founded on real estate speculation and the greed of banks, who freely printed the paper money he needed to finance the then tallest building in the United States—the Exchange Coffee House, a 153-room, seven-story colossus in downtown Boston. The story of Dexter's rise and eventual collapse offered an object lesson to the rising young nation, and presents striking parallels to the subprime

mortgage meltdown and looming economic collapse of today. Performing Otherness No Starch Press Photography is a lie. Just think about it: photographers create two-dimensional images that sometimes even lack color and then expect everyone who views the image to believe that this is how the subject and scene appeared in front of the lens, in real life. What is truly amazing

is that people fall for the visual trickery readily, almost as if they want to be deceived. It gets better: people still believe that one can photograph only what is really there. In this book, Irakly Shanidze reveals the smoke and mirrors that the best photographers use to surprise, entertain, and inspire viewers. He explains that the individual features of photographer's perception

and technical limitations of his equipment make him do things that may eventually make a picture look very different from how a viewer would see the same scene with a naked eye and can lead to a ruined picture. Conversely, photographers who understand these phenomena can use the aforementioned “constraints” to deliberately adjust the level of truthfulness in their pictures.

In each beautifully illustrated chapter, Shanidze discloses the photographic tools that enterprising photographers can use to create visual deception (e.g., to create a sense of dimension, create day-for-night effects, establish mood, simulate candid photographs, and generally suspend disbelief—with out the time-consuming post-processing!). In doing so, he

describes the image objectives (in other words, defines the image concepts) and introduces the tools needed to achieve them—whether a lens of a certain focal length, a light of a specific wattage, or a given shutter speed. He also deconstructs some of his favorite images to show readers how he was able to create a chiseled deception of his own. Armed with this book, photographers will learn to

truly take the reins in their photographic pursuits and deliver supercharged, iconic, storytelling images. spark of inspiration and a passion to create. Let Game Art take you on a visual journey through these beautiful worlds, as told by the minds that brought them to life. F Is for Phony Read Books Ltd Originally published in 1930, this book was written by George Thomas, the 'All-England Singles' Champion of that time, and the man whom the famous 'Thomas Cup' is dedicated

to, which is still played for yearly today. A fascinating look at the sport of badminton at that time, and accompanied with advice that is still useful and practical today, this book is highly recommended for inclusion on the bookshelf of anyone with a passion for the sport. Many of these earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and

increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork. [Poker and the Art of War](#) Walter de Gruyter

Max Willem, a young art student in Montreal at the end of the 1960s, becomes obsessed with outward appearances - with makeup, costume, and masks of all kinds. For him, outward

reality, and in particular that of the opposite sex, is composed of many veils of illusion and artifice through which he must see if he is to feel fully alive. At the same time, Max discovers his exceptional talent for art forgery. Moving to New York, he becomes a tool in the hands of a powerful international ring dealing in forged art, and suffers from the loss of his own artistic integrity.

Himself seduced as much a seducer, how can Max escape and redeem his artistic soul? In The Art of Deception, Sergio Kokis has written a novel about mystification and illusion. His exuberant narrative provides a caustic insight into the undersides of art and of love. **Artists of Deception** Polymarket Press Now reissued for contemporary readers, this entertaining

primer on critical thinking has been teaching people to think and speak more clearly for more than four decades. Do you know when you're being deceived? Can you trust the information coming from Washington, the media, and the Internet? This classic work on critical thinking uses a novel approach to teach the basics of informal logic. On the assumption that "it takes

one to know one," the authors have written the book from the point of view of someone who wishes to deceive, mislead, or manipulate others. Having mastered the art of deception, readers will then be able to detect the misuse or abuse of logic when they encounter it in others -- whether in a heated political debate or while trying to evaluate the claims of a persuasive sales person.

Using a host of real-world examples, the authors show you how to win an argument, defend a case, recognize a fallacy, see through deception, persuade a skeptic, and turn defeat into victory. Whether you're evaluating a social media rumor or you just want to become more adept at making your points and analyzing others' arguments, *The Art of Deception*-- now with an

updated preface--will give you the intellectual tools to become a more effective thinker and speaker.

subsequent development and evolution, with reference to notable events, figures, and organisations. "A Brief History of Badminton" constitutes a must-read for those with an interest in the sport, and it would make for a fantastic addition to collections of allied literature. Special Troops, an extraordinary US Army unit that used inflatable tanks and sound effects records to stage a traveling road show of deception on the battlefields of Europe during WWII. Many who served in this to-secret unit were artists destined for illustrious post-war art careers, including a budding fashion designer named Bill Blass. In their spare time

they painted and sketched their way across war-torn Europe. The book is a catalog for a museum exhibit about the unit, and a companion to the forthcoming documentary film. *Encyclopedia of Play in Today's Society* Dundurn In *Performing Deception*, Brian Rappert reconstructs the practice of entertainment magic by analysing it through the lens of perception, deception and

learning, as he goes about studying conjuring himself. Through this novel meditation on reasoning and skill, Rappert elevates magic from the undertaking of mere trickery to an art that offers the basis for rethinking our possibilities for acting in the modern world. *Performing Deception* covers a wide range of theories in sociology, philosophy, psychology and elsewhere

in order to offer a striking assessment of the way secrecy and deception are woven into social interactions, as well as the illusionary and paradoxical status of expertise.
