Scuba Diving Simon Pridmore

Scuba Exceptional is the perfect sequel to Simon Pridmore's Scuba Confidential - An Insider's Guide to Becoming a Better Diver. It reflects the same philosophy of safe diving through the acquisition of knowledge and skills. The themes are new, there are some wonderful and extremely useful new cautionary tales and the focus this time is more on issues that face experienced divers. For example, there is more technical diving content but, as usual, Simon covers complex issues in his usual clear and easy-to-read style. In many cases, the concerns of technical divers reflect those of scuba divers at every level. After all, as he says, technical diving is on the same spectrum as conventional sport diving: it is just a different frequency. Scuba Exceptional also deals in detail with the psychological approach to scuba diving, broaching topics from new angles and borrowing techniques and procedures from other fields of human activity. While most of Scuba Exceptional focuses on the diver, it also takes a look at the wider picture and highlights a number of areas where scuba diving professionals and the "industry" as a whole are letting divers down. As always, Simon is realistic in his assessments. He may shine a little light on the dark side of the scuba diving world, but he does this in order to illuminate bad practice and encourage change, while offering solutions. He also provides insights on a wide range of topics. For instance, do you want to know... what makes someone a good diver? how to swim against a current without getting exhausted? how you can be out of air while you still have plenty to breathe? what the concept of failure points is? how to be a defensive diver? how preconditioning applies to scuba diving? how long you should really wait between diving and flying? when to call DAN (and when not to call)? how corals could possibly be animals when they look like rocks? how to avoid being left behind in the ocean? what's happening in the world of rebreather diving? or what the perimeter of ignorance is? Scuba Exceptional has the answers to these questions and a lot more

Scuba Confidential also gives you valuable insights on a vast range of topics such as what it is like to do a cave diving course, how to make sure you buy the right equipment, what to consider when choosing an instructor, things even the pros get wrong and where to find the best diving in the world. This is candid, no-nonsense practical advice from a professional who has been involved over the last three decades with virtually every aspect of the sport. Have you ever wondered? How to look as comfortable in the water as the professionals do? What it is like to dive inside shipwrecks? Which training courses are most worthwhile? If you would make a good technical diver? If you should be considering a rebreather? How you can improve your diving skills? How you can reduce your air consumption? Why diving accidents happen and how to prevent them? Whether you might sometimes actually be safer solo diving? How to dive deep safely? Or How muck diving can possibly be any fun? Scuba Confidential has the answers to these questions and many more.

Taiwan is a Pacific island – actually several islands: a big one and some smaller satellites – surrounded by warm tropical seas. It is easily accessible, has excellent transportation and is a first-world society with out-going, friendly, laid-back people. Especially in the south and on several of the outlying islands, there is some very good scuba diving and also a network of dive centres and resorts with first-class professional staff and equipment. They provide services for a young generation of Taiwanese, who are driving development in the sport with considerable enthusiasm. Yet, when divers elsewhere in the world think about diving destinations, Taiwan is rarely even a blip on their radar screen. Very few people outside Taiwan have ever thought to enquire about the diving there, and very few people inside Taiwan have ever thought to tell anyone about it. Until now... In Dive into

Taiwan, Simon Pridmore unveils the underwater secrets of these islands and guides you around expertly, making sure you travel easily, dine well and appreciate the unique culture and traditions of Taiwan as well as its marine treasures. This is the first English-language guide to diving the reefs and wrecks of hitherto unknown locations such as Penghu, Xiaoliuqiu, Hengchun, Lanyu (Orchid Island), Ludao (Green Island) and Taiwan's Northeast Coast and places them firmly on the international diving map. Authoritative, well written and beautifully illustrated by Taiwanese photographer Kyo Liu's superb underwater images, Dive into Taiwan opens the door to a new and exciting destination for travelling divers.

Unlock your hidden potential with this practical and approachable introduction to self-directed inquiry--the main meditative practice of the Diamond Approach. Much like the ocean, each of us has inner depths: an entire world beneath the surface of everyday living pulsing with beauty, life, and mystery. The secret depths of our inner worlds are the very things that we spend our lives searching for: love, support, belonging, meaning, joy, and freedom. Through a contemplative practice known as diamond inquiry, you can begin to directly explore your conscious experience just like a diver exploring a reef. You'll discover wondrous treasures and terrifying sights alike, as well as infinite expanses, and limitless potential and freedom. Diamond inquiry combines the depth of meditation with the power of understanding and psychological insight. Guided by your own curiosity, you use a variety of questions to explore your present-moment experience as it unfolds, deepens, and transforms. This method was developed by A. H. Almaas, founder of the Diamond Approach, though the practice is ideal for anyone who wants to explore their inner world. Dominic C. Liber introduces this powerful tool along with step-by-step exercises to develop your understanding. Through this simple yet profound practice, in time every situation will become a doorway to realizing and actualizing deep insight and transformation.

A triumphant memoir by the former editor-in-chief of French Elle that reveals an indomitable spirit and celebrates the liberating power of consciousness. In 1995, Jean-Dominique Bauby was the editor-in-chief of French Elle, the father of two young children, a 44-year-old man known and loved for his wit, his style, and his impassioned approach to life. By the end of the year he was also the victim of a rare kind of stroke to the brainstem. After 20 days in a coma, Bauby awoke into a body which had all but stopped working: only his left eye functioned, allowing him to see and, by blinking it, to make clear that his mind was unimpaired. Almost miraculously, he was soon able to express himself in the richest detail: dictating a word at a time, blinking to select each letter as

the alphabet was recited to him slowly, over and over again. In the same way, he was able eventually to compose this extraordinary book. By turns wistful, mischievous, angry, and witty, Bauby bears witness to his determination to live as fully in his mind as he had been able to do in his body. He explains the joy, and deep sadness, of seeing his children and of hearing his aged father's voice on the phone. In magical sequences, he imagines traveling to other places and times and of lying next to the woman he loves. Fed only intravenously, he imagines preparing and tasting the full flavor of delectable dishes. Again and again he returns to an "inexhaustible reservoir of sensations," keeping in touch with himself and the life around him. Jean-Dominique Bauby died two days after the French publication of *The Diving Bell and the Butterfly*. This book is a lasting testament to his life.

Mike McGuire has been spear fishing all his life and has shared his experience with us to create a manual of great use to people who are taking up this sport, but also to people like me who have never speared a fish, but are passionately interested in diving and in fish. This book emphasizes safety, and I would urge any prospective spear fisher to read and carefully follow Mike's advice on safety. Mike covers fitness in great detail, including useful exercises to improve your fitness. He also gives his ideas about equipment. As Mike says, spear fishing has been done for thousands of years. At first this would have been a way of getting food, but as with many human activities it has developed into a sport. The book caused me to consider who the first spear fishers were. Although I referred to spear fishing as a human activity, the first spear fishers were almost certainly not

human. Bonobos, a type of ape, will catch fish with their hands and have been observed to make and use very primitive spears. The first spear fishers were almost certainly an earlier near human creature." - Steve Challis (Australia)
