriticism in the context of Canadian literary studies. Selections include work by Margaret Atwood, Northrop Frye, Sherrill Grace, and Rosemary Sullivan.

Rob Howells has spent the last twenty years investigating the mysteries of Rennes-le-Chateau, the Priory of Sion and the history of conspiracy theories. During this time he has built up an extensive knowledge and experience of secret societies, symbolism and esoteric thought. As a manager for five years of Watkins Books in London, one of the oldest esoteric bookshops in Europe, he extended his research into transpersonal psychology, sacred geometry, Gnosticism and alchemy. He also came into contact with a number of secret societies during this time including the Priory of Sion, the Freemasons, the Order of Lazarus, various neo-Templar orders plus Sufis and other religious groups. His first book, Inside the Priory of Sion was released in 2011 and his second book, The Last Pope, was released in June 2013. He can currently be seen in a documentary series called Forbidden History on the BBC Yesterday channel

Truth & Bright Water Lulu.com

The tensions inherent in the structure and ideology of colonial organization thus provide the backdrop for the study. Gilmartin's extensive use of private papers, biographies, and autobiographies of prominent as well as less prominent political leaders helps give this study a

balanced viewpoint. He also draws on a range of popular and private Urdu materials that lend the book an authentic voice."--BOOK JACKET.

Hard Times & Oliver Twist (Annotated) Canadian Scholars Press

Can the boxing gym be recognised as an effective space for supporting desistance? Exploring the psychosocial manifestations of boxing, this enlightening study reviews conflicting evidence to determine boxing's place in the criminal justice system. Drawing upon the empirical insights, with case studies of participants' backgrounds and their motivations for taking up the sport, Jump measures the value of the discipline, as well as the respect and fraternity that some claim boxing provides for young men. This is a perceptive addition to the debate about sport's role in criminal desistance that delves deep into themes of masculinity and violence.

I Will Survive is the story of Gloria Gaynor, America's "Queen of Disco." It is the story of riches and fame, despair, and finally salvation. Her meteoric rise to stardom in the mid-1970s was nothing short of phenomenal, and hits poured forth that pushed her to the top of the charts, including "Honey Bee," "I Got You Under My Skin," "Never Can Say Goodbye," and the song that has immortalized her, "I Will Survive," which became a #1 international gold seller. With that song, Gloria heralded the international rise of disco that became synonymous with a way of life in the fast lane - the sweaty bodies at Studio 54, the lines of cocaine, the indescribable feeling that you could always be at the top of your game and never come down. But down she came after her early stardom, and problems followed in the wake, including the death of her mother, whose love had anchored the young singer, as well as constant battles with weight, drugs, and alcohol. While her fans always imagined her to be rich, her personal finances collapsed due to poor management; and while many envied her, she felt completely empty inside. In the early 1980s, sustained by her marriage to music publisher Linwood Simon, Gloria took three years off and reflected upon her life. She visited churches and revisited her mother's old Bible. Discovering the world of gospel, she made a commitment to Christ that sustains her to this day.

A wolf tree is a tree in a bush or a thicket which is different in shape from those around it; a tree whose broader trunk and spreading branches indicate that it once grew alone but is now surrounded. Alison Calder's poems shine the light of a poet's curiosity on all manner of "natural occurrences," which nevertheless stand out. The book opens with an examination of the extreme forms this nature may take - from the Dutch legend of the false child Sooterkin, to two-headed calves, Zip the Pinhead, and other medical curiosities, particularly those captured by 19th century photographic techniques. The disquieting feelings created by these subjects persist, causing the reader to proceed watchfully, even when the poet's attention switches to more common themes and images - plastic clotheslines, wildflowers of western Canada, snow geese, the Porta Nigra in Trier, Germany. A selection of poems from this manuscript received the Bronwen Wallace Memorial Award for writing excellence by a writer under the age of 35. A section of this manuscript, *Sexing the Prairie*, was published in the journal *Open Letter* in Fall 2006.

Ready to build cloud native applications? Get a hands-on introduction to daily life as a developer crafting code on OpenShift, the open source container application platform from Red Hat. Creating and packaging your apps for deployment on modern distributed systems can be daunting. Too often, adding infrastructure value can complicate development. With this practical guide, you'll learn how to build, deploy, and manage a multitiered application on OpenShift. Authors Joshua Wood and Brian Tannous demonstrate how OpenShift speeds application development. With the Kubernetes container orchestrator at its core, OpenShift simplifies and automates the way you build, ship, and run code. You'll learn how to use OpenShift and the Quarkus Java framework to develop and deploy apps using proven enterprise technologies and practices that you can apply to code in any language. Learn the development cycles for building and deploying on OpenShift, and the tools that drive them Use OpenShift to build, deploy, and manage the ongoing lifecycle of an n-tier application Create a continuous integration and deployment pipeline to turn your source code changes into production rollouts Automate scaling decisions with metrics and trigger lifecycle

The Battle of the Kegs Andesite Press

Robert Schofield explores the rational elements of British experimental natural philosophy in the 18th century by tracing the influence of two opposing concepts of the nature of matter and its action—mechanism and materialism. Both concepts rested on the Newtonian interpretation of their proponents, although each developed more or less independently. By integrating the developments in all the areas of experimental natural philosophy, describing their connections and the influences of Continental science, natural theology, and to a lesser degree social and institutional changes, the author demonstrates that mechanistic concepts dominated interpretations from about 1687 to 1740, when they were replaced by materialistic concepts. A revival of the mechanistic approach early in the next century made England a fertile field for ideas on the dynamic interaction of forces. Originally published in 1970. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Two classics in one! Wonderfully spread out in one, annotated and illustrated, compact volume.

Many vintage books are increasingly scarce and expensive. We published this volume in an affordable, modern, high-quality edition complete with a biography of the author. Includes: *Hard Times* (1854) *Oliver Twist* (1867

Greening the Maple Penguin

The twelfth-century French poet Chrétien de Troyes is a major figure in European literature. His courtly romances fathered the Arthurian tradition and influenced countless other poets in England as well as on the continent. Yet because of the difficulty of capturing his swift-moving style in translation, English-speaking audiences are largely unfamiliar with the pleasures of reading his poems. Now, for the first time, an experienced translator of medieval verse who is himself a poet provides a translation of Chrétien's major poem, *Yvain*, in verse that fully and satisfyingly captures the movement, the sense, and the spirit of the Old French original. *Yvain* is a courtly romance with a moral tenor; it is ironic and sometimes bawdy; the poetry is crisp and vivid. In addition, the psychological and the socio-historical perceptions of the poem are of profound literary and historical importance, for it evokes the emotions and the values of a flourishing, vibrant medieval past.

Nobody Said Not to Go Penguin

Gay Canada is a bibliographic record of major print and filmed works relating to Canadian gay and lesbian life from 1984 to 2000. It is an essential source for libraries, students of sexual diversity students, and archivists. Gay Canada is an accessible and serious research tool. It is a collection of important and fascinating information providing, in conjunction with the 1979 and 1984 editions of *Homosexuality in Canada: A Bibliography*, a guide to Canadian LGBT issues from earliest times to the opening of the 21st century.

Yvain Coteau Books

One of the biggest stumbling blocks we hit when setting out to make our dreams come true is appreciating what is going well. Most of us have an unfortunate tendency to dwell on the problems rather than on the good things in our lives ... and then we wonder why things just seem to keep getting worse instead of better. In *The Power of Appreciation in Everyday Life*, psychologist Noelle Nelson explains how you can achieve success in every area of your life through transforming your beliefs with appreciation.

OpenShift for Developers Dundurn

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Thoroughly updated for currency and with exciting new practical examples throughout, this popular text provides the tools, practice, and basic knowledge for success in the biotech workforce. With its balanced coverage of basic cell

and molecular biology, fundamental techniques, historical accounts, new advances and hands-on applications, the Third Edition emphasizes the future of biotechnology and your role in that future. Two new features—Forecasting the Future, and Making a Difference—along with several returning hallmark features support the new focus.

An Encyclopaedia of Practical Information and Universal Formulary Jason Aronson, Incorporated "A rip-roaring bio" of the trailblazing New Yorker journalist that "explore[s] both the passion and dissatisfaction that fueled Hahn's wanderlust" (Entertainment Weekly). Emily Hahn first challenged traditional gender roles in 1922 when she enrolled in the University of Wisconsin's all-male College of Engineering, wearing trousers, smoking cigars, and adopting the nickname "Mickey." Her love of writing led her to Manhattan, where she sold her first story to the New Yorker in 1929, launching a sixty-eight-year association with the magazine and a lifelong friendship with legendary editor Harold Ross. Imbued with an intense curiosity and zest for life, Hahn traveled to the Belgian Congo during the Great Depression, working for the Red Cross; set sail for Shanghai, becoming a Chinese poet's concubine; had an illegitimate child with the head of the British Secret Service in Hong Kong, where she carried out underground relief work during World War II; and explored newly independent India in the 1950s. Back in the United States, Hahn built her literary career while also becoming a pioneer environmentalist and wildlife conservator. With a rich understanding of social history and a keen eye for colorful details and amusing anecdotes, author Ken Cuthbertson brings to life a brilliant, unconventional woman who traveled fearlessly because "nobody said not to go." Hahn wrote hundreds of acclaimed articles and short stories as well as fifty books in many genres, and counted among her friends Rebecca West, Ernest Hemingway, Dorothy Parker, James Thurber, Jomo Kenyatta, and Madame and General Chiang Kai-shek.

The Book of Emma Insomniac Press

Daughters Who Walk This Path depicts the dramatic coming of age of Morayo, a spirited and intelligent girl growing up in 1980s Ibadan who is thrust into a web of oppressive silence woven by the adults around her. It's a legacy of silence many women in Morayo's family share. Only Aunty Morenike-once protected by her own mother-provides Morayo with a safe home, and a sense of female community which sustains Morayo as she grows into a young woman in bustling, politically charged, often violent Nigeria.

The Hippocratic Treatises "On Generation", "On the Nature of the Child", "Diseases IV"

Grove Press

From ancient herbal remedies to modern drugs, the field of medicine has evolved dramatically over many centuries. Medicine takes you through the ages of human history and uncovers the greatest medical breakthroughs, with incredible coverage of disease, drugs, treatment, and cures. Turn the richly illustrated pages replete with compelling stories to learn all about the gory pitfalls and miraculous successes of medical history - from trepanning, bloodletting, and body snatching to brand new developments in IVF and gene therapy. Clear diagrams explain major diseases such as cancer, and trace the progression of medical treatment through time, from ancient healing arts to scurvy and smallpox, and the World Wars to modern psychiatry. Double-page features on key scientists and researchers offer unique insight into their lives, experiments, and motivations. Perfect for adults, students, and anyone interested in the fascinating medical history of the world, Medicine is the definitive visual history of our health.

Trichier Yale University Press

The lives of the inhabitants of two towns, Truth and Bright Water, separated by a river running between Montana and an Ottawa Indian reservation, intertwine over the course of a summer as seen through the eyes of two young boys.

Instructor's Solutions Manual for Glashow's from Alchemy to Quarks "O'Reilly Media, Inc."

Amazing discoveries and inventions of the last eight years bring this new edition of 1,000 Inventions and Discoveries up to date. Uncover the stories behind 1,000 remarkable inventions and discoveries that have shaped our world, from making fire to the gadgets of the 21st century. This revised and updated edition brings this comprehensive review of humanity's greatest ideas up to date. It is packed with discoveries and innovations in science, space, technology, transportation, medicine, mathematics, and language, along with a history timeline.
