Years ago someone lit a match... Laura has spent most of her life being judged. She's seen as hot-tempered, troubled, a loner. Some even call her dangerous. Miriam knows that just because Laura is witnessed leaving the scene of a horrific murder with blood on her clothes doesn't mean Laura is a killer. Bitter experience has taught her how easy it is to get caught in the wrong place at the wrong time. Carla is reeling from the brutal murder of her nephew. She trusts no one and no thing; good people are capable of terrible deeds. But how far will she go to find peace? Innocent or guilty, everyone is carrying damage. Some are damaged enough to kill. Look what you started.

Fences and Windows: Dispatches from the Front Lines of the Globalization Debate brings together two years of Naomi Klein's writings and tracks the globalization conflict from Seattle to September

11th and beyond. Since the publication of No Logo, Naomi Klein has continued tirelessly as a brilliant and informed contributor to contemporary debate. Fences and Windows: Dispatches from the Front Lines of the Globalization Debate, intended as a companion to No Logo, includes her most notable essays, speeches and articles on issues from NAFTA to Genetically Modified Organisms to the violence in Genoa. It offers introduction and explanation, looking at where the movement has come from and where it is going. More than any other single voice, Naomi Klein articulates the concerns and complaints of a generation: about economic fundamentalism, the criminalization of dissent and the effects of Free Trade. But this book also reflects on the nature of resistance: the street protests that shocked and energized millions, carnival-style subversion and the apparent disorganization that is anti-globalization's great strength. Fences and Windows: Dispatches from the Front Lines of the Globalization Debate is provocative, intelligent and passionate, a document, in its own right, of a unique time in our history.

Before I Burn CSIRO PUBLISHING

Susan Orlean's bestseller and New York Times Notable Book is "a sheer delight...as rich in insight

and as varied as the treasures contained on the shelves in any local library" (USA TODAY)—a dazzling love letter to a beloved institution and an investigation into one of its greatest mysteries. "Everybody who loves books should check out The Library Book" (The Washington Post). On the morning of April 28, 1986, a fire alarm sounded in the Los Angeles Public Library. The fire was disastrous: it reached two thousand degrees and burned for more than seven hours. By the time it was extinguished, it had consumed four hundred thousand books and damaged seven hundred thousand more. Investigators descended on the scene, but more than thirty years later, the mystery remains: Did someone purposefully set fire to the library—and if so, who? Weaving her lifelong love of books and reading into an investigation of the fire, award-winning New Yorker reporter and New York Times bestselling author Susan Orlean delivers a "delightful...reflection on the past, present, and future of libraries in America" (New York magazine) that manages to tell the broader story of libraries and librarians in a way that has never been done before. In the "exquisitely written, consistently entertaining" (The New York Times) The Library Book, Orlean chronicles the LAPL fire and its aftermath to showcase the larger, crucial role that libraries play in

our lives; delves into the evolution of libraries; brings each department of the library to vivid life; studies arson and attempts to burn a copy of a book herself; and reexamines the case of Harry Peak, the blond-haired actor long suspected of setting fire to the LAPL more than thirty years ago. “A book lover’s dream...an ambitiously researched, elegantly written book that serves as a portal into a place of history, drama, culture, and stories” (Star Tribune, Minneapolis), Susan Orlean’s thrilling journey through the stacks reveals how these beloved institutions provide much more than just books—and why they remain an essential part of the heart, mind, and soul of our country.

Climate Crisis and the Global Green New Deal Academic Press

#1 international and New York Times bestselling author Naomi Klein, author of *The Shock Doctrine* and *This Changes Everything*, makes the case for a Green New Deal—explaining how bold climate action can be a blueprint for a just and thriving society. For more than twenty years, Naomi Klein has been the foremost chronicler of the economic war waged on both people and planet—and an unapologetic champion of a sweeping environmental agenda with justice at its center. In lucid, elegant dispatches from the frontlines of contemporary natural disaster, she pens surging, indispensable essays for a wide public: prescient advisories and dire warnings of what future awaits us if we refuse to act, as well as hopeful glimpses of a far better future. *On Fire: The (Burning) Case for a Green New Deal* gathers for the first time more than a decade of her impassioned writing, and pairs it with new material on the staggeringly high stakes of our immediate political and economic choices. These long-form essays show Klein at her most prophetic and philosophical, investigating the climate crisis not only as a profound political challenge but as a spiritual and imaginative one, as well. Delving into topics ranging from the clash between ecological time and our culture of “perpetual now,” to the soaring history of humans changing and evolving rapidly in the face of grave threats, to rising white supremacy and fortified borders as a form of “climate barbarism,” this is a rousing call to action for a planet on the brink. With reports spanning from the ghostly Great Barrier Reef, to the annual smoke-choked skies of the Pacific Northwest, to post-hurricane Puerto Rico, to a Vatican attempting an unprecedented “ecological conversion,” Klein makes the case that we will rise to the existential challenge of climate change only if we are willing to transform the systems that produced this crisis. An expansive, far-ranging exploration that sees the battle for a greener world as indistinguishable from the fight for our lives, *On Fire* captures the burning urgency of the climate crisis, as well as the fiery energy of a rising political movement demanding a catalytic Green New Deal.

The Battle for Paradise Orbit

The bestselling author of *No Logo* shows how the global “free market” has exploited crises and shock for three decades, from Chile to Iraq. In her groundbreaking reporting, Naomi Klein introduced the term “disaster capitalism.” Whether covering Baghdad after the U.S. occupation, Sri Lanka in the wake of the tsunami, or New Orleans post-Katrina, she witnessed something remarkably similar. People still reeling from catastrophe were being hit again, this time with economic “shock treatment,” losing their land and homes to rapid-fire corporate makeovers. *The Shock Doctrine* retells the story of the most dominant ideology of our time, Milton Friedman’s free market economic revolution. In contrast to the popular myth of this movement’s peaceful global victory, Klein shows how it has exploited moments of shock and extreme violence in order to implement its economic policies in so many parts of the world from Latin America and Eastern Europe to South Africa, Russia, and Iraq. At the core of disaster capitalism is the use of cataclysmic events to advance radical privatization combined with the privatization of the disaster response itself. Klein argues that by capitalizing on crises, created by nature or war, the disaster capitalism

complex now exists as a booming new economy, and is the violent culmination of a radical economic project that has been incubating for fifty years.

The Shock Doctrine Simon & Schuster

New York Times-Bestselling Author: The renowned economic theorist explains how America can—and must—create a post-fossil fuel culture to survive. We can’t keep doing business as usual. Facing a global emergency, a younger generation has spearheaded a national conversation around a Green New Deal—a movement with the potential to revolutionize society. But while the Green New Deal has become a lightning rod in the political sphere, there is a parallel movement emerging within the business community that will shake the very foundation of the global economy in coming years. Key sectors of the economy are fast-decoupling from fossil fuels in favor of ever-cheaper solar and wind energies and the new business opportunities and employment that accompany them. New studies are sounding the alarm that trillions of dollars in stranded fossil fuel assets could create a carbon bubble likely to burst by 2028, causing the collapse of the fossil fuel civilization. The marketplace is speaking, and governments will need to adapt if they are to survive and prosper. In *The Green New Deal*, Jeremy Rifkin delivers the political narrative and economic plan for the Green New Deal that we need at this critical moment in history. The concurrence of a stranded fossil fuel assets bubble and a green political vision opens up the possibility of a massive shift to a post-carbon ecological era, in time to prevent a temperature rise that will tip us over the edge into runaway climate change. With twenty-five years of experience implementing Green New Deal-style transitions for both the European Union and the People’s Republic of China, Rifkin offers his vision for how to transform the global economy and save life on Earth. “The Green New Deal takes a stance quite different from that of typical Green New Deal supporters . . . he’s interested in building factories, farms, and vehicles in a fossil-free world, asserting that ‘the Green New Deal is all about infrastructure.’” —The New York Times Book Review “An urgent endorsement of efforts to remake a doomed fossil-fuel economy before it’s too late.” —Kirkus Reviews

Forest Fires Sound Wisdom

“This comprehensive book offers a fascinating overview of how those fires are fought, and some conversation-starters for how we might reimagine our relationship with the woods.” —Bill McKibben, author of *Eaarth: Making a Life on a Tough New Planet* Wildfire season is burning longer and hotter, affecting more and more people, especially in the west. *Land on Fire* explores the fascinating science behind this phenomenon and the ongoing research to find a solution. This gripping narrative details how years of fire suppression and chronic drought have combined to make the situation so dire. Award-winning nature writer Gary Ferguson brings to life the extraordinary efforts of those responsible for fighting wildfires, and deftly explains how nature reacts in the aftermath of flames. Dramatic photographs reveal the terror and beauty of fire, as well as the staggering effect it has on the landscape.

California Burning Verso Books

The New York Times–bestselling roadmap to resistance in the Trump era from the internationally acclaimed activist and author of *On Fire* and *The Battle for Paradise*. The election of Donald Trump is a dangerous escalation in a world of cascading crises. Trump’s vision—a radical deregulation of the US economy in the interest of corporations, an all-out war on “radical Islamic terrorism,” and a sweeping aside of climate science to unleash a domestic fossil fuel frenzy—will generate wave after wave of crises and shocks, to the economy, to national security, to the environment. In *No Is Not Enough*, Naomi Klein explains that Trump, extreme as he is, is not an aberration but a logical extension of the worst and most dangerous trends of the past half-century. In exposing the malignant forces behind Trump’s rise, she puts forward a bold vision for a mass movement to counter rising militarism, nationalism, and corporatism in the United States and around the world. Longlisted for the National Book Award “I hope that Klein’s book is read by more than just her (mostly) leftwing fan base. For whatever you think about her economic arguments, she makes a powerful and an important point: that you cannot understand Trump without looking at how he reflects bigger cultural and social dynamics. And what is perhaps refreshing about *No Is Not Enough* is that Klein tries to move beyond mere outrage and hand-wringing to offer a practical manifesto for opposition.” —Financial Times “Brims with ideas rarely heard in the mainstream media. And her fiery, punchy writing style, which is occasionally laced with humor, makes it hard to put down.” —The Georgia Straight

A revelatory, urgent narrative with national implications, exploring the decline of California's largest utility company that led to countless wildfires — including the one that destroyed the town of Paradise — and the human cost of infrastructure failure Pacific Gas and Electric was a legacy company built by innovators and visionaries, establishing California as a desirable home and economic powerhouse. In *California Burning*, Wall Street Journal reporter and Pulitzer finalist Katherine Blunt examines how that legacy fell apart—unraveling a long history of deadly failures in which Pacific Gas and Electric endangered millions of Northern Californians, through criminal neglect of its infrastructure. As PG&E prioritized profits and politics, power lines went unchecked—until a rusted hook purchased for 56 cents in 1921 split in two, sparking the deadliest wildfire in California history. Beginning with PG&E's public reckoning after the Paradise fire, Blunt chronicles the evolution of PG&E's shareholder base, from innovators who built some of California's first long-distance power lines to aggressive investors keen on reaping dividends. Following key players through pivotal decisions and legal battles, *California Burning* reveals the forces that shaped the plight of PG&E: deregulation and market-gaming led by Enron Corp., an unyielding push for renewable energy, and a swift increase in wildfire risk throughout the West, while regulators and lawmakers pushed their own agendas. *California Burning* is a deeply reported, character-driven narrative, the story of a disaster expanding into a much bigger exploration of accountability. It's an American tragedy that serves as a cautionary tale for utilities across the nation—especially as climate change makes aging infrastructure more vulnerable, with potentially fatal consequences.

The MacArthur grant-winning environmental justice activist's riveting memoir of a life fighting for a cleaner future for America's most vulnerable A Smithsonian Magazine Top Ten Best Science Book of 2020 Catherine Coleman Flowers, a 2020 MacArthur "genius," grew up in Lowndes County, Alabama, a place that's been called "Bloody Lowndes" because of its violent, racist history. Once the epicenter of the voting rights struggle, today it's Ground Zero for a new movement that is also Flowers's life's work—a fight to ensure human dignity through a right most Americans take for granted: basic sanitation. Too many people, especially the rural poor, lack an affordable means of disposing cleanly of the waste from their toilets and, as a consequence, live amid filth. Flowers calls this America's dirty secret. In this "powerful and moving book" (Booklist), she tells the story of systemic class, racial, and geographic prejudice that foster Third World conditions not just in Alabama, but across America, in Appalachia, Central California, coastal Florida, Alaska, the urban

Midwest, and on Native American reservations in the West. In this inspiring story of the evolution of an activist, from country girl to student civil rights organizer to environmental justice champion at Bryan Stevenson's Equal Justice Initiative, *Flowers* shows how sanitation is becoming too big a problem to ignore as climate change brings sewage to more backyards—not only those of poor minorities.

The Green New Deal Random House Books for Young Readers

What is the Green New Deal and how can we afford it? To protect the future of life on earth, we need to do more than just reimagine the economy—we have to change everything. One of the seminal thinkers of the program that helped ignite the US Green New Deal campaign, Ann Pettifor explains how we can afford what we can do, and what we need to do, before it is too late. The Case for the Green New Deal argues that economic change is wholly possible, based on the understanding that finance, the economy and the ecosystem are all tightly bound together. The GND demands total decarbonization and a commitment to an economy based on fairness and

social justice. It proposes a radical new understanding of the international monetary system. Pettifor offers a roadmap for financial reform both nationally and globally, taking the economy back from the 1%. This is a radical, urgent manifesto that we must act on now.
