La réception de l'architecture du mouvement moderne
Editions Parenthèses
Living with History focuses on a particular aspect of heritage preservation in the twentieth century: destruction and postwar reconstruction in Belgium, France, Germany, Great Britain, and The Netherlands. This book establishes a status quaestionis for the historiography of wartime and postwar preservation, and sets these particular developments in preservation history in the context of the general evolution of architecture and urbanism. The authors investigate the specific role of conservationists and heritage institutions and administrations in the overall reconstruction and examine the part played by architects and planners in heritage preservation. *ABM* Université de Saint-Etienne
The history of modern architecture as

constructed by historians and key texts. Writing, according to Panayotis Tournikiotis, has always exerted a powerful influence on architecture. Indeed, the study of modern architecture cannot be separated from a fascination with the texts that have tried to explain the idea of a new architecture in a new society. During the last forty years, the question of the relationship of architecture to its history—of buildings to books—has been one of the most important themes in debates about the course of modern architecture. Tournikiotis argues that the history of modern architecture tends to be written from the present, projecting back onto the past our current concerns, so that the "beginning" of the story really functions as a "representation" of its end. In this book the buildings are the quotations, while the texts are the structure. Tournikiotis focuses on a group of books by major historians of the twentieth century: Nikolaus Pevsner, Emil Kaufmann, Sigfried Giedion, Bruno

Zevi, Leonardo Benevolo, Henry-Russell Hitchcock, Reyner Banham, Peter Collins, and Manfredo Tafuri. In examining these writers' thoughts, he draws on concepts from critical theory, relating architecture to broader historical models.

Louis Herman de Koninck: architecte des années modernes, architect of modern times

Editions Mardaga
"Les démarches radicales s'inscrivent souvent dans un espace transcendant. C'est ce qui est arrivé à la modernité architecturale, bien connue pour ses héros, ses icônes, ses manifestes et ses intentions sociales généreuses. Mais comment l'architecture, art de l'utilitas, aurait-elle pu se délier des contraintes du XXe siècle? Elle est bien la fille des mythes, des contradictions, des aspirations et plus encore, des rapports de force en transformation du siècle passé"--

The Architecture of Paris

Routledge
This book sheds light on environmental control in buildings from the 17th century onwards. Even

before building services became a hallmark of buildings, in order to address increasing sanitary and comfort needs, pioneering experiences had contributed to improve design skills of professionals. After long being determined by passive features, indoor climate became influenced by installations and plants, representing the most significant shift of paradigm in the modern age's construction history. This change was not without consequences, and the book presents contributions showing the deep connection between architectural design, comfort requirements and environmental awareness throughout the 19th century. Taking into account the differences between different European countries, the book is a valuable resource for architects, designers and heritage professionals who are interested in environmental design, enabling them to develop a deeper knowledge of heritage in order to address to climate demands, particularly going towards a future in which energy savings and fuel consumption

reduction will dictate our behaviour. It includes contributions by leading international experts: Melanie Bauernfeind, Marco Cofani, Lino Vittorio Bozzetto, Emmanuelle Gallo, Alberto Grimoldi, Dean Hawkes, Angelo Giuseppe Landi, Mattias Legnér, Oriel Prizeman, and Henrik Schoenefeldt. Photography, Modern Architecture, and Design Editions Parenthèses Examining the photographic collection that Alberto Sartoris donated to the Swiss federal government, this text throws light on a poorly understood aspect of 20th century architecture, namely the mechanisms behind the creation and diffusion of the 'image of modern architecture'. Histoire de l'architecture et de l'urbanisme modernes Leuven University Press This book is an account of a significant aspect of Le Corbusier's work - the relationships between form and colour. The book relates the way in which he arrived at a personal architectonic polychromy in the early 1920s and how his theories relating to Purism developed. Les immeubles d'appartements modernes, Saint-Etienne,

1923-1939 University of Chicago Press This book provides an in-depth exploration of the rich and persistent use of analogical thinking in the built environment. Since the turn of the 21st century, "design thinking" has permeated many fields outside of the design disciplines. It is expected to succeed whenever disciplinary boundaries need to be transcended in order to think "outside the box." This book argues that these qualities have long been supported by "analogical thinking"-an agile way of reasoning in which think the unknown through the familiar. The book is organized into four case studies: the first reviews analogical models that have been at the heart of design thinking representations from the 1960s to the present day; the second investigates the staying power of biological analogies; the third explores the paradoxical imaginary of "analogous cities" as a means of integrating contemporary architecture with heritage contexts; while the fourth unpacks the critical and theoretical potential of linguistic metaphors and visual comparisons in architectural discourse.

Comparing views on the role of analogies and metaphors by prominent voices in architecture and related disciplines from the 17th century to the present, the book shows how the "analogical world of the project" is revealed as a wide-open field of creative and cognitive interactions. These visual and textual operations are explained through 36 analogical plates which can be read as an inter-text demonstrating how analogy has the power to reconcile design and theories.

Catalogue of the Books Relating to Architecture, Construction & Decoration in the Public Library of the City of Boston PUQ

Architecte et propagandiste du Mouvement moderne, Alberto Sartoris (1901-1998) a réuni une collection exceptionnelle de photographies

d'architecture, en partie publiées de 1932 à 1957 dans des anthologies devenues mythiques, Gli Elementi dell'architettura funzionale et l'Encyclopédie de l'architecture nouvelle. Ces 8000 tirages originaux documentent des travaux d'architectes du monde entier, de Le Corbusier et Walter Gropius à Oscar Niemeyer et Luis Barragan, photographiés par les meilleurs spécialistes de leur temps, comme Arthur Köster, Julius Shulman ou Armando Salas Portugal. Cet ouvrage présente et analyse cette collection, l'un des secteurs-clés des archives données par Alberto Sartoris à la Confédération. Il illustre son activité de collecte et de publication et permet d'éclairer un aspect méconnu de l'histoire de l'architecture au XXe siècle : les mécanismes de fabrication et de diffusion de l'" image de l'architecture moderne ", ainsi que le rôle déterminant dévolu à la photographie dans ce processus.

[Mouvements modernes en architecture](#) EPFL Press
Hailed as one of the key theoreticians of modernism, Eugène-Emmanuel Viollet-le-Duc was also the most

renowned restoration architect of his age, a celebrated medieval archaeologist and a fervent champion of Gothic revivalism. He published some of the most influential texts in the history of modern architecture such as the Dictionnaire raisonné de l'architecture française du XIe au XVIe siècle and Entretiens sur l'architecture, but also studies on warfare, geology and racial history. Martin Bressani expertly traces Viollet-le-Duc's complex intellectual development, mapping the attitudes he adopted toward the past, showing how restoration, in all its layered meaning, shaped his outlook. Through his life journey, we follow the route by which the technological subject was born out of nineteenth-century historicism.

RIBA Journal MIT Press
La prise de conscience du patrimoine architectural de la Belgique et le souci de sa préservation intéressent un public toujours plus nombreux, désireux d'une information de qualité. Ce constat a amené les Editions Racine à proposer une nouvelle édition, en un volume, des ouvrages à succès " Art nouveau en Belgique " et

" Art déco et Modernisme en Belgique ", comprenant un texte entièrement actualisé ainsi que de nouvelles photographies. Avec des architectes comme Victor Horta et Henri van de Velde, entre autres, et des lieux comme le palais Stoclet, le trésor architectural belge est unique et mondialement connu. Ce livre montre l'importance, la richesse et la diversité de l'Art nouveau, de l'Art déco et du Modernisme. Il donne une vue d'ensemble sur les œuvres les plus importantes réalisées en Belgique, de Verviers à Ostende.

The Architectonic

Colour EPFL Press

Everyone knows Notre Dame, the Eiffel Tower, and the chateaux of the Loire Valley, but French architects have also produced some of the most iconic buildings of the twentieth century, playing a central role in the emergence and development of modernism. In France, Jean-Louis Cohen presents a complete narrative of the unfolding architectural modernity in the country, grappling not only with the buildings but also with the political and critical context surrounding them. Cohen examines

the developments in urban design and architecture within France, depicting the continuities and breaks in French architecture since 1900 against a broader international background. Describing the systems of architectural exchange with other countries—including Italy, Germany, Russia, and the United States—he offers a new view on the ideas, projects, and buildings otherwise so often considered only from narrow nationalistic perspectives. Cohen also maps the problematic search for a national identity against the background of European rivalries and France's colonial past. Drawing on a wealth of recent research, this authoritatively written book will challenge the way design professionals and historians view modern French architecture.

La sauvegarde de l'architecture moderne

creaphis editions
Cet ouvrage propose une réinterprétation inédite de l'architecture de la fin du 19e et de l'ensemble du 20e siècle, selon une méthode privilégiant l'analyse de la structure, du revêtement et des matériaux, ainsi que celle

de l'influence, tant en termes de conception que de mise en œuvre, des principes formulés par Viollet-le-Duc et Semper. Richement illustré, ce livre offre au lecteur une nouvelle manière de " voir " l'architecture. Rédigé par deux grands spécialistes du domaine et organisé selon une corrélation continue entre textes et images, il constitue une solide référence didactique pour les étudiants et les chercheurs en architecture.

Modern Architectural

Theory Editions Mardaga
Abstracts of journal articles, books, essays, exhibition catalogs, dissertations, and exhibition reviews. The scope of ARTbibliographies Modern extends from artists and movements beginning with Impressionism in the late 19th century, up to the most recent works and trends in the late 20th century.

Photography is covered from its invention in 1839 to the present. A particular emphasis is placed upon adding new and lesser-known artists and on the coverage of foreign-language literature. Approximately 13,000 new entries are added each year.

Published with title LOMA from 1969-1971.

The Historiography of Modern Architecture

Reaktion Books

This book tells the story of an epochal change in the human condition that was part of what is often thought of as

'modernization' -a process that remade culture and society in France in the 19th and 20th centuries.

Hygiene, Steven Zdatny convincingly contends, was that change. He reflects on how the development of hygiene: changed the way people thought about and treated their bodies; put an end to age-old afflictions and brought comfort where discomfort had been the unavoidable companion of existence; and helped produce a tripling of life expectancy. The book considers how the evolution of hygiene produced a society where people washed often, changed their clothes every day, lived without lice and scabies, and performed their natural functions indoors. It reflects on developments in industrial plumbing, public education, government investment, the invention of new products to keep bodies and homes clean, and a parallel makeover in the

expectations, sensibilities, and practices about what is 'proper' and what is disgusting. These developments, the study reveals, were not steady and did not happen everywhere at the same pace. But in the fullness of time, they produced a revolution in the human condition.

Modern Architecture of the 19th Century

Université de Saint-Etienne

Cette anthologie réunit des textes et des conférences inédits en langue française et produits par sept pionniers du Mouvement moderne en architecture : M. Ginzburg, A. Lurçat, E. Mendelsohn, H. Meyer, G. Michelucci, J. J. P. Oud et R. M. Schindler. Ces documents sont accompagnés par une double lecture, historique et architecturologique. La première souligne d'une part des similitudes à travers leur appartenance pionnière au phénomène de l'architecture moderne, à savoir dans leurs ruptures avec l'éclectisme architectural ambiant, dans leurs réponses aux défis des nouveaux programmes architecturaux issus des demandes sociales élargies, ainsi que dans leurs résolutions de

problèmes architecturaux à l'aide des innovations technologiques et productives. Par ailleurs, des différences résident dans leurs contextes respectifs, nationaux, politiques, socio-économiques, culturels, lesquels ont caractérisé leurs approches personnelles. La seconde lecture réside dans l'approche de leur pensée respective de l'espace architectural. Tous impliqués en faveur d'une architecture organique, laquelle reste encore à approfondir, ces pionniers se distinguent cependant dans les manières de penser l'espace et de traduire ces pensées en diverses façons d'aborder les opérations de projet architectural : des différences éclairantes pour la connaissance sur la conception en architecture.

Photographie et architecture moderne

Yale University Press

L'avenir du patrimoine moderne est incertain malgré les avancées faites dans ce domaine depuis une vingtaine d'années. Restaurés avec le plus grand soin, comme si rien ne s'était passé depuis leur livraison, quand il s'agit des grandes œuvres du mouvement moderne, des

édifices et des ensembles urbains ordinaires du milieu du xxe siècle sont trop souvent méprisés, sinon maltraités, même s'ils ne sont pas sans qualités. En conviant une trentaine d'auteurs, gestionnaires, praticiens et chercheurs à faire part de leurs expériences et de leurs expertises en matière de documentation, de protection, de conservation et de mise en valeur de l'architecture novatrice du xxe siècle, cet ouvrage propose un bilan sur l'état de la question au Québec, au Canada et ailleurs. Il s'inscrit dans la foulée du colloque international organisé fin 2010 par l'École de design et

l'Institut du patrimoine de l'Université du Québec à Montréal.

Histoire mondiale de l'architecture et de l'urbanisme modernes

Springer

In this study of space and power and knowledge in France from the 1830s through the 1930s, Rabinow uses the tools of anthropology, philosophy, and cultural criticism to examine how social environment was perceived and described. Ranging from epidemiology to the layout of colonial cities, he shows how modernity was revealed in urban planning, architecture, health and welfare administration, and social legislation.

Cette analyse du nouveau rapport entre ville et architecture qui fut mis en place en France après la Seconde Guerre mondiale s'appuie sur les exemples parisiens des quartiers Maine-Montparnasse et La Défense. Elle montre que le concept de ville sur dalle trouve ses fondements dans les idées de Le Corbusier, dans le rapport Buchanan et dans les projets d'Hugh Ferriss ou de Norman Bel Geddes.
