HAILIE RIDDLE

The Jolley-Rogers and the Monster's Gold HarperCollins UK
"Bees play an essential role in the pollination of native plants and agricultural crops across the globe. In North America alone there are more than 4,000 bee species. In spite of their abundance and diversity, there is no accessible field guide for the non-expert. This book will remedy that situation by providing a carefully crafted introduction to bee identification for eastern North America. No portable field guide could include coverage of the myriad species in the region, so the book concentrates on identifying bees at the genus level. It includes information on the 72 different genera that are found east of the Rockies"--

Frog is Sad Hachette UK

Beautiful, whimsical, and entertaining, this book of illustrations by Britta Teckentrup shows eggs in all their fragility, complexity, and variety. Is there anything as simple as an egg? Is there anything as complex? In this gorgeous picture book, Britta Teckentrup portrays eggs through the eyes of an artist. From hummingbirds to the extinct elephant bird, illustrations of the avian world's smallest and largest eggs demonstrate the variety present in nature. Pastel studies explore the rainbow of soft colors and intricate patterns that make eggs of common birds seem incredibly striking. In Teckentrup's hands, a scattering of broken egg shells become abstract art; a nest of unhatched eggs suggest the possibility and promise of life. Her studies of songbirds and nests are themselves beautifully composed works

of color and line. A lovely meditation on the diversity of eggs, this magnificent book offers hours of lingering pleasure, and becomes fertile ground for conversation and imagination.

The Ladybug Candlewick Press

The group of saproxylic beetles consists of thousands of different species exhibiting a rich variety of form as well as varied life-cycle strategies. They play an important role in decomposition processes and thus for nutrient-cycling in natural ecosystems. Based on contributions given at the conference this book contains contributions about research on conservation ecology of saproxylic beetles as well as results from recent faunistic surveys in different European regions. It comprises aspects of saproxylic beetle ecology, faunistics, diversity and conservation issues. International experts report on their activity, management strategies and new approaches in saproxylic insect conservation. There are a lot of people doing research on saproxylic beetles in different countries of the world, but this seems to be a little bit disorganized. Hopefully, these European conferences will lead to a better, more international network. The contributions included in this volume cover a broad spectrum of research on saproxylic beetles, organized in three main chapters: "Saproxylic beetle assemblages and regional surveys" include "Oaks in Norway," showing the abundance and composition of red-listed species of beetles in hollow oaks. Further reports on regional surveys deals with a spruce primeval forest in Romania, a hardwood floodplain forest in the Czech Republic, and the Gartow region of Lower Saxony, a hotspot of saproxylic beetle diversity in north-western Germany. "Saproxylic beetle ecology and implications for their conservation" deals with ecological studies of single species, e.g.

Limoniscus violaceus, *Lucanus cervus*, *Osmoderma eremita* and the worldwide distribution of the genus *Cucujus*. "Advances in methodology and databases" discusses new techniques in trapping and the development of databases. This volume gives a nice overview of the actual research on saproxylic beetles in Europe and I wish the next conference in 2010 a successful meeting; maybe some people from the UK or even overseas should be invited.

Virtual Kombat (Pocket Money Puffin) Random House

Discover more about our fuzzy little insect friends with award-winning author and illustrator Charlotte Milner. The perfect introduction to bee conservation for little ones. Learn all about the beautiful world of bees and their adventure from flower to flower. You'll find out just how much they matter, why they are declining, and what we can do to help in this adorable kids' ebook. Bees are brilliant at building, super social creatures and along with other insects, are responsible for a third of every mouthful of food you eat! Children will be fascinated by the beautiful pictures and learn plenty of buzz-worthy fun facts in every chapter, covering types of bees, beehives, beekeeping, how they pollinate plants and make honey. A beautiful kid's educational ebook about bees with a crucial message: not only does it inform and educate about an issue that is a real threat, but it also delivers it in a way that is gripping for all ages. A dazzling celebration of bees, packaged in a gorgeous ebook with spectacular illustrations. What's The Buzz About Honey Bees? Meet the humble honeybee face-to-face - an animal that is considered nature's hardest worker, in this engaging, educational kids' ebook that you can treasure forever. What do they do all

day? Why are bees important? Find out why they need our help and what you can do. Bees are responsible for so much more than making honey. This ebook is an essential tool in encouraging the protection of our precious buzzing friends for generations to come. Learn all about these valuable creatures: - What happens in the hive - What pollination is - Who the queen is - How honeybees talk to each other - How we can help them and much, much more! This adorable book is one of three children's books on conservation by award-winning author Charlotte Milner and includes The Sea Book and The Bat Book for your little ones to enjoy.

Who is Afraid of Little Wolf? Scholastic Inc.

Tiere und Pflanzen im Jahreskreislauf entdecken Die meisten Grundschüler*innen sind wissbegierig, neugierig und absolut motiviert, ihre Umwelt mitsamt ihren Lebewesen zu entdecken. Fördern und nutzen Sie die kindliche Neugier für Ihren Sachunterricht in der Grundschule. Mit den Materialien dieses Bandes begleiten Sie die Kinder durch den Wechsel der Jahreszeiten und ermöglichen ihnen einen aktiven Zugang zu den Pflanzen und Tieren in ihrer Umgebung. Kindgerecht und handlungsorientiert Die Inhalte beschäftigen sich mit den Veränderungen der Jahreszeiten, sodass Sie die Materialien das ganze Jahr über einsetzen können. Im Frühling entdecken die Kinder beispielsweise die Frühblüher, was Ihnen eine tolle Möglichkeit bietet, den Unterricht ins Freie zu verlagern. Auch eine Unterrichtseinheit über Insekten, insbesondere die Honigbiene, verschafft Ihnen die Gelegenheit, außerhalb des Klassenraums zu unterrichten. Ein Großteil der Arbeitsvorschläge sind für einen aktiv-entdeckenden Sachunterricht konzipiert

worden. Schnell einsatzbereit Sie erhalten alle Materialien als Kopiervorlagen, die im Handumdrehen einsatzbereit sind. Die einzelnen Kapitel sind jeweils für einzelne Klassenstufen entwickelt worden, sodass Sie als Lehrkraft eine ganze Sammlung an Materialien für die Klassen 1 bis 4 vorrätig haben. Zu jedem Kapitel finden Sie hilfreiche didaktisch-methodische Empfehlungen und Tipps. Beobachten, entdecken, dokumentieren und begreifen - mit den handlungsorientierten Materialien dieses Bandes macht der Sachunterricht nicht nur Ihren Grundschüler*innen richtig Spaß! Die Themen: - Jahreszeiten - Frühblüher - Vögel im Jahreslauf - Der Apfelbaum im Jahreslauf - Die Wiese im Jahreslauf - Insekten (Bienen) - Früchte im Herbst - Der Wald im Jahreslauf - Tiere im Winter Der Band enthält: - Kurze methodisch-didaktische Hinweise zu den einzelnen Kapiteln - vielfältige Materialien als Kopiervorlagen für aktiv-entdeckende Unterrichtseinheiten

Aaaarrgghh, Spider! Auer Verlag

After fleeing their homeland, Australian refugee policies threaten to tear this young couple apart. An unforgettable story of love, hope and a quest for freedom. At seventeen, all Mojgan Shamsalipoor wanted was to be safe from physical and sexual abuse, go to school, and to eventually marry for love. In Iran, she was denied all of this. Milad Jafari was a shy teenage boy who found his voice as a musician. But the rap music he loved was illegal in his country. All Milad's father, a key maker, builder and shopkeeper, wanted was for his family to live free from the fear of arrest, imprisonment or execution. To do that they all had to flee Iran. Mojgan and Milad met in Australia. But in the months between their separate sea voyages, the Australian government

changed the way asylum seekers were treated. Though Milad is recognised as a refugee and will soon become a proud Australian citizen, Mojgan has been told she cannot stay here even though the threat of imprisonment and further abuse, or worse, means she can't return to Iran. *UNDER THE SAME SKY*, is a powerful insight into the human face of asylum seekers and the the way history has shaped the lives of these two young people. It also shows the compassion alive in our suburbs. For Mojgan and Milad, their love keeps their hopes alive.

Neon Leon Penguin

Ever wondered how many spots a ladybug has? What it eats? How high it can fly? This sweet and stylish lift-the-flap book reveals all the fascinating facts about every child's favorite beetle – the ladybug. Featuring charming illustrations by Bernadette Gervais, delightful nested flaps and a fun spot-the-difference activity, *The Ladybug* is the perfect introduction to nature for young children, and will encourage little explorers everywhere to take a closer look at the world around them.

Wally and Mae Penguin UK

A monstrously funny debut from the new star of middle-grade adventure.

World of Bees My First Discoveries

Interessante Informationen über das Leben der Biene für Erstleser und zum Vorlesen.

Where Is the Cake Now? Simon and Schuster

A rip-roaring read-aloud (shout-aloud) picture book about a spider who wants to be the family pet from the internationally acclaimed illustrator of Julia Donaldson's *What the Ladybird Heard*. Spider wants to be a family pet. But the family whose house he lives in

are terrified of him. Whenever he tries to show them what a great pet he would make, they simply cry: "AAAARRGGHH, Spider!" The illustrator of Julia Donaldson's famous titles such as *The Singing Mermaid* and *The Rhyming Rabbit* proves she is an author in her own right with this best-selling picture book story.

Pflanzen und Tiere im Kreislauf der Jahreszeiten National Geographic Books

A wordless picture book in which a frog and lizard steal cakes from a group of animals who are going on a picnic and falsely accuse two rats of the theft, as a wild pursuit ensues through woods, fields, forests, and hills.

Common Bees of Eastern North America Esslinger Verlag

Bees have always been friends to man, even way back in prehistoric times. They feed on nectar and pollen and transform them into honey, a delicious substance that besides being a tasty food, it's a key ingredient for many beauty products, and a synonym for pleasant and nourishing pampering. But the importance of bees goes far beyond this. These special insects play a role of primary importance in the pollination of flowers and plants, which are at the base of the food chain of a great many animals. This book gives you the chance to get to know them from up close, and to explore their fascinatingly complex society, showing you how everything is perfectly organized, from the cleanliness of the hive to its defence, from gathering nectar to caring for the larvae. The book pays special attention to the dangers these hard-working insects currently face due to pollution and harmful human behaviour that risk interfering heavily with the life of a species that ought to be defended at all costs! AGES: 6 plus AUTHOR: Cristina Banfi Graduate in Natural

Sciences at the Università degli Studi di Milano, she has taught in a number of scholastic institutes. She is a founding member of the Museum Didactic Association (ADM) and ADMaiores, working in the field of education in museums and exhibitions. For over 20 years she has worked in scientific communication and learning through play and boasts a vast editorial experience in both education and popularisation, in particular for children and young adults.

Harper and the Scarlet Umbrella Laurence King Publishing
Rosie is haunted by monster nightmares. Waking up in a pool of sweat, she is bound and determined to confront her fears. Her solution is so deft and clever, mixing a deep knowledge of childhood, exuberant energy, and... a kiss, that it will leave young readers cheering and, more important, armed with some of the tools to tackle their own night monsters. Philip Waechter, the creator of the wonderfully all-too-human hero bear in *Me!*, now shows an equally keen and sensitive appreciation of the dilemmas of childhood. In *Rosie* he has created a feisty and courageous little heroine, who can stand proudly next to William Steig's *Brave Irene* and Kevin Henke's *Lily*.

1000 und 1 Buch Chronicle Books

All the animals in *HORRIBLE SCIENCE: NASTY NATURE* are the deadliest, most disgusting and nastiest things that nature has to offer! So only read on if you're ready to find out: how vampire bats slurp blood, what a singing gorilla sounds like, how to dodge a man-eating tiger and which Japanese fish dish can kill you. Redesigned in a bold, funky new look for the next generation of *HORRIBLE SCIENCE* fans.

Die Biene Koala Books

Follows the life cycle of the bee and the activities within the hive. Includes transparent overlays.

The Egg NorthSouth Books

Bestselling *Mr. Panda* is back with bedtime fun for everyone! It is time for bed and *Mr. Panda* reminds his friends Hippopotamus, Skunk, Sheep, and Sloth that they each have forgotten to do something. Skunk has forgotten to take a bath, Hippopotamus needs to brush his teeth, Sloth is too tired to move, and much more. *Mr. Panda* is there to remind them of the steps they've missed. As Lemur eventually finds out, however, even *Mr. Panda* can make a bedtime mistake! Steve Antony combines the ever-popular bedtime theme with the humor and fun that only *Mr. Panda* can bring.

Firefly Home Egmont Books (UK)

When Pip the mouse learns that the moon is made of stinky cheese, he has a big idea - he's going to be an Astromouse! Pip makes himself a rocket out of an old funnel and some cardboard, and prepares for take-off. But blasting to the moon is harder than he thought and things don't go quite to plan. On his way home Pip sees a huge reflection of the moon in a pond. The moon has come to him! As he reaches down to break off a piece of stinky cheese, the eyes of a large frog appear and a frightened Pip runs all the way back home. He decides the moon is far too scary for a mouse, and he'd much rather live with his mom instead.

Good Night, Mr. Panda NorthSouth Books

A lonely pig sneaks into school where he enjoys lunchtime and making new friends.

The Not-so-perfect Penguin White Star Kids

Oskar and Mo are birds, and they do many fun things together

because they are best friends.
