Test Prep Workbook for the NCCAOM Biomedicine Module  
Cisco Press  
This book is designed as a guide for the practitioner interested in taking the Bio-medicine portion of the NCCAOM exam. The NCCAOM Bio-medicine module is made up of 50 questions divided into three sections and this book is modeled after this exam, containing questions from each of the three categories. The book is divided into five tests containing 50 questions each. Each test includes an answer sheet, answer key and detailed explanations for most questions. Practitioners not interested in taking the Bio-medicine portion of

the NCCAOM exam may also find the information contained in this book useful in their everyday clinical practice.

with this best-selling text. HOW TO STUDY IN COLLEGE sets students on the path to success by helping them build a strong foundation of study skills, and learn how to gain, retain, and explain information. Based on widely tested educational and learning theories, HOW TO STUDY IN COLLEGE teaches study techniques such as visual thinking, active listening, concentration, note taking, and test taking, while also incorporating material on vocabulary building. Questions in the Margin, based on the Cornell Note Taking System, places key questions about content in the margins of the text to provide students with a means for reviewing and

reciting the main ideas. Students then use this technique--the Q-System--to formulate their own questions. The Eleventh Edition maintains the straightforward and traditional academic format that has made HOW TO STUDY IN COLLEGE the leading study skills text in the market. Critical care medicine is a dynamic and exciting arena where complex pathophysiologic states require extensive knowledge and up-to-date clinical information. An extensive knowledge of

basic pathophysiology, as well as awareness of the appropriate diagnostic tests and treatments that are used to optimize care in the critically ill is essential. Since our first edition 7 years ago, new information crucial to the care and understanding of the critically ill patient has rapidly accumulated. Because this knowledge base crosses many different disciplines, a comprehensive multidisciplinary approach presenting the information is essential, similar to the multidisciplinary approach that is used to care for the critically ill patient. We have strived to provide this content in an easily digestible format that uses a variety of teaching tools to

facilitate understanding of the presented concepts and to enhance information retention. To meet the demand to provide comprehensive and diverse education in order to understand the pathogenesis and optimum care of a variety of critical illnesses, we have substantially revised the prior topics in the first edition with updated information. We have also markedly expanded the number of topics covered to include acute lung injury and the acute respiratory distress syndrome, an expanded discussion of the physiology and operation of mechanical ventilation, obstetrical care in the ICU, neurosurgical emergencies, acute coronary syndromes,

cardiac arrhythmias, role of whole body rehabilitation in the ICU, ethical conduct of human research in the ICU, and nursing care of the ICU patient.
