System  
Recovery & Evacuation  
When installing or  
servicing an air  
conditioning or  
refrigeration system,  
two of the most  
important tasks  
performed by  
technicians are  
refrigerant recovery  
and system  
evacuation. In order to

perform these tasks  
properly, and in a safe  
manner, technicians  
need to understand the  
theory behind them,  
having a working  
knowledge of the  
equipment and tools  
used, and employ  
accepted industry best  
practices. This e-book  
walks through each  
step of both tasks,  
while covering safety,  
theory, and  
application. Also  
covered are leak  
detection methods and  
filter drier use. System  
Recovery and  
Evacuation was written  
by HVACR instructors

for HVACR instructors to provide sound, relevant information in a single source. This e-book provides students and practicing technicians with the information and knowledge necessary to understand refrigerant recovery, system evacuation, leak detection, and filter driers. It is full of color illustrations and

includes worksheets that provide students and practicing technicians with the information and knowledge necessary to accurately and safely install or service air conditioning and refrigeration systems. The end of the e-book contains fill-in-the-blank questions that review the content of the entire manual.
