Ecotherapy The Rosen Publishing Group, Inc

During the course of a walk, a young boy identifies animals of different colors.

Drive Teacher Created Materials

Plus-sized sixteen-year-old Maisie Martin never thought she had the figure to compete in a beauty pageant, but this vacation is about to change everything. Maisie has spent most of her life hiding her body from everyone: her gorgeous best friend, her pageant-winning sister, and definitely her longtime crush. Never one to jump in the water, Maisie is planning on taking it easy while her friends chill at the beach. But then her BFF starts flirting

with the boy she's always loved, her older sister comes home and steals the spotlight, and Maisie has found herself pushed aside like usual. Except now, she's had enough. After forging new friendships, Maisie takes the deep dive and enters the local Miss Teen Queen. Now, with all eyes on her, can Maisie prove she has a place in the spotlight? This contemporary young adult novel is as relatable as it is charming and Maisie's realistic journey towards confidence and self-love will draw readers in as she learns how to celebrate all of herself.

Winner of the Newbery Medal, Coretta Scott King Author Award, and Kirkus Prize for Young Readers' Literature! Perfect for fans of Raina Telgemeier and Gene Luen Yang, New Kid is a timely, honest graphic novel about starting over at a new school where

diversity is low and the struggle to fit in is real, from award-winning author-illustrator Jerry Craft. Seventh grader Jordan Banks loves nothing more than drawing cartoons about his life. But instead of sending him to the art school of his dreams, his parents enroll him in a prestigious private school known for its academics, where Jordan is one of the few kids of color in his entire grade. As he makes the daily trip from his Washington Heights apartment to the upscale Riverdale Academy Day School, Jordan soon finds himself torn between two worlds—and not really fitting into either one. Can Jordan learn to navigate his new school culture while keeping his neighborhood friends and staying true to himself? This middle grade graphic novel is an excellent choice for tween readers, including for summer reading. New Kid is a selection of the Schomburg Center's Black Liberation Reading List. Plus don't miss Jerry Craft's *Class Act!*

The Highlights Book of Things to Do is the essential book of pure creativity and inspiration. Kids ages seven and up will find hundreds of ways to build, play, experiment, craft, cook, dream, think, and become outstanding citizens of the world. This highly visual, hands-on activity book shows kids some of the best ways to do great things--from practicing the lost arts of knot-tying, building campfires, connecting circuits, playing jump rope, drawing maps, and writing letters, to learning how to empower themselves socially, emotionally, and in their communities. The final chapter, Do Great Things, inspires kids become caring individuals, confident problem solvers, and thoughtful people who can change the world. The Renewable Revolution Roaring Brook Press

Tackles a human problem we all share—the fate of the earth and our role in its future Confident that your personal good deeds of environmental virtue will save the earth? The stories we encounter about the environment in popular culture too often promote an imagined moral economy, assuring us that tiny acts of voluntary personal piety, such as recycling a coffee cup, or purchasing green consumer items, can offset our destructive habits. No need to make any fundamental structural changes. The trick is simply for the consumer to buy the right things and shop our way to a greener future. It's time for a reality check. *Ecopiety* offers an absorbing examination of the intersections of environmental sensibilities, contemporary expressions of piety and devotion, and American popular culture. Ranging from portrayals of environmental sin and virtue such as the eco-pious depiction of Christian Grey in *Fifty Shades of Grey*, to the green capitalism found in the world of mobile-device “carbon sin-tracking” software applications, to the socially conscious vegetarian vampires in *True Blood*, the volume illuminates the work pop culture performs as both a mirror and an engine for the greening of American spiritual and ethical commitments. Taylor makes the case that it is not through a framework of grim duty or obligation, but through one of play and delight, that we may move environmental ideals into substantive action.

Girl in Pieces The Rosen Publishing Group, Inc
 Maker Comics: Live Sustainably! is a step-by-step DIY guide that will help kids roll up their sleeves and get making with confidence! Inside this graphic novel you'll find instructions for eight sustainability projects. After Isaac is caught vandalizing a sign at his local community garden, he's put to work under the wing of one of the gardeners, Aurora. But Isaac's time with Aurora isn't just about growing vegetables! As they make useful projects together for the garden and for Isaac's home, Aurora teaches Isaac about the natural and human-built systems we're all a part of, how our decisions and lifestyles impact the planet, and how even a kid can make better choices to live more sustainably!

50 Amazing Things Kids Need to Know About Math Andrews McMeel Publishing

A comprehensive guide to designing homeschool curriculum, from one of the country's foremost homeschooling experts—now revised and updated! Homeschooling can be a tremendous gift to your children—a personalized educational experience tailored to each kid's interests, abilities, and learning styles. But what to teach, and when, and how? Especially for first-time homeschoolers, the prospect of tackling an annual curriculum can be daunting. In *Home Learning Year by Year*, Rebecca Rupp presents comprehensive plans from preschool through high school, covering integral subjects for each grade, with lists of topics commonly presented at each level, recommended resource and reading lists, and suggestions for creative alternative options and approaches. Included, along with all the educational basics, are techniques and resources for teaching

everything from philosophy to engineering, as well as suggestions for dealing with such sensitive topics as sex education. Now revised throughout with all-new updates featuring the most effective and up-to-date methods and reading guides to homeschool your child at all ages, *Home Learning Year by Year* continues to be the definitive book for the homeschooling parent.

I Went Walking Andrews McMeel Publishing

If your company wants to save money currently spent on waste hauling, disposal, and clean-up costs, while protecting the environment, this is the book for you. Let *Trash to Cash* serve as your implementation guide to an effective, on-going corporate paper recycling and waste reduction program. Berman addresses the major issues and realities surrounding paper consumption and recycling. This prescriptive guide can show you how to achieve a financially successful program for your company. Fully illustrated, *Trash to Cash* contains practical and insightful case studies that demonstrate how successful programs have been created and kept alive at AT&T, McDonald's, Merrill Lynch and other role-model corporations. Learn how to be on target environmentally while saving your company thousands, even millions of dollars.

Global Change--what You Can Do CRC Press

Stop bullying before it starts by teaching young children compassion, conflict resolution, and respect.

Raising Kids Who Will Make a Difference Indescribable Kids

Explains things that children can do to recycle at home, at school, or anywhere.

50 Simple Things Kids Can Do to Recycle Routledge

"Scribble, the book's main character, never thought he was different until he met his first drawing. Then, after being left out because he didn't look like everyone else, Scribble teaches the drawings how to accept each other for who they are which enables them to create amazing art together!"--Provided by publisher.

[The New 50 Simple Things Kids Can Do to Save the Earth](#)
Houghton Mifflin Harcourt

In the spirit of "An Inconvenient Truth," John Javna and his 14-year-old daughter, Sophie, offer 50 environmentally inspired, kid-powered approaches to reducing waste and improving the world.

Hand to Earth: Saving the Environment 6-Pack Andrews McMeel Publishing

Pesticides are used everywhere: in schools, homes, parks, and playgrounds, and especially in agriculture—the fruits and vegetables we eat carry the residue of one or more pesticides. In this riveting narrative, readers learn how pesticides became so popular in the United States and the many ways they can damage human health—both in the short term and long term. Asthma and cancer are linked to pesticides, as are developmental problems such as ADHD, autism, and lowered IQ. Pesticides can affect a woman's fertility and the ability to carry a pregnancy to term. Readers can take steps to protect themselves and their communities from these dangerous chemicals by dealing with pests in a safer, more environmentally friendly way. The book examines integrated pest management, government regulation of pesticides, and ways teens can contribute to a healthier future, for example, by starting a garden club at school or in the neighborhood.

What I Like About Me NSTA Press

Here is a trailblazing book on issues of vital interest to the future of humankind. *Ecotherapy: Healing Ourselves, Healing the Earth* sheds light on humankind's most serious health challenge ever—how to save our precious planet as a clean, viable habitat. As a guide for therapists, health professionals, pastoral counselors, teachers, medical healers, and especially parents, *Ecotherapy: Healing Ourselves, Healing the Earth* highlights readers' strategic

opportunities to help our endangered human species cope constructively with the unprecedented challenge of saving a healthful planet for future generations. *Ecotherapy: Healing Ourselves, Healing the Earth* introduces readers to an innovative approach to ecologically-grounded personality theory, spirituality, ecotherapy, and education. The book shares the author's well-developed theories and methods of ecological diagnosis, treatment, and education so professionals and parents, our most influential teachers, can rise to the challenge of saving our planet. Readers will find that the book helps them accomplish this goal as it: explores an expanded, ecologically grounded theory of personality development, the missing dimension in understanding human identity formation outlines a model for doing ecologically oriented psychotherapy, counseling, medical healing, teaching, and parenting describes life-saving perspectives for making one's lifestyle more earth-caring demonstrates the importance of hope, humor, and love suggests how these earthy approaches may be utilized in a variety of social contexts and cultures A systematic theory and practice guidebook, *Ecotherapy: Healing Ourselves, Healing the Earth* fills a wide gap in both the counseling and therapy literature and the ecology literature. It offers an innovative model for fulfilling the "ecological circle" between humans and nature with three action dimensions. These are self-care by being intentionally nurtured by nature; spiritual enrichment by enjoying the transcendent Spirit in nature; and responding by nurturing nature more responsibly and lovingly. The theories and practical applications presented in the book come together to explore long-overlooked issues at the boundary between human health and the health of

the natural environment. Psychotherapists, health professionals, and teachers; pastoral counselors and other clergy who counsel and teach; laypersons who are parents and grandparents; and individuals and groups interested in environmental issues will find Ecotherapy: Healing Ourselves, Healing the Earth essential for approaching the long-neglected earthy roots of the total human mind-body-spirit organism.

Because protecting environmental resources has become an issue of scientific, political, and historical import, service-learning projects that serve the planet have become an important part of a wide range of curricula. Students will find a wealth of opportunities both at home and abroad that will directly impact the Earth's wildlife, aquatic health, and natural resources. This engaging volume surveys the various projects available to students interested in using service learning to find solutions to local and global environmental issues. Readers also learn how to tie projects to coursework and apply their skills to future pursuits.
